
Ideas Of An Indian

Ashwath Sukumar

Ideas of an Indian

- Ashwath Sukumar .

About authors previous work :

The author's first work is ‘ Thoughts of an Indian ‘ , which won the highest awards from the gods themselves , these awards given by the gods are the highest and greatest awards in all of existence :

1. Truth Award - for unwavering commitment to searching for the truth always and expressing the truth in one's book.
2. Knowledge Award - for showing a never-ending passion to attain the highest knowledge and expressing this knowledge in one's book .
3. Thought Award - for engaging in relentless thinking about everything and expressing these many good thoughts in one's book .
4. Devotion Award - for displaying the utmost unwavering devotion towards the gods and expressing this devotion in ones book .
5. Learning award - for showing the utmost passion for learning about everything and trying to spread this passion for learning in ones book .
6. Life award - for showing the utmost passion for life and living and displaying this passion in ones book .
7. Honesty award - for showing the utmost honesty and maintaining this honesty always and displaying this honesty in ones book .
8. Universe award - for finding answers to the biggest questions like how the universe and everything works and expressing these answers in one's book .

Publisher of 'thoughts of an Indian ‘ - SS Publications .
SS Publications was also awarded with the following titles by the gods themselves :

- ‘ The Publisher of the gods ‘
- ' The Personal Publisher of the Gods ‘
- ' The Divine Publications ‘
- ‘ The Divine Publisher ‘
- ‘ Gods own Publications ‘
- ‘ The Carrier of the Gods’ word ‘
- ‘ The Messenger of the Gods ‘

These are all the highest titles a publisher could win and SS Publications won them all .
Other titles given by the gods :
‘ The greatest human writer ‘ - Ashwath Sukumar .
‘ The greatest publisher ‘ - SS Publications .
****

My name is Ashwath Sukumar ,I am the ordinary Indian who wrote ‘ Thoughts of an Indian ‘ .

This book ‘ Ideas of an Indian ‘ , it is the sequel to ‘ Thoughts of an Indian ‘ , it is the sister piece to ‘ Thoughts of an Indian ‘ , it is not as great a work as its elder sister , but it is also an important work to be read by one and all.

I wrote ‘ Thoughts of an Indian ‘ in just one month . Let us see how much time it takes to write this book .

This book is also written in 2025 like the first book , I am 32 years old when this book is written .

As said in the previous book ,
This work is fiction if you think it is fiction .
This work is non fiction if you think it is nonfiction .
How you think will determine what you make of this book .

Like its elder sister , this book also presents my thoughts and my ideas for the readers , it is a collection of my thoughts and my ideas .

This book is a nonfiction novel .
This book is a novel work of nonfiction .
This book has something for everybody .
This book has everything for somebody .
I write for my entertainment.
You read for your entertainment.

I dedicate this book to my parents , my grandparents , my great grandparents , my ancestors , my gods and finally to the newest member of my family , my wife .

No of pages :
No of words :

Welcome to 'Ideas of an Indian ‘ .
‘ Ideas of an Indian ‘ welcomes you .
Enjoy your stay in ‘ Ideas of an Indian ‘
Have a pleasant stay .
Have pleasant memories .

So Ashwath , how are you ?

I am fine . How are you ?

I am fine Ashwath . So what did readers think about your previous book ?

Hardly anybody read it , but even if they did read it , they wouldn't like it , they are sure to feel upset by many things I said in that book , they are sure to feel angry and infuriated , they are sure to call me bad words , they are sure to label me a nutcase or a psycho or a madcap or a mental , that is for sure .

Then what are you going to do about it ?

Absolutely nothing . See , people have been lunatics for a long long time , so what does it matter what those lunatics think of me .

Now let's say they didn't like my description of heaven as a place where the entire surface is made of cloth . Now , let's look at their description of heaven , heaven is located in the clouds , there is cloudy mist flowing in all sides , there are huge ugly looking asuras guarding heaven , there are munis and rishis doing penances , the gods are seated on a throne and they are in meditation always , they are various copious amounts of jewelry and everything is very grand and huge and gaudy like in a TV serial set , now is this idea of heaven perfect ? I don't think so , why do the gods need the ugly looking asuras as security when they are all powerful themselves , why do they need female servants serving them all the time , do these female servants have no personal life then , why are the gods wearing so much jewelry and dressed in silk all the time , why is the cloudy mist always flowing here and there , is this all a perfect vision of heaven , is this the creation of brainy and intelligent people ? Come on , tell me ? I don't think so at all , it is just another idea of heaven , compared to the modern western idea where God wears a long white robe and lives in a completely white dirt free place and walks around like osho and talks like osho , is that a very beautiful idea of heaven then ? Absolutely not , it is also just another idea of heaven . So when everyone has their idea of heaven , I thought of challenging their ideas with my own idea of heaven , I gave an idea completely different from their idea , I challenged their idea

, is what I did , if they can call themselves brainy for having their particular ideas then I can call myself brainy for having my particular ideas , if they can call themselves lunatics for having their own ideas then I will also call myself a lunatic for having my own idea , and that is my point .
You have forced your ideas on the public for a long long time , so give me a chance to force my ideas on the public too .
You forcefully say your ideas are the truth , so allow me to forcefully say my ideas are the truth too .
I did not see heaven , so I can say my ideas are a product of my own belief , similarly you did not see heaven too , but why do you say it is the truth . So you have your ideas , I have my ideas , you have your truth , I have my truth , your truth is based on what you believe , my truth is based on what I believe , we both don't have any real proof , our belief is our proof , our belief is our truth , nobody has any real proof here , the scientists don't have real proof , they have just fabricated proofs , the atheists don't have real proof , the believers don't have real proof either , for all these three groups their belief is their proof , their belief is their truth , so you have your belief and I have mine , you have your truth and I have mine , you have your false proof and I have mine , I won't force my belief and truth and false proof on you , similarly you stop forcing your beliefs and truths and false proofs on me because that is

what you have been doing for years and years , just because you have majority support you have been forcing yourself on me ever since I was born , you gave me big textbooks and other books and forced me to mug it and understand it and become convinced it is the truth , you refused to give me a degree unless I agreed to your belief and truth and false proofs , you refused to give me a proper job and a proper living unless I agreed to your belief and truth and false proof , you made me alone because I refused to believe in your belief and truth and false proof , you have threatened to destroy me and ruin me if I did not come around to accepting your way of thinking and doing things , my life has become a constant struggle because I find myself constantly battling all the beliefs and truths and false proofs you have tried endlessly to force upon me , and you are still not satisfied with all this , you even have mental ideas like wanting to implants chips in my body so you can control me completely , you don't want even the lightest bit of dissent from me , you want to control me and run me fully as if you were God .

So I have only one thing to tell you - Get lost , you evil , go away , I will never believe in you , I will never believe your belief and truth and false proof , you are nothing but evil and you will never control me or run me , you will never get the upper hand over me , so get lost , you evil , you

will soon be destroyed anyway , so get lost .

What you have said is true , it's like that song , another brick in the wall , there is a lot of thought control going on these days , they endlessly talk about climate change because they want to sell their EV's , they don't really care about climate change there , they care about their business, they want to sell more EV's and bring a big disruption that will benefit them financially , that is their sole aim . From 2020-23 they were endlessly talking about crypto currency and trying to promote it , from 2024 to the present they are endlessly talking about artificial intelligence and trying to promote it , they are running one scam after the other and the people are falling for it because the people need some excitement and entertainment , if nothing new is there to do then people get bored , so they create such scams to entertain themselves , they create a scam , they bring to themselves a belief that their scam is indeed good and necessary for the betterment of human beings , and once they have brainwashed themselves they proceed to brainwash everybody else , they endlessly keep advertising it to brainwash customers of it's importance and greatness , that's all there is to it .

Exactly , that is what is happening today , seeing all this you start to wonder if people are really people at all , you

feel they have no individuality , you feel they have no thinking capacity of their own , you feel some force or energy is running them all because they don't simply react in ways that a normal and God believing person like I do , they are simply too bad to be true (laughing) , one says a really good person is too good to be true ,and that is true because even a really good person has many flaws in them . Similarly , I feel a really bad person is also too bad to be true , they don't feel like real people at all , they dont feel like individuals at all , they all think in the same wrong ways , they all act in the same wrong ways , they don't exhibit even the slightest bit of reason , they are really eyeboggling creatures , I simply cant believe them at all , they seem that ridiculously and impossibly stupid and bad , it is very difficult for a real individual to be like that , it is very difficult for a free willed individual to be like that , it is impossible for me to be like that , which is why I feel that the Divine energy is running them all like a pack of evil robots , there really is no other plausible reason for people's evenly spread out madness and badness , they are just too bad to be true (laughing) .

(Laughing , laughing) , yes yes , what you say is true , people's behaviour is truly inexplicable and so artificial like characters in a TV serial . In an Indian TV serial , characters all stand in a row in front of the screen and give the most outrageous expressions and reactions possible ,

it is so silly that words cannot express the silliness of it , you have to see it to be stunned by the stupidity they show , there will be sofas and chairs but nobody will sit in them , they will just stand in a row and give each other the most horrid expressions and say the most hammy things possible , and they have guts to call this entertainment , they have the guts to telecast it to millions of homes , and millions of people have the guts to watch these horrible shows and even like them , nothing is absolutely believable in the world , if a really good TV show was created it will fold sooner or later and it's makers will definitely fall into obscurity and they will die of depression and disappointment , but thousands of hammy and rotten shows are created and they have large numbers of followers too , what sense does any of it make , it is all so senseless and inexplicable , people are all so senseless and inexplicable , which is why my belief in the gods has increased ever more and more , I have become convinced of the following :

India is not running because of its people .

Its people are all lost in their own delusions and wrong activities .

India is running because of the Divine energy of the gods.

It is running because of the gods .

It is not running because of any other reason.

This is the truth I know .

One can say is that India is running on luck and fluke , but that is not believable , nobody has such endless luck and such endless fluke , it simply cant be so , there must be a valid reason why everything is still running without breaking and falling apart despite going wrong in all ways possible , everything is going wrong but still nothing is falling apart and it is all being held together by something , and that something is the gods and their Divine energy , they are running this inexplicable show , they are running the Earth and all nations in it , they are running everything and everybody , they are the absolute players of this game I find myself caught in , I am just a pawn in their vast show and their vast script , that's all I believe in .

Mmm hmmm , it's true , what you are saying , then what else ?

People could say they got angry and irritated and disgusted and infuriated by what I wrote in my first book , well I have been getting angry and disgusted and infuriated and absolutely irritated by everything they have been writing in the books and magazines and newspapers and other things , I have tolerated and withstood their endless tsunami of rubbish ever since I was young , why can't they withstand and tolerate my thoughts and ideas from just one book I have written , I have shown extraordinary tolerance to their garbage and their stinking

lies , why can't they show tolerance to my work , I have withstood their millions and millions of pages of useless trash which they have carefully complied over time , why can't they withstand my mere 220 pages of matter , they have sought to endlessly assault my thinking and my sensibilities , why cant they tolerate my assault on their thinking and sensibilities .
In the movies , they show endless scenes of drinking and smoking and brutal killings and toilet scenes , none of it is beautiful and aesthetic , it is all totally ugly , but they show it endlessly to plant the idea that drinking and smoking are a normalised thing and everybody must engage in it because it is the ultimate fun in life , and by showing brutal killings they have made people's minds so dark that such brutal killings have really started happening in today's society , they have normalised psychotic behaviour and madness and brutal killings too , they have normalised toilet jokes and toilet based comedy too to take things to a whole new low , so they are normalising everything bad , but they are not normalising anything good , why is that , why do they want people to become dark individuals and ruin themselves , why are they endlessly promoting wrong activities and wrong behaviour on screen and in society too. Why is bad alone winning and good always losing , why is bad always thriving and increasing whereas good is always fading and disappearing , why is everything becoming uglier and uglier , going down lower and lower ,

what is anyone doing about all this , why is everyone doing nothing about all this , that is the ever lingering question , and it's answers have been given in the first book itself - the simple answer being that people are bad , totally bad .

Before , in any election they would go to poor people's homes and give them handouts of money and buy their votes , they used to bribe people secretly in the past . But now , they create a welfare scheme for women before the election and send money to each women's bank account in the name of welfare and they buy people's votes publicly these days , they have legalised bribing in this manner , they say they are doing welfare for people by sending money to people's Bank accounts , it is nothing but bribing . Who asked for your welfare , had you done everything properly then everybody would have had everything they needed for a good life , but you won't do anything proper , instead you will just give a charity handout to people before the election and you say shamelessly that you have done good for them , empowering them to lead a comfortable and dignified life is what you should have given them , but instead keeping them in a state of poverty and then giving them handouts and calling yourself a divine and charitable person , that is all such a fakery . If you had given people everything properly and fairly , then useless things like charity and

welfare and donation and social work would not exist , these things won't make people better , these things will only increase the inferiority complex in people even more and make them even worse than they are , they might make you feel like a person with a golden heart , but they will make others feel more miserable to the core , so charity and social work and donation and welfare and freebies are all absolutely not needed , the world doesn't need these things at all , the world needs to people to be fair and do what is right and fair to each other , that's all.

What you are saying is true , like always. You know , sometimes when you talk I get the feeling that you are like some hero in a Telugu movie , the same intensity you show , the same rawness and anger you show , the same kind of different dialogues you speak , you seem to be a Telugu hero (laughing)

Yes , it's true , I am Telugu , I am living in the epic movie called life that is happening on earth , and I am the lead character of the my own story , the hero of my own story , so I am a Telugu hero too , I have the same intensity and rawness and energy and anger in me , I have the same Telugu style of speaking , it is in my nature , i cannot change it , it is an inherent part of me , it is there in my blood itself , what to do , I cannot change it or remove it , I

cannot suppress it and act like a Westerner , no matter how much i may try to suppress my original nature It will always come blasting out in some moment or the other , so it is best that I be myself at all times rather than to be a split personality , becoming different kinds of person at different moments , that is a highly unstable thing to do , the true nature will come bursting out sudden suddenly and you will be become very embarrassed and ashamed by the sudden changes in character , so it's best to be consistent and show inward nature outside too whenever possible and just be quiet and silent at other times .
But the lead characters of the entire show are the gods , they are the absolute performers.

Yes yes , ha ha ha , but I wonder what other reaction people may give to your book ?

People definitely won't appreciate my book , that is for sure , but they can show a lot of bad reactions too - they can do petty things like burning copies of my book , they can throw stones at my house , they can try to assault me , they can try to hurt those close to me , they can put petty court cases against me asking me to apologise for my words and remove portions from my book because it displeased them , they can ban my book all over the nation and all over the world , they can put me on the blacklist , they can try to ruin me in any way they can ,

they can remove my book from the internet and from the bookstores , they can alienate me even more , they can do a lot of petty things which they normally do when they don't like somebody or something .
On the other hand , I don't like most of the things that people do , I know they are all wrong activities , so how must I react to it ? I cant react extremely like them because I am just an individual and I don't have the power of the majority , so how must I react to all their endless atrocities ? If I had the physical strength of a telugu movie hero then I would bash them all up and send them flying in the air , but I can't do that too because I don't have that kind of strength , so what am I to do when I face the constant cheating that people try to do to me , the law won't punish this endless ocean of cheaters , but the law will punish me if I call these cheaters as cheaters , me calling them by their real name is a mistake whereas all the cheating and crimes they do is just written off without them getting any punishment for it all , that is how it is , the law is very lenient to cheaters and criminals whereas it strictly punishes the person who gets angry with these people and calls them cheaters and criminals , all politicians are criminals , but if I call them a criminal openly then they will put a defamation case on me and punish me for calling them as criminals , that is how unjust the law is , it protects the criminals far more than it protects the innocent , it punishes the innocent far more than it

punishes the criminals , which is why society has become the way it is today .
Not a single honest person is to be found in politics anywhere in the world , there was never a single honest person in politics , there will never be a single honest person in politics , a truly honest and good person can never enter politics , he will never be allowed to enter politics , and even if he tries to enter politics he will be crushed and thrown out immediately , politics is entirely reserved for corrupt people only , a honest person will never make it big in politics , a honest person will only become a big zero in politics , that is the truth .
A truly honest person has absolutely no future in public life either , a truly honest person willl never become famous in today's world , a truly honest person will never get any recognition whatsoever in today's world , a truly honest person will only become infamous and widely hated in today's world , that is definite , people will make sure that such a person will never succeed in life , people will make sure than such a person will never rise to high stature , people will make sure that such a person becomes a definite failure in life , only the gods have to save a truly honest person in today's world , only the gods have to stand by such a person because the people never will , the people will all treat such a person as their enemy and they will try to destroy that person always .

So never have false hopes about people , never have false ideas about people , having false hopes and false ideas will only harm you greatly , that's all .

Today many people don't speak proper clean language at all , they speak in a slang many a times , they use ugly words like ‘ bro ‘ and ‘ dude ‘ and ‘ bestie ‘ and ‘ lol ‘ and ‘ Machi ‘ and ‘ mamu ‘ and so on , many of them speak language in an ugly manner that lacks any grace and beauty and decency , yet when somebody talks ill of their language these people harshly criticise that person despite not talking that language properly and cleanly themselves , even they don't care about speaking their language properly and well yet they group together and criticise anybody who insults their language , is the kind of game they play , they don't really care about their own language here , they just want to group together and attack somebody for their fun , is how they are . They will say they love their language , but they will hardly read any literature written in their language , they will say they want to protect their language but they will go to western universities to study the very first chance they get , they will lead a western style lifestyle and still talk about protecting their language , they will mix English words along with their language words and still call themselves the upkeepers and protectors of their language , they give such useless performances which nobody will believe .

20 years ago , at the peak of globalisation , white people thought they were the kings of the world , they thought they would conquer the world and control the world and be the absolute rulers of the world , they had so much confidence and they showed so much arrogance because they thought nothing and nobody can ever stop them from reaching the pinnacle and enjoying everything to the extreme and living life to the extreme and having endless fun and thrill and excitement and doing all bad things to the extreme and getting away with it all , they felt they were unstoppable and invincible and absolute , they thought they were saving the world and making the world great and making all the money in the world and reaching the peak of glory , they talked brashly , insulted others , were arrogant and extremely proud of themselves , they became convinced they were the all in all in everything . But today , the white people are the most broken bunch , they are the most unhappiest people , the most bored and unstable people , they have lost to the blacks and the Hispanics and the Indians and the Muslims and the Eastern(mongoloid) peoples, they have become dependant on everybody , their family and personal lives have totally crumbled , their faith has totally crumbled , they have no confidence anymore , the arrogance is still their because they feel even weaker without it , white people have become so weak and so hopeless and so helpless today , they are struggling to find jobs , they are

struggling in their jobs , their personal life is totally ruined , they are suffering from mental problems and drug addiction, they are suffering from one thing or the other or all of it simultaneously , the hype and aura they created around themselves is totally lost and gone , the buildup they gave to themselves is totally dead, their soft power is totally dead , nobody cares about their movies and music and TV shows anymore , nobody shows interest in anything the white people do , people would rather watch the Koreans than watch the whites , is how it has become , they have nothing today except all the fake histories they created , they are unable to enjoy anything anymore , they have gone into deep depression , they have lost their capacity to innovate and create new things , even their legendary marketing skills are fading , they are quickly losing their ability to capture and sustain people's interest in their products and ideas , they have greatly lost their favour with the public , that is how the white people have become today , they have become totally lost , they are totally lost , they have become poor and desperate and angry and disillusioned and unhappy and depressed and sad , they have totally lost their former image , they have totally lost the script . Anyone who tries to follow the white people and their ideals will meet the same fate that the white people have met now , if Indians try to emulate the white people then Indians will also become totally lost like

the white people have become , they will also suffer fully like the white people are suffering today ,that is definite . This is why the best thing to do always is to show some humility and be ordinary and calm and normal always , if you start having high ideas and start acting highly and start behaving arrogantly and oversmartly then you will definitely fall down very hard one day and suffer very badly like the white people are doing now , the white people are just living on past glory now because their present and their future has both failed now , they are living in dark times and darkness now , their show is over , their game is finished , they are just trying desperately to avoid their
total destruction now , they are desperately trying to avoid total ruin , they are trying some scam or the other to avoid this horrible fate and destiny , they are so close to their end , they can see their end , they are all scared , they are all afraid , they are trying every measure they can to avoid this bad end they are so close to , that is their present situation , they can never write off this situation , they can never escape from this situation , they brought this situation upon themselves , they deserve it totally , and they shall get it totally , that's all . Had they been even a little good , had they done even a little good , then they could have avoided this terrible situation , but they chose to go completely in the wrong path and the going was great for a while which energised them to commit even more wrong and finally the good going has slowed down

and totally stopped and they are experiencing the consequences of all their bad activities now , and this is only the beginning , they will go down and down until they reach rock bottom and they will be finished completely , they will never escape this destiny which they brought upon themselves , that is definite . Until the 1950s , the whites were just another group on Earth , they were largely rural like other groups , they were ordinary people like other groups , they were largely poor and highly illiterate like other groups , they were equal to other groups in all parameters , the other groups being the Hispanics and blacks and mongoloids and Indians and Muslims , white people started their rapid development in the 1950s , they started rapid urbanisation beginning in the 1950s , this rapid growth continued through the 1950s and 60s , and in the 1970s they came to global prominence and established themselves as the dominant group , poverty and illiteracy and other social problems were still rampant among white families in the 70s but by creating fake histories like the moon landings and by gaining a global audience for their soft power like movies and books and music they were able to come on top and establish themselves as the top group on Earth . In my grandfather and great-grandfathers time nobody cared about America and the west , to them it was just another place , it was only in my fathers generations that America and the west gained importance , this importance given to

them was unnecessary and responsible for much of the destruction in the world today , in my grandfather and great-grandfathers generation they did not study in school and college like we do today , they learned a few things like language and writing and basic maths and then they dropped out of school and did whatever work their parents did , they were not brainwashed by education , they thought for themselves , they lived in their own local world and they were much happier and peaceful than we are today , in my fathers generation they started receiving a full western style education like we get today , they were slowly getting brainwashed into believing western ideals , they couldn't think for themselves because their basic style of thought was altered by this western education they received , their basic style of thinking and living was altered by this brainwashing they received in their schools and colleges , so by the time they got out of college they were neither Indian nor western in their outlook , they were confused and grappling with their identity , on one hand western ideals felt attractive to them and on the other hand traditional ideals were holding them strongly too , some broke away from their traditional roots and chose to become fully westernised , others adopted both traditional and western ideals and lived with both and tried to find a balance between both , is how it was in my fathers generation , they have western ideas but they have a lot of conservative and traditional ideals too and so a normal

Indian style of life was still possible for them , and finally came my generation , we were born when the west was in it's peak power and our education tried it's best to fully brainwash us and turn us into westerners and make us ruin ourselves , and a lot of us have become ruined or affected by these western ideals to various degrees , is what has happened to us , but in my child's generation , say 15-20 years later , the west would become totally failed by then and the those in my child's generation won't be as brainwashed as we were , they will start going back to traditional ideals again because the western ideals have failed completely , they will start becoming traditional again , they will start thinking for themselves again , is what will happen . So goes up comes down , what goes around comes around , the white group's period of domination lasted from 1975 to 2015 , after 2015 they started to experience rapid decline and they are nothing today , their peak phase is over , their Glory days long gone , they will never get it back again , they are finished
,and any other group that tries to emulate them will also meet the same fate and become finished.
The funny thing is , even between 1975 and 2015 the white people were never happy , they were constantly competing amongst themselves for dominance and leading unhappy lives despite attaining many of the material comforts they sought , they got material weath but they were still miserable , they were constantly running

after money and money and were consumed with never ending greed and consumerism , they were obsessed with becoming bigger and bigger , they were never peaceful or happy even in their peak period , finally they bursted and became nothing , that is their story , that is how they rose and fell terribly , they are the single most miserable group today , other groups always faced some kind of misery or the other and have become used to it and have learnt to adapt to it all , but the whites dreamt of reaching the sky and conquering the universe but ultimately they failed in everything , all the lies they said have gone to waste , all the fake histories they created has gone to waste , all their endless criminal activities have ultimately gone to waste , they have become total losers in the very game they created , they have become clueless losers in their own game .

In the covid pandemic , many crores and crores of people died , 5-10 crore people perished in the entire pandemic , but many of the deaths were never reported , especially in many African countries where population census is hardly ever taken and records are hardly kept properly , even in the us many more people died than reported but to avoid any further shame they underreported the number of deaths , this underreporting happened all over the world , easily 5-10 crore people perished in the pandemic and a lot many peoples general health was affected in the years

to come , but they suppressed all the data to avoid embarrassment . No real vaccine was found for covid , they just mixed antibiotic and corticosteroid and pain killer and put this combination into vials in liquid form and advertised it as covid vaccine , is all they did , they did not discover any real vaccine for covid . All vaccines are combinations of antibiotic and corticosteroid and other chemicals , they are just combinations of medicines we all take normally , they are not new discoveries , there is no real vaccine , they are all just combination of common medicines in different proportions .All antibiotics are essentially the same , only their brand names and dosages vary , the same old chemicals are sold under different brand names and doses with just a few minor chemical variations that don't really matter . America lost lakhs of people , which was a great shame because America keeps calling itself the world capital of research and innovation , to remove this shame they created fake medicines and vaccines and advertised them as solutions for covid , they just ran a big bogus show to cover up their shame and embarrassment .

All statistics - be it gdp or hdi or happiness index , they are all totally bogus and made up , none of their figures and conclusions are true , all these are totally bogus statistics , that's all , there is no truth in any of them . Finland is said to be the happiest country , but it has higher suicide rate

than India, Netherlands and United kingdom have higher happiness rating than India but they also have higher mental illness rates than India , Sweden and Switzerland also have higher suicide rate than India , if these countries have higher suicide rate or higher mental illness rate than India then how can they be happier countries than India , all these countries also have higher alcohol consumption rates than India then how can they be considered happier countries than India , how is pakistan higher than India on happiness when it has higher illegal drug abuse rate than India , all the above European countries are sure to have higher drug abuse rates than India , so how can they be considered as happier. How can repressive countries like Saudi Arabia and uae and Qatar and Oman and Kuwait and Bahrain be higher on human development than India , they got higher hdi just because the west needs them and they are allies of the west , they enforce everything very strictly in these countries compared to a country like India and yet they are considered to have higher hdi , even such tyrants have higher hdi than India , and most countries including European ones have higher incarceration rates than India , yet many of them have higher hdi than India , India is 208 on that list , uk and Sweden and Austria all have much higher incarceration rates than India , so how can any of these countries be considered to be developed countries , there are absolutely no developed countries in the world ,

all countries have lots of drawbacks and faults , there is not a single perfect country , there is not a single happy country , all countries have their own kind of horrors , in some loneliness is the biggest horror ,in some poverty is the biggest horror , there are no proper leaders anywhere in the world , there never were proper leaders anywhere , there never will be too , countries with just 20-30% or so college graduates cannot be considered developed countries , in a truly developed country there is no crime and no prisons , in a truly developed country everyone is happy and everybody is a college graduate and there is no consumption of alcohol and tobacco and drugs by it's populace , in a truly developed country there is no gun ownership and no poverty and no violence , but since no country on Earth meets all this criteria it can be safely concluded that no country is developed .

Today politicians increase prices of all items by 10% and as a result the gdp rises by 10% , and when this gdp rises they say the economy has grown , but in truth nothing has grown in the country except the prices and corruption , this is what they are all doing , increasing gdp by increasing prices of items and saying falsely that they developed the nation by showing higher growth figures , increasing prices is not development , showing higher gdp figures is not development , true development lies in decreasing prices and bogus figures like gdp are not needed at all . They

know Indians are crazy for gold , so they are endlessly increasing the price of gold , they know Indians are in transit always , so they are increasing the price of petroleum , all these increases are deliberate and planned , they are brought about solely for greed and personal agenda , they are increasing prices without any actual good reason , they just want to make more money and make the economy wheel spin faster and faster , so they are increasing prices deliberately faster and faster and higher and higher .
What these madcaps don't realise is - if the prices of items are increased more and more , then the money crunch experienced by people will get bigger and bigger , and with lesser money in their hands people will choose to have lesser number of kids because they cannot provide for many kids in this environment of high costs and expenditures , so the fertility rate declines , and if the fertility rate declines then the population in the next generation will decline , and decline in population will lead to lesser consumption of items , this leads to a stagnation in the economy , because of which the madcaps in power will increase prices even further to maintain their higher gdp figures , and this greater increase in prices will lead to greater strain and even lesser fertility rate and even more population decline and even lesser consumption and so on, it is such a negative cycle which they have created , they have created a circle that will only destroy everyone

ultimately , they are obsessed with increasing prices and showing higher gdp figures because higher gdp figures will impress the public more and the public will vote again for the same madcaps , what the public doesn't know is that their lives are getting ruined more and more day by day because of these madcaps obsession with useless figures like gdp , what we need is a positive cycle , where prices are fair and minimum , people buy what they need and live comfortably and have savings , they have several kids because they have more savings and prices are minimum and they can afford to have and support multiple babies , so population remains steady or increases mildly , consumption remains steady or increases mildly , so the society thrives and moves steadily always , this is a positive cycle , but instead of following this positive approach they are following the negative approach and ruining everything for temporary monetary benefits and political power , they are absolutely failing to see the big picture .

If the population falls , then the Hindu population will fall compared to the ever increasing Muslim population and we will only have more trouble on our hands , the Muslims seek to overrun the world by multiplying like insects and our politicians are suffocating us by increasing prices leading to reduced fertility rate and decreasing Hindu population , this is what is happening , our troubles are

going to grow and grow because of this negative cycle we have all been put into by those in power .
If the prices of items are increased up to a certain point then people will adjust their budget and try to buy these items somehow , but if the prices of items are increased beyond a certain point then people will stop buying these items and they will start looking for cheaper alternatives to these items and if no such alternatives are available then they will just stop using these items altogether . Now , those in power are trying desperately to increase the prices of items beyond the danger limit , they have a wrong idea that people will keep on buying these items no matter how high the prices get , but they will definitely see that people will stop buying these items and will give up these items completely leading to a collapse in the market for these items , what will the politicians do in the event of such a collapse ? They will have to reduce the prices greatly to bring back public interest in the items again or they can keep the items at same higher rates and completely kill the market for those items , so they are bringing themselves to this horrible situation where they have no good choice at all , they will face their bad destiny sooner or later . They are unnecessarily increasing the prices of food and meat , they are increasing the prices of everything necessary , they are even increasing the price of paper , they are everything in the wrongest way possible for immediate profits , they are not seeing the

long view at all , and this mistake is what will lead to their downfall soon .

All movies are trash .
All tv serials are trash .
All music is trash .
All actors are trash .
Almost all the people in the world are trash .
All dance is trash .
All performance art is trash .
All performances are trash .
All of this is utter trash and nothing else.

A moment of self glorification :
The reason for giving so many awards to myself for writing my previous book is simple - it is to show that all awards are trash , they don't matter at all , all awards and prizes one gives to oneself are trash , all awards and prizes others give to one are trash , they don't matter at all , all those so called glorious awards and prizes and mementos and great reviews and great praise absolutely don't matter at all , they are all trash .
The gods never give awards and prizes and trophies and medals and mementos and certificates and great reviews and praise , the gods never engage in such stupid things , they don't engage in such boring and useless things .
I praised and awarded myself profusely to show precisely

that all these awards and praise are rubbish and don't matter at all , are not needed for life at all .

I could give myself rubbish awards like:

1. ‘ most realised human on Earth ‘ award - given by the gods themselves .
2. 'most genuine human on Earth ‘ award - given by the gods themselves .
3. 'most devoted human on Earth ‘ award - given by the gods themselves .
4. 'most pure human on Earth ‘ award - given by the gods themselves .
5. 'most honest human on Earth ‘ award - given by the gods themselves .
6. 'most wonderful human on Earth ‘ award - given by the gods themselves .
7. 'the human being of the year ‘ award - given by the gods.
8. 'the human being of the decade ‘ award - given by the gods .
9. 'the human being of the 21st century’ award - given by the gods .
10. 'the human being of the 2000s ‘ award - given by the gods .
11. 'the most distinguished human on Earth ‘ award - given by the gods .
12. 'the greatest intellect of the 21st century ‘ award - given by the gods .
13. 'the greatest thinker of the 21st century ‘ award - given by the gods .

14. 'the greatest genius of the 21st century ‘ award - given by the gods .
15. 'the greatest tourist ‘ award - given by the gods.
16. 'the greatest enjoyer of the 21st century ‘ award - given by the gods .
17. 'the greatest student on Earth ‘ award - given by the gods .
18. ‘gods greatest student ‘ award - given by the gods .
19. 'the greatest searcher of our times ‘ award - given by the gods .
20. 'the greatest seeker of truth ‘ award - given by the gods .
21. ‘ icon of truth and honesty ‘ award - given by the gods .
22. 'the greatest realist ‘ award - given by the gods .
23. ‘ the most affectionate person ‘ award - given by the gods .
24. ‘ the most righteous human being ‘ award - given by the gods .
25. ‘ the most honourable human being ‘ award - given by the gods .
26. ‘ the greatest respector of women ‘ award - given by the gods .
27. ‘ the greatest fighter for women ‘ award - given by the gods .
28. ‘ the greatest male ‘ award - given by the gods .
29. 'the greatest liver ‘ award - given by the gods .
30. 'the most affectionate and caring child ‘ award - given by the gods .

31. ‘ the one who is carrying the burden of the universe’ award - given by the gods .
32. 'the symbol of truth ‘ award - given by the gods .
33. 'the greatest speaker of truth ‘ award - given by the gods .
34. ‘ the greatest man of action ‘ award - given by the gods .
35. ‘ the kindest human being of all time ‘ award - given by the gods .

The gods never give such useless awards , such awards are absolutely not needed at all , they are all useless and boring and not needed at all . I don't want any of these useless things , I seek to be free from them all .

Getting such useless awards , going to unwanted felicitation ceremonies , being the chief guest at various public events , people putting a shawl over my shoulder and giving me flower bouquets and showering flowers on me and asking me to give a speech on the stage , none of this nonsense is needed , I don't need any of this garbage , and many people come on stage and speak in praise of me and try to flatter me , none of this rubbish is needed for life , I need peace and happiness , I don't need any such useless rubbish . Seeing all this glorification of me , my parents become emotional and come on stage to hug me and say a few words in praise of me just like I talked greatly about them , everybody cries and everybody hugs each other , none of this is needed, I want to be free from it all .

They say religion is a drug for the masses , but movies and music and politics are even bigger drugs , are even more harmful drugs , movies have corrupted people to such an extent that people have started aping everything they do in the movies , the movies have poisoned society so much and ruined people's minds so much , the movies show abnormal actions in a normalized way and they keep showing these abnormal actions endlessly and at some point people start doing these abnormal activities themselves and become more abnormal themselves . For example , in the 60s 70s and 80s movies they used to show couples going to a park to dance and spent time in private and enjoy , but such a thing never really happened back then , nobody really went to a park to romance and dance back then , nobody went to a beach to romance and dance back then , but today you go to a beach and you see couples kissing and doing all kinds of things in the dark , you go to park and you see couples hiding in the bushes and romancing , this is all the effect of movies , they brainwashed people into following such ugly things , propel never follow any good things they show in the movies or on tv , but they are sure to follow any bad things they are shown on movies and TV because they think it is fun to do all these bad things , they think they are rebelling against society by doing all these bad things , is how it has all become , people today are murdering each other like they show in the movies , people today are driving recklessly like the show in the movies , people today are

engaging in ugly relationships like they show in the movies , people are all actively mimicking every single thing they show in the movies , is how it has all become , it has all become so rotten and horrible , in the movies they show bars and drinking scenes all the time to brainshwash people into believing these things are fun , and people are engaging in these things more and more , so the movies are an effective drug to brainshwash and mislead people , they are a far more potent and dangerous drug than religion , the movies have ruined society in all ways possible . Music gives people a sense of euphoria which is totally false , it deviated people from reality , makes people feel that life is flowy flowy live a gentle river or breeze and puts people in an illusion , music is another drug too , it either makes people go into a frenzy or makes them go into euphoria , it is another nasty drug just like the movies , it makes brainless people let loose in public and dance shamelessly in front of everybody else , they dance shamelessly on the street or on stage or in functions and elsewhere too , music also ruins society , they created unnecessary functions like Sangeet in marriages just to dance in ugly ways and act stupidly , they all think they are being free and happy and wild , but they don't know how stupid and ugly their activity is . People want to stay in this sense of euphoria always , they think wrongly that this euphoria is bliss , but it is not , euphoria is never bliss , euphoria is an unnecessary feeling , being real and normal is the best feeling , being real and normal is the way to happiness and a proper life , euphoria lasts only for a

while and after it gone one is left only with boredom , the more euphoria one experiences the more boredom one experiences later on , one cannot live in a state of euphoria forever , that is not heaven , that is not bliss , that is not the ultimate state , that is not the ultimate goal , euphoria is nothing but an unnecessary state , it is somewhat like an illusion , not real at all , it only makes one unhappy ultimately , so music is also a giver of euphoria , it is also a potent and destructive drug . And politics is no less a potent drug , it is also extremely potent and extremely destructive , it has destroyed the world completely .

Today people write books with many goals , they want the book to get the attention of the nationalist party in the country , the nationalist party takes notice of their work and is impressed by their work , the party leaders call the author for a meeting , the author joins the party , and if the author is lucky enough he or she gets a seat in some election and they win it to become an mla or an mp , they reap the benefits of their position and make lots of money and gain lots of publicity too , the govt recommends their name for many awards and these authors win these win awards , ultimately their life is set . This is their aim , be it an author or movie director or actor or anybody else , all of them have this same aim , to enter into that sewage called politics and earn lots of money and publicity somehow , all of them have these hidden motives today , all of them want to please the nationalist party and gain

many benefits by pleasing those in power , all have become chamchas , the journalists have become chamchas , the actors and filmmakers have become chamchas , the writers and musicians have become chamchas , everybody has become a flatterer in order to survive and thrive , nobody has any shame anymore , when it comes to dignity or money people have chosen money , when it comes to surviving through dignity or thriving through shamelessness people have chosen thriving through shamelessness .this is the tragedy of life today .

There are some people who , on one hand they want to thrive by cheating , and on the other hand they want to act good too , they follow such a path of performance , they act like good people and complain about the system and criticise the system and gain a name as intellectuals or thinkers , but in private they engage in all sorts of wrong activities , there are no real intellectuals in the world today , there never were any real intellectuals in the world in the past too , and there won't be any real intellectuals in the future too , those who call themselves intellectuals are just stupids and total frauds , they know nothing absolutely , they are just pretenders and nothing else , they will act like do-gooders for society and will always talk about how to make society and people's lives better but in private they won't like society or people and will engage in all wrong activities themselves , they want money and fame just like everybody else , but their approach to get it is different from the politicians , that is all the difference , their needs

are the same , they want money fame and power but their way of trying to attain these things is different , that's all , they are all the same trash, intellectuals politicians scientists businesspeople , they are all the same trash , only their mode of action varies , thats all . People are all scamsters , frauds , criminals , cheats , robbers , perverts , they are all the same trash , but their mode of action varies , each has their own style of doing wrong things , their style of performance varies , but the end result is always the same , they are all greedy and self obsessed and possessing a very bad nature .

In marriages , why keep unnecessary functions like reception and mehendi and Sangeet and drinks party and bachelor party and bachelorette party and so on , all of these are absolute trash and absolutely unnecessary , that is definite , in a marriage only two events are important , one is engagement ceremony and the other is muhurtham ceremony , both events can be simple and solemn and beautiful , that is enough , grand and gaudy is absolutely not needed at all , music performances and other performances are absolutely not needed in marriages , noise is absolutely not needed in marriages , and noise torture like chenda melam are absolutely not needed anywhere on Earth , things have to be graceful and beautiful and simple , one need to engage in inviting competitions , ‘ he invited 5000 people to his child's marriage , so I will invite 20000 people to my child's marriage , or even better , I will book an entire cricket

stadium and invite 50000 people and organise the entire marriage in that stadium ‘ , such sick nonsense is absolutely not needed , such psychotic madness is absolutely not needed , so ultimately one two events are needed in marriage - engagement and muhurtham , that's all , absolutely no other event is needed in a marriage , that is definite . And women's obsession with buying more and more expensive plastic sarees in the name of silk sarees must stop , ‘ she wore a 1 lakh saree for her wedding , so I will wear a 5 lakh designer saree for my wedding ‘ , such sick thinking must stop , people need to use brains atleast once in a while , they need to be good atleast one in a while , they can't be so bad and evil all the time , it is so sick a sight .

And kurtas and sherwanis , these are all essentially Muslim costumes , why are Hindus wearing Muslim costumes so much , why are Hindus obsessed with Muslim costumes , why do they need to wear these ugly Muslim costumes , why have people completely lost their minds . And why are South Indian women wearing ugly costumes like lehengas , that is not their culture , so why are they wearing it . Why are Hindus keeping surnames like ‘ shah ‘ which is a totally Muslim name , shah is a Muslim name , so why is a Hindu keeping a name called shah . You say you are a hindutva follower but you keep names like shah and you wear kurtas and sherwanis like Muslims , so what kind of a sham performance are you giving here . If you are real Hindu , then stop wearing ugly

costumes like coats and suits and blazers , stop sending your children to the West for their education , stop speaking English in a western accent , stop pretending like you were born in Oxford or Cambridge , acknowledge your normal Indian roots and stay rooted to your culture , stop engaging in stupid things like organising destination weddings and organising weddings in foreign countries wherein all the guests fly to some foreign country and marry in a cruise or Italian Villa or English country house or French chateau or 5 star resort , if you are a real Hindu then you will never engage in any of these sickly things , only those who are fake Hindus will engage in such extravagance and still shamelessly call themselves Hindu , they want to dress like britishers and still call themselves Hindu , they are making a mockery of Hinduism just like I made a mockery of awards and prizes .

When I was younger I used to think of fellow Indians as ‘ my people ‘ , I used to refer to them as ‘ our people ‘ , I still say ‘ our people ‘ many a times due to habit , some old habits are hard to remove , but having seen them for so many years I don't think of them as my people anymore , having experienced all the hurt they have given me I cant think of them as my people anymore , I have no feeling for them anymore , that is the reality , they have been wrong and bad in so many things , it's impossible to ignore it all and forgive them , it's impossible to reconcile with them anymore , I came to an understanding long ago that they are different and I am different , that is all , that is the clear

truth , I cannot be as wretched as them ,they cannot be like me too , I don't see such things like class , so I can't say I am a higher class person than them , that is not true , I am on the same level as them but they are totally bad whereas I happen to be good though flawed , they act like perfect people but commit all mistakes whereas I am imperfect and I don't act like a good person but I have genuine goodness in me , I don't feel like goodness to them anymore , I don't feel like being bad to them too , I just feel like staying away from them and ignoring them because I absolutely don't care about them anymore , they could say ‘ if you don't care about us , then why don't you go and live in some other country , why don't you like the people there , we don't need you here ‘ , they will say such stupid things , but I tell them ‘ I was born in this land , and will live my entire life in this land , because it is land of the gods , it is the land of my gods , my people , and I have the right to be here because nobody believes in them as much as I do ‘ , that is my answer, besides I also say ‘ also
, not just Indians , people everywhere are bad and totally wrong , so I don't like them too and I don't have any feeling for them too just like I don't have any feeling anymore for fellow Indians ‘ , that is the remaining part of my reason , so that is it .

If not for the temples and the gods and the culture the gods gave us , there would be nothing here in India , it would be just another empty place without the gods , india

is India because it is the land of the gods , without the gods india would be just another empty place like the rest of the world , like America or Europe or China, it would be just another empty place without the gods , the gods give life to India, and Indians are trying endlessly to kill this life and make India another westernised empty place .
Without the gods and their culture there would be nothing in India for a person like me , there would be nothing anywhere for a person like me without the gods and their culture , they give life to this land , they give meaning to this land , they give beauty to this land , they only expect us to preserve everything they gave , but instead the bad people here try to destroy everything they gave , these bad people don't know that the gods are responsible for running India and keeping India stable despite all the bad people's endless efforts to destroy everything , it is the Divine energy that is saving us all despite our endless destructive mistakes , the gods are tolerating our endless wrongdoings and still trying to do us good in the hope that we will try to understand them and learn about them and attain realisation , but we are disappointing them endlessly
, still they are tolerating our sickness and still giving us every possible good they can , they have given evil criminals big houses and big cars and lots of money in the hope that these criminals get satisfied and realise their wrong ways and change for the better , but these criminals are not realising and are only committing even greater crimes because they have become empowered

with more money and power , however those who misuse the goodness of the gods and fail to change for the better will ultimately become the biggest failures , they will fail , their family will fail , their children and Grandchildren will suffer , they will lose their wealth and power and glory and come crashing down to earth again , that will be their ultimate destiny and they will never escape this , they who refuse to change will fall down hard and become finished forever , that's all , that is their absolute destiny.

One can show a lot of antics and hold people's attention for only a certain amount of time , beyond which people will get bored of their antics and will move on to another person who will show a different variety of antics , is how it is . Let us take the lead dancer of the music group Boney M , Bobby Farrell , he is best stage performer there ever was , there never will be another energetic and original stage performer like him , he never became a sensation in the USA because the Americans won't recognise a foreigner as the best performer , the Americans will only recognise an American as the best performer because they are absolutely biased always , so a performer like Bobby Farrell never got the due recognition he deserved because he was not born in America or England , so he got automatically rejected despite being the best . Anyway , people in many countries saw and enjoyed Farrell's antics for about 10 years after which they got bored and started looking at other people's antics , those other people's antics were not as good as Farrell's but people

flocked to see these inferior antics in large numbers because people keep constantly wanting some new entertainment and new excitement , they are not satisfied with the same old excitement because they get bored of it after a while , so they move on to newer excitements despite these newer excitements being inferior to their predecessors , this is how people are , they forget even what is good and move on to lower things because they want newer things , they don't care about the lower quality of these newer things , they just want newer things , that's all , is the mindset of people .so antics can hold people's attention for long , especially in this smartphone age where endless videos are available showing people engaging in endless varieties of antics just for popularity and fame , so no antics grab attention for long in this very fastly moving times , one day there is a viral sensation, and the very next day that sensation is forgotten because a new viral sensation came on that day and caught everybody's attention , so no sensation lasts for more than a day these days , everything is forgotten the very next day itself .

I cannot make a girl fall in love with me , this is because I am a good boy and good boys have no market these days , girls love only those boys who are sure to cheat them and fool them , girls mantra these days is ‘ the worse the boy is , the better ‘ , they are easily attracted to the worst boys and fall for these worst boys and someday they get terribly fooled by these boys who ditch them and leave

them for others , is how sick things have become today , girls don't like good things these days , they are attracted only to wrong things and to wrong people , they like perverts because they want wildness and excitement , they don't like good boys because they wrongly think that good boys lack wildness and excitement , now I am a good boy , and after reading this book nobody can say I am a soft and gentle person , I can be Wilder than the wildest animals out there and I can be more exciting that anybody else out there because I am lively and I have an active mind and I am not subjecting my body to depressants like alcohol and smoke and drugs , so I am heathy and virile too , but I don't show all these sides of me in public because there is a proper way in which one has to be in public , you should maintain proper behaviour and decency in public always , that is most important , in private you can be free and enjoy in every good way possible , that is what I feel , which is why I don't go around flaunting my wildness and virility in public , I know that flaunting my virility in public will only make me less virile in private , flaunting my wildness in public will only make me depressed and tired and weak in private , one cannot be wild and virile all the time , one would dieof exhaustion if one were in a hyperactive state always , so basically there is a place to be proper and there is a place to be free and wild , public is the best place to be proper and private is the best place to be free and wild , is what is right , so since I am proper in public girls think wrongly that I am a soft and weak person with no wildness or excitement in me , I can't go around advertising to

everyone that I am wild and exciting within and they can love me without doubt , I can't do such shameless things , I can't put a large cut out banner on the main road saying ‘ I am proper in public , but wild in private , take me if you want , my number is xxxxxxx ‘ , we are not living in a movie to do such things , this is real life and we have to maintain proper decorum here , so it is up to stupid girls to understand how a boy is within and not judge him wrongly based on how he is in public , everybody has a public face and a private face , nobody is the same both in public and in private , people all behave in a certain manner in public and they behave in a certain manner in private , so stupid girls must understand this , they must know that those who act wild and virile in public are the most boring and lifeless people in private , they must know that those who are the most talkative and jovial in public are the ones who have nothing to talk in private , they must stop falling for the immediate glamour and fun and outside glitz and show , those who fall for this will only get emptiness and boredom ultimately , our forefathers were conservative people on the outside but they gave birth to 5-10 children or even more , they were virile and wild in private even though they were conservative in public , so if one is conservative in public it simply doesn't mean that he is soft and weak in private , stupid girls must know this , they readily fall for the outer glamor and glitz these days , they fail to see the inner substance , that is their problem . These days , stupid girls choose a wrong boy , they do all sorts of wrong things with that boy in private , and someday that boy

dumps them and releases that girls private photos and videos on porn websites or elsewhere , this is what is happening all around , they are foolishly trusting the wrong boys and ruining their lives in the process , that is the modern trend , girls are desperate to ruin their lives today , they just can't keep quiet and calm , they just can't stay
still , they just can't do what is right, they are constantly trying to do something wrong and damage themselves , that is how they have become today , a good boy can never make a girl fall in love with him today , no matter how much he tried that girl will only make fun of him and play games with him and ultimately reject him , but that girl won't be happy for long either , she will choose some wrong boy and then experience hell and ruin herself , that is her destiny , it is what she wants , it is what she chose , so she will get it definitely.

If a thing called marriage did not exist , then a good boy like me would never get the company of a girl , a good boy like me will never get a female companion then , is how the world is, thank the gods that a thing called marriage exists , without it good people like me would have remained bachelors for life , because I can't become a bad person in order to attract girls , I cannot play the games girls expect boys to play these days , I cannot be their puppet and dummy , i cannot act and be artificial , I am a
real person , I have real feelings , I have real thoughts , I cannot play any of the ugly games they play these days ,

which is why I could never get a girl to love me , I could be really romantic , I could be really affectionate and caring and loving , but who wants these things today , girls want lots of money and lots of fun these days ,they don't want romance and affection and care and love , they just want fakery and acting , so a person like me has no market today , a genuine romantic like me has no market today , I am a real lover , an old school lover , but I have no market today , only fake lovers and cheaters and scamsters and criminals and actors and frauds have a market today , that is the reality of today's world . Even if a girl wants a good person the bad friends she has will mislead her and make her select the wrong person and make her ruin her life , is how it is , she will have a bunch of friends who will always mislead her and make sure she is never happy in her life , people are like that these days , a good friend who will give proper and best advice is impossible to find , they will all mislead you and ruin you with their endless wrong advice .

If it rains heavily for a few days continuously , then any city in the world will get flooded badly , not just Indian cities but all cities in the world will get flooded badly if it rains heavily for a few days continuously , so no man made systems are perfect here , it is all flawed , it all has its limitations .
So nobody is a genius in public planning here , they are all stupids , they are mostly lucky that their stupidity is not exposed by nature . But one day nature wrecks everything

and everybody's stupidity and limitations become exposed then .

When I was young , kids used to play on the streets , but not anymore , they all stay in their homes watching TV or smartphones and eating like pigs and becoming obese and unhealthy , kids don't play anymore , they just stay at home torturing their parents and becoming fat and obese , this must change , though it never will .

People have absolutely no sense and sensibility today . Give a person 1 crore rupees and this is what they will do - they will buy a big car for 60lakhs , they will buy a watch for a few lakhs , they will go to expensive hotels and drink the costliest alcohol , they will go to resorts and party hard , they will buy all kinds of expensive things even though these things are low quality and won't last long , they will put money in the stock market and lose that money , or they will invest in some fraudulent company and lose that money , they will give money to the most untrustworthy people and lose that money , and in just a year or two they will spent the entire 1 crore and they will shamelessly ask for more , this is how people are today , they will waste money endlessly on the wrongest things possible , they are so stupid that they won't save any money , they will blow it all on useless things , people have become so frivolous and reckless today , they don't know the value of money anymore, they are getting it somehow and they don't know the value of it and they are wasting it all

eendlessly , such stupid people don't deserve money at all , they don't deserve anything at all , they don't deserve to live at all , these stupids . Rather than investing that money in some land or saving it in a bank they are recklessly wasting it on all sorts of wrong endeavours, is how people have become today , they are all acting recklessly like billionaires , even those who have nothing are acting recklessly like billionaires ,they are not saving at all , they are just wasting and wasting on unnecessary things endlessly .

A person commits a crime , but since that person has deep connections to the ruling party the court case against that person drags on for 30-40 years or even more , by that time the person dies and escapes from going to prison , after the person dies the court gives the verdict that the deceased person is guilty , everybody including the court knew that the person was guilty for 30-40 years , but since the person was powerful and had powerful connections the court did not give a verdict for so long , this happens a lot in India , such wrong things happen all over the world too , there are so many such never ending cases in India , everybody including little children and animals know that a particular person is guilty in that case but the courts deliberately stretch it and stretch it for as long as that person lives , is how things happen here , sometimes that person goes to jail on a small picnic now and then , that person goes to jail for 1 month or 1 week and leads a royal life in jail and then

comes out fresh , all of this is eyewash , but that person will get a long sentence for their crimes because politicians and rich people get utmost protection in India , not just in India but all over the world too , no matter what crimes they commit they get utmost protection by the law because they have the money and the power in their hands .

****

Story 1 :

The hero is born in a city in South India.

He is raised affectionately by his parents and he loves his parents a lot .

But he can't stand to see the pain his parents face at the hands of other people in a corrupt and dishonest society. No matter how good his parents are they still face a lot of obstacles and struggles and the hero can't bear to see this.

So he starts learning the truth about everything and he attains realisation , and along with realisation he attains superpowers too , the gods give him many many powers because he is a realized person now .

After he gets his superpowers , he creates a hundred acre farm house with a big comfortable and beautiful house in the middle , he produced electricity and water and food and all items with his own super power , so he and his family don't rely on the govt for anything , they live off grid peacefully and happily in their own paradise , he takes his parents to temples in an instant with his powers and they

visit all temples peacefully,sometimes after the temples close at night and everything is quiet and empty he takes his parents to the temples at the middle of the night and they see the gods peacefully as much as they like and enjoy their time in the temple , he does all this with his superpowers , he doesn't need money at all because he can produce everything with his super powers and therefore he has nothing to buy , with his powers he can produce clothes and food and furniture and kitchen items and electronic items and everything else , he could even use his superpowers to produce endless cartloads of money , so he lives a happy and peaceful life with his family in their farmhouse , and nobody can question him or his family because he blocks everybody from thinking about his home and family using his powers .

Now , he could have used his powers to correct society and make everything right in society , but he doesn't do so because he doesn't want to , he feels that it is upto people to decide to change for the better and make everything proper and that good things and goodness cannot be forced upon them , if they are forcibly changed for the good then they will just act good on the outside while harboring hatred on the inside and will always keep waiting for the time when they can display this hatred outside and destroy the good people , he knows all this , so he doesn't try to make society good and better , he doesn't care for society , he sees people fighting and killing each other but he doesn't stop them , he sees

ppeople drinking and robbing and ruining themselves in every possible way but he doesn't stop them , he is just a passive observer , he doesn't even observe most of the time , he just lives happily with his family , that's all , he doesn't care about money or economy or philosophy or sociology or anthropology or fake history or politics or religion or science or psychology or law or public administration or literature or business or economics or anything else , he stays far away from all these things because he absolutely doesn't need any of these things , he is living happily in his farmhouse with a beautiful bright house surrounded by trees and woods , he is all powerful and therefore has no need for the outside world or its many complications , he doesn't need servants or labourers , he and his family are not dependant on anybody for anything , they are fully free and enjoying life , they are the enjoyers , they are cut off from the outside world , they just visit temples and other places where the gods are present , they visit places with natural beauty , they stay from ugly traffic and ugly crowds and other nonsense , they lead a beautiful life .

So in this case , the hero and his family are totally self sufficient and happy and living wonderfully , they have absolutely no need for society , they have absolutely no care for society , they have absolutely no need for things like economy and philosophy and organised religion and psychology and anthropology and fake history and politics and literature and public administration and government

and money and sociology and business and economics , they absolutely don't like any of these things , they absolutely don't want any of these things , so they stay away from all these things , they have absolutely rejected all these things and dumped all these things in the dustbin, is how they are , they have completely rejected society and all the useless things in it , they live in their own world surrounded by their gods , that's all they care about , they live happily on Earth and then go to their gods in Home , while on Earth they are healthy and strong always , so they enjoy life here on Earth .

With their power and money , they could enter politics and buy their way to the top , or they could build all industries in an instant at no cost at all and make absolute profit , or they could buy all the awards out there , or they could give endless money to charity and position themselves as the greatest people on Earth , but they won't do any such useless things because they know society and people are bitten totally rotten and will never become good , therefore they don't engage in such unnecessary performances , they have rejected people and society , they stay away from people and society , that's all .

Also , they have no patriotism or nationalism in them , they don't care for nationality and national identity , they don't consider themselves as Indian , is how the hero and his family are . They know that the entire Earth belongs to their gods and therefore as children of the gods they have right over the entire Earth and not just India , the entire Earth is theirs and not just India , so they don't care for

nnational identity and nationalism and patriotism and nationality , they don't care for these things , they absolutely don't like these things , they absolutely don't like the idea of nations and nationality and borders , they stay far away from these things , they absolutely don't care for these things , which is why they will never participate in these things or be a part of these things .

They chose a 100 acre farm not because of their obsession with land ownership but because they want to maintain a distance from society and the outside world , they want to stay away from the outside noise and chaos and live in their own small paradise . They don't live a luxurious life , they live a simple and beautiful life .

This is their story .

We can learn from this story that many of the things we give importance to are not really important at all , they don't really matter at all , only we wrongly think that they matter a lot and give unnecessary unwanted importance to them .

****

Just like the character in the above story , I have come to a conclusion - I also don't place any importance on nation and nationality and patriotism and national identity , to me an Indian means a Hindu , so ‘ thoughts of an Indian ‘ essentially means ‘ thoughts of a Hindu ‘ to me , ‘ ideas of an Indian ‘ means ‘ ideas of a Hindu ‘ to me , the entire world belongs to my gods ,I have rights over the entire world and not just the land called India , the entire world is

mmy place even though the bad people have restricted me to just a portion of land called India, they might restrict and bind me physically , but within me I shall not confirm to such unnecessary boundaries , the entire world is mine ,

the entire world is my place , I shall call the entire world as Indu , the place of brightness and realisation , it shall not be called Earth anymore , it shall be called Indu .

Now let me tell the story of Indu :

Indu :

The introduction :

Indu is not a work of fiction . It is the reality of the world we live in , it is the story of the world we live in .

Indu means bright , full of life , realized .

Hindu is derived from Indu . A Hindu is a person who is bright , full of life and realized .

Hinduism is the way of thinking and the way of living of the bright and realized people .

Hindustan is the land of the Hindus , the land of the bright people , the land of the realized people who are full of life .

India is derived from India , India is the land of the bright and the realized .

Indus is derived from Indu , it is the bright river .

This book is about Indu , the original faith , the original way of thinking , the original way of living .

Indu , Induism , Industan - these are all the same as Hindu , Hinduism , Hindustan , but Indu is more pure and perfect than Hindu , Induism is more pure and perfect than Hinduism , Industan is more pure and perfect than Hindustan .

Story 2 : Indu .

The origin of Indu .

The beginning of the age : The creation of a world :

The gods live in Home , which we normally call heaven , to them it is just illu or intu , both words meaning home in Telugu .

The gods talk in Telugu , Telugu is the language the gods talk in always , Telugu is the language of the gods , the Divine language , the most beautiful language , the

version of Telugu the gods speak is purer and more beautiful than the version we speak on Earth .

There are 5 gods . They have 200 crore children .

The gods and their children are all eternal beings , they are beings who were always there , who will always be there forever , they have no beginning , no end .

The gods and their children are perfect beings , they are absolutely beautiful and pure and perfect , they are flawless beings .

One day , the gods said to their children - ‘ we are going to create a game , a challenge , we will create a new world , that world will be called Indu , we will select a few among you and send you to that world , in that world we will give you many many obstacles , you will have to surmount all those obstacles and barriers and keep your faith in us intact and attain realisation , that must be your aim and goal , and once you have attained this goal of realization everything in that world will be dissolved and you will return to Home again , you will stay there till you attain realisation , so this is the basic idea of the game ‘ .

All their children were excited and wanted to play this game , but the gods selected only 20 among them all for the game .

The gods said to the 20 children they selected - ‘ you are all adults now , but you won't go to the new world Indu as adults , you will be born as children there , you will grow up and become adults , you will face many obstacles , you will surmount all those obstacles and try to attain truth and real knowledge and realisation , and once you have done so you will come back to us .’

‘ also , once you are born there you will have absolutely no memory of Home and us , you will have no memory of your pure and perfect form here , you will have no powers like you have here , you will be born there as an ordinary human being with a very ordinary powerless body and with absolutely no knowledge of anything , you will be born there as a totally ignorant person and you will have to learn your way to realisation , you will have to surmount all obstacles to learning and keep on learning and searching for the truth and you will ultimately attain knowledge and truth and realisation one day , you must keep your faith in us intact and never give up on your faith in us , that is most important , if you lose your faith in us then you will become even more ignorant and suffer even more , you won't remember all these things we are telling you now , but we are saying it all to you now because we want you to get an idea of how the game is going to be ‘

‘ once you start learning in that world , we will be giving you subtle hints every now and then to help you take your

learning forward , we will give you important clues every now and then , ignoring them and failing to see them will only prolong your learning , so watch everything keenly , listen to everything keenly , try to learn about everything as much you can , you will definitely attain your goal and succeed in the game ‘

‘ in this world of Indu , you 20 will not be the only people there , we will create crores and crores of bad people , we will create crores and crores of animals , these bad people and animals will all look real and feel real , but in truth they are all illusions created by us , we will be running these illusions fully , these illusory bad people will constantly keep trying to put you off from your path of learning and they will constantly try to make you more ignorant and keep you more ignorant always , they are the biggest obstacle you must surmount , they will constantly try to mislead you and hurt you and lead you to more ignorance , you have to resist all their attempts to influence you and continue steadfast on your path to learning and realization’

‘ so you remember one thing , the world we are going to send you to is an illusory world , we will be running the entire show there , we will be creating new characters , we will be creating new situations , we will be creating new things , we will constantly keep testing you and presenting you with continuous barriers and challenges , you will feel

confused and lost many a times but if you keep your faith intact and steadfast then you will definitely triumph ‘

‘ the more ignorant you are , the more illusions will be created , the more illusory people will be created , and all these illusions will only disturb you more and make you more miserable , so living in illusions is never a good option , you have to come out of it all to become better and happier , and the only way to do this is by engaging in constant learning , by living in illusions you are only making the illusions bigger and stronger and greater , you are doing no good to yourself by living in illusions , you will only be hurting yourself and those around you . The more you learn the more weakened these illusions will become until they ultimately get destroyed and you triumph over them , so never become fixed in illusions , keep constantly learning and searching , we will keep on giving you clues and other important points , keep on learning constantly and passionately , you will get what you are looking for definitely ‘

‘ so we will create many illusory people and animals on Earth , we will create an agricultural and rural society , we will create all of this in an instant , we will call it year 1, we will create many temples to instill the faith in you and we will create many Divine stories and scriptures to give you clues and help you learn , we will create many new things which you may need for your learning , you will speak an

imperfect form of Telugu there , you will be born an indu in a land of indus , you will be male or female , be will be a Telugu indu person , you will be born in a respectable family , you will be a non vegetarian , you will get ample opportunities to learn , so learn and win the game ‘ .

The 20 children listened attentively to all this . They were excited to play the game .

The gods created an entire universe inside their bodies and these 20 children disappeared from Home and entered the universe located in the gods bodies , the 20 children lost their pure and superhuman form and entered Indu as children , they would be born in the wombs of humans as ordinary children and start their role in the game created by the gods .

This Indu is the planet we today call as Earth . Indu and Earth are both the same place , only the name has been changed by the illusory people here , the illusory people have changed the year too , year 1 has become year 1900 , year 125 has become year 2025 , the ignorance in which the children of the gods become drowned in has led to the illusions become stronger and greater in every way , this has led to the creation of fake histories and lies everywhere in everything , the children of God slipped deeper and deeper into ignorance and greater ignorance produced greater and stronger illusions which only

disturbed the children of God even more and made their life even more difficult .

One point to note is - the 20 children of God are not all born on Earth at the same time , one is born in 1900 at the beginning of the game , one is born in 1930 , one is born in 1960 and so on , they are born at different times , they are not all born at the same time , they enter the game at different points , one is born as a child of an other , one is married to another and they birth to one who is a child of God just like them , it goes like this.

In this game , the gods create and destroy buildings at will , they create and destroy things at all , there is an empty piece of ground and in just an instant they create a skyscraper in that ground , creating it all takes them just an instant .

The illusory people have no life in them because they are just illusions , they have no thinking capacity or acting capacity of their own , they are just bad characters run by the gods to test their children . If the children of the gods become more ignorant , then more illusory people are created , and these illusory people become stronger and more empowered , and they try to harm the children of the gods more . If the children become less ignorant and attain more knowledge , then the illusory people become weaker , their population decreases , their capacity to cause harm decreases too .

These illusions come to life when the children of the gods are near them , and these illusions disappear and don't exist when the children of the gods are away from them , so these illusory people are not there always , they are there only when the gods children are in their vicinity , when the gods children depart these illusory people disappear and cease to exist , this is because they are just illusions . So the entire world of Indu is an illusory world created by the gods to test their children , nothing is definite in this world , nothing is absolutely true in this world , it is all an illusion .

There is a vast area of land filled with trees and forests and greenery , but when the gods children visit this area it is converted into a mega city with skyscrapers , it is all an illusion , or it is converted into a desert with nothing but mud or a desert with nothing but snow , these are all illusions too , this entire world we live in is full of illusions that it is impossible to separate reality to illusion , illusions are most lifelike too just like reality and so it is impossible for an ignorant person to say which is reality and which is illusion. The children of the gods fight their way out of all this illusion and ultimately attain realisation and reach their Home again .

In reality , in this world of Indu , only 20 people are real people with real life in them , the rest are illusions with no real life in them , these illusions act accordingly depending

on the state of ignorance of gods children , the gods run these illusions accordingly , it is all a test , all a game , nothing else .

When the first gods child is born here on Indu , he will be fascinated by this world and will seek to know everything about it , he will encounter both truth and illusion in his path , he will be swayed by both , his attraction to the truth will teach him good things on one hand , his attraction to illusion will create more illusory people around him and will create illusory villages and towns and cities around him and these illusions will try to draw him deeper into them and make him more ignorant , even though he is good on one hand he will also fall deeper and deeper into illusion on the other hand and this ignorance of his will give rise to billions of illusory characters and endless illusory places and homes and other things , he will be mistaken into believing that all the illusions he sees are real and he will want to experience more and more illusions because he wants to see the entire range of illusions , this ignorance of his will create the modern world that we see today with all its complexities , a simple rural world that he was born in will be converted into a modern chaotic urban world with all sorts of bad things solely because of his ignorance and his need for more experiences and entertainments and excitements , he is mistaken into believing that illusion is knowledge and he will fall deeper and deeper into ignorance . As a result of this ignorance , he and his subsequent generations will go through a lot of difficulties ,

they will always remain good but still they will face a lot of difficulties , and they will find it tough to understand why they are facing so many hardships despite being good , they don't know that it is because of their deeply embedded ignorance that they are facing these hardships , by the 3rd and 4th generations they start trying to actively learn about everything and make sense of the world they are living in , and if they keep on trying then they will definitely attain real knowledge and realization' in the 3rd or 4th generation itself , and once they attain realisation they will bring about the downfall of all the illusions that are prevalent and the game will end .

Why use words like Induism and Industan and Indus and India and Indology , why not call it all just Indu ,
I am an Indu .
My way of thinking is Indu , my system of thought is Indu , my way of living is Indu .
I live in this planet called Indu . I
live in this country called Indu .
The Indu river flows near this country , it once used to be a part of this country .
So it is all Indu .
That is the higher truth , the purer truth .
The study of Indu is called Indu .
The language I speak , it's real name is not Telugu , its real name is Indu .
So I live in Indu , I breathe Indu , I talk Indu , I am Indu , I think Indu , I live Indu , that is Indu .

But what is the highest truth , the ultimate truth ? The highest and ultimate truth is ‘ Amma ‘ , the Divine mother's , who are everywhere and who run everything ,
this universe is Amma .
This world is Amma .
My way of thinking is Amma . My system of thought is Amma . My way of living is Amma.
I live in Amma .
I breathe Amma .
The language I speak is Amma .
I am Amma .
Everybody is Amma .
Everything is Amma .
I think Amma .
I live Amma.
The study of Amma is Amma .
So it is all Amma .
That is the highest truth , the absolute truth .
The Divine mothers are the absolute , the ultimate .
That is Amma.

Amma should not be pronounced normally as Ammaaa , no , it should normally be pronounced short and sweet as Amma .

This is the world of Amma .
This is the universe of Amma .
******

Story 3 :
The hero is born to wonderful parents , he loves his parents a lot , his parents love him a lot .
The hero attains realisation and attains superpowers .
The world around him is ruled fully by atheist governments , these governments give an ultimatum to the people - ‘ all of you become atheists , the world should have no believers , those who still try to have belief in gods will be killed , only atheists can live in this world ‘ .
So everybody except the hero and his family become atheists .
The government learns that the hero and his family refuse to become atheists , so the govt sends police to arrest and kill the hero and his family , but the hero destroys all these police in an instant .
Next the govt sends soldiers to kill the hero and his family, but the hero eliminates the soldiers too .
Next the government sends it's entire army and the hero eliminates the entire army .
Next all the atheist governments of the world send all their armies and weapons to defeat one person , but he wipes them all out completely .
Then he proceeds to wipe out all these atheist governments too and then establishes firmly the belief in gods everywhere on Earth .
This is the story of the hero who saved the belief in gods from vanishing on Earth .

Story 4 :
The hero is born as the son of a powerful king ruling over a vast kingdom .
The hero has many siblings .
His father the king has many wives .
The kingdom is big and powerful , but it's people are all greedy and bad.
The hero does not like this life of excess luxury , he does not like fighting wars and killing people for more territory , he does not like cities and the endless greed of people living in them , he does not like massive palaces with endless jewels and gold in them , he wants a simple and beautiful life .
The Kings wives start pestering the king to divide the kingdom among all their children , and after being forced enough the king divides the kingdom into many smaller regions and puts each child in control of one region each , so the hero also gets a region .
The hero tries to reform the bad and greedy public in his region , he tries to persuade them to lead a simple and beautiful life , but the public don't like this and don't want this , so the public revolt against the hero and demand to the king that he put somebody else in charge of the region ,so the young hero is removed from his position by his father the king , the king tells the hero that his idealism won't work in the world they live in and asks the hero to be practical , but the hero , who is a realised person , he tells the king that he doesn't want power or any part of the kingdom , he tells the king that he will leave the kingdom

and go away to the forest and live peacefully in the forest , the king is deeply disturbed and refuses to allow his son to go to the forest , but the hero persists and finally is allowed to leave the kingdom and settle in the woods .
He leaves his parents , his siblings , his kingdom, he travels to the middle of the forest in an instant , he builds himself a beautiful and comfortable house in the forest with all necessary facilities and he lives peacefully as happily amidst nature , he enjoys the surrounding and he enjoys his life far away from the kingdom and society which he always never liked .
Every year , the hero visits his parents and siblings for a few days and then returns to the forest . Years pass by like this , and the hero’s siblings slowly start fighting amongst each other for more portion of the kingdom and this leads to an all out war between various regions in the kingdom , the Kings sons don't listen to the Kings words anymore and start fighting full scale battles against each other , some of the heros siblings die in these battles and a few
still remain , then the few fight amongst themselves until only one of the heros siblings remains alive , that sibling takes over the entire kingdom from the brokenhearted king and becomes the ruler of the entire kingdom .
The hero knows all this , but never tries to stop any of this , he just let's destiny play out it's game .
The brokenhearted king utimately dies .
People lose to the king tell him that all his siblings except one is dead , they tell him that one sibling still living in the

forest is a liability to the king , they warn the king that this

one sibling might try to overthrow the king someday , and the king listens to their advice and sends a portion of his army to kill his remaining one brother and bring his severed head .
So the Kings army enters the vast jungle in search of the heros home , they sweep the vast forest and finally find the heros home , they try to kill the hero but he vanquishes the entire army in an instant .
The king who learns of this is alarmed , be sends his entire vast army to kill his brother , but the hero destroys the entire vast army of the king in an instant , but despite finishing off the Kings entire army the hero does not try to kill his brother and become the king of kingdom , he lets his brother remain as the king .
The greatly weakened king faces attacks from other kingdoms because his army has been totally wiped out now , he goes to his brother and begs his brother for help in defeating the enemies , but the hero refuses to help , as a result the king is killed in battle and the enemies take over the entire kingdom which once belonged to the heros father .
Years pass by and nobody is left in the heros family except himself , his parents and siblings and relatives have all died , he alone remains in his family , a few generations pass by and the enemies who had formed a coalition in the past fought amongst themselves until only one of them remained , that one enemy became the emperor of the world , this emperor conquered all of the world except the forest the hero lives in because this

emperor learnt when he was young that a Divine person lived in the forest and those who tried to enter it would perish , but the emperor dismissed this story as just a fantasy said by his ancestors generations ago , so he sends a portion of his army to enter the forest and kill anyone living in the forest .
So the emperor's army enters the forest and reaches the heros house , but the entire army is wiped out .
The enraged emperor collects his vast and entire army and marches to the forest himself to kill the hero , but the emperor and his vast army is destroyed in an instant , bringing the empire to an end , a civil war breaks out in the empire where people form factions and start fighting against each other for power until almost everybody is killed , bringing the idea of kingdoms and civilisations to an end and leaving only small societies here and there as the remainder .
All this while , the hero lives peacefully and happily in the forest , far away from all their destruction and ruin ,his time on Earth comes to an end , he leaves Earth and goes to Home to his gods , all the remaining people on Earth are wiped out by the gods , all the buildings on Earth are wiped out by the gods , only temples and statues and art of the gods remain intact on Earth , the rest of the Earth is covered by a dense forests and greenery again , the Earth becomes pristine again , and that is the end of the story.

The point of this story is to show that things like Kings and kingdoms and emperors and empires and wars and battles are all absolutely useless and unnecessary and

give absolutely no peace and happiness to anybody , these things are not needed for life at all , the world never needed these things at all .

Story 5 :

I am a poor boy . I am a forward caste boy . I face so much discrimination because I am forward caste . I study very well , I earn really good marks in my school exams , I get even 98% in my school exams , but still I cannot get a seat in a government college , a backward caste student who scored only 95% got a seat in the govt college but I couldn't get a seat despite scoring higher than that student
, this is so unfair , why are things happening like this , the govt should serve all poor equally , but here it is serving only the backward caste poor whereas it is totally neglecting the forward caste poor , forward caste poor find it much harder than backward caste poor to get govt jobs and govt college seats , why is this so , it is all so unfair , so the govt is not serving all the poor here , it is serving only those poor who are backward caste , it is not serving those poor who are forward caste , what a cheating system it is .
Suppose I was a rich forward caste boy and I still score 98% in my exam , but still I won't get the govt college seat because a rich backward caste student who scored only 94% gets more preference over me and is selected over me , this is how the modern system is , the backward

castes benefit whether they are poor or filthy rich whereas the forward castes absolutely don't benefit any way , the forward castes are essentially expected to pay large bribes and get private college seats or private jobs , everything is costly for them , everything is rigged to make the forward caste poorer and weaker in this society , on the other hand everything is rigged to make the backward caste richer and stronger in this society , the entire system is rigged and totally criminal , it is all for votes and political power , the politicians need the majority votes of the backward caste , so they make everything backward caste friendly whereas the forward caste gets absolutely no benefit from any govt scheme or policy , the govt basically exists only for backward caste peoples , the forward caste people are on their own here , is how it is , members of the backward caste are getting wealthier and wealthier bit still they want this rigged system to stay so that they can continue to benefit from it endlessly , forward caste or backward caste they are all the same crooked and criminal people , in the past forward caste people treated backward castes as inferior and hurt them a lot , the backward caste people are now getting their revenge because the govt has fully empowered them to get their revenge , they are pouring out all their hatred towards the forward castes in every way they can , they might as well kill all forward caste people and take everything for themselves and get it over with rather than engaging in this endless show of hatred and revenge , the backward castes have totally lost their minds in this extreme hatred and they will only end up destroying themselves sooner or

later just like everybody else , they are doing no good at all , they are showing no fairness at all , they are destined to be defeated and destroyed , they will never be happy and well , be it forward or backward anybody who tries to commit mistakes will be destroyed sooner or later , and they will not escape their bad destiny , that is definite .

*****

Story 6 :

The hero wakes up on an earth which has no people except him , the gods have given him a beautiful home surrounded by woods and beautiful temples , he is all alone in this pristine beautiful world , he has a lot of powers , he is realised , he lives peacefully and happily in this world all by himself .

He gets a thought - ‘ what if the world had different colours that it does not now ? ‘ , so he set out to experiment , he made the sky pink and the sand green and the trees violet , it was beautiful at first but after a few days of seeing these same colours he felt that the original colours were best , but he was not done with his experimenting , he tried out all different colors for sky and water and sand and rocks and trees , he also changed the composition of many things , he made the rock mountains into pure gold and pure silver mountains , he made the sand into a metal of orange colour , he tried all possible combinations , but ultimately he learnt that the original colours as created by the gods were the best and most natural , the sky was best when blue , the water was best when blue or

colourless , the trees were best when green , the sand was best when brown , no matter what combinations he tried the original colors were the best he learnt .
He even removed all trees and made the entire surface of the earth into a rock surface or a metal surface and even a glass surface , he made mountains made of glass and plastic and even leather , he tried everything wild , but none of it impressed for long , the original combinations as created by the gods were best suited for Earth . This is what he learnt through experimentation .

He then travelled to lots and lots of planets in the universe , he couldn't travel to all the planets because the universe is endless , he saw nothing new in these planets , everything he saw in these planets was already present in some way or the other on earth itself , so after a point he was no longer interested in seeing other planets because he was convinced that everything was there on earth itself , so he came back to earth itself again at last ,he was no longer fascinated by space and other planets and heavenly bodies , he was happy with earth itself .

He then went deep into the Earth's surface and into the ocean , he went to the Rocky centre of the earth and explored the entire of the Earth's interior too , and convinced that living on the surface was the best thing to do he came back to the surface again . He became ultimately convinced that living on the Earth's surface was the best thing to do in the universe .

So After doing all this , he settled happily in his house itself and lived peacefully , thinking of the gods always and visiting their temples and always being in their company , flying in the air and eating well and sleeping happily and always thinking of the gods , he spent his time away in this manner , after his period on earth was over he went back to Home to his mothers and all his siblings .
This is his story .
It is good and important to learn about everything , but it is also important to live , living is not just travelling and exploring endlessly , it is staying in one place steadily and living happily and peacefully , that is real living , wandering endlessly is not living , be in a state of restlessness endlessly is not the ideal state of being, one has to learn always but one also has to live , it is most important , constant wandering and searching will only lead to fatigue and unhappiness , one has to become steady and balanced and live well , that is most important always.

****

Story 7 :
The hero , as usual , is born to great parents , he and his parents love each other and care for each other a lot .
The hero is dissatisfied with the state of things in India , he is dissatisfied with the bad quality of life in India . And he cannot live in any other country other than India , live or die he will do it all in India alone , that is his way , but things in India are disturbing him so much .

He is a realised person with superpowers . So he gets a new idea .
He flies to Antarctica , in an instant he sends the few people on Antarctica back to their homes in different countries , he erases all the existing buildings on Antarctica , and then he proceeds to remove all the ice on Antarctica and convert Antarctica into a lush green place with forests and greenery all over, he does all this in a moment , he created a spacious beautiful house in the middle of Antarctica and renames Antarctica as ‘Amma ‘’ , he thereby makes Antarctica into a lush green paradise . Not just that , in an instant he relocates all the temples in India and elsewhere in the world to Amma , his reason for doing so is ‘ Indians don't know how to respect the gods , so they don't need the gods and their temples , let all the temples and the gods stay with me . One shows real respect to the gods by learning about them and realising them , not by saying mantras and prayers and praying endlessly and wishing for this and that and doing poojas and rituals and doing a lot of other unnecessary things , these things are not respect , understanding and realising the gods is true respect given to them . Any person, be it your parents or your partner , the real respect you show to them is by understanding them , if you don't try to understand a person then it means that you have no real liking or respect for that person , giving understanding is giving love and respect and affection , thats all ‘ .
All countries soon got the information that Antarctica became a green paradise and was occupied by a

mysterious force . The Americans declared that the aliens had landed on earth , they ordered their military to go invade and conquer Antarctica and destroy the aliens , this American army reached Antarctica but was completely destroyed by the hero , the Americans then called the Europeans and their joint militaries marched to Antarctica but were totally routed , the hero said to America and eutope ‘ I will give you 6 months time to change your ways and become good , but if you fail to become good then America and eutope will be completely wiped out ‘ , but the arrogant westerners do not listen to his words , despite losing their entire armies and their weapons they still cannot accept defeat and refuse to change and become better , so 6 months pass and they absolutely don't show any change at all , they are still arrogant and ignorant as always , so the hero wipes out America and Europe fully , these two places become totally empty and devoid of people , ,4 continents became empty - North America , South America , Europe and Oceania - the entire land of these continents was stripped of all it's buildings and other structures and filled with lush greenery , these 4 continents returned to their original pristine state again , with forests everywhere and no humans and buildings and no man made structures anywhere . The Africans and middle East people saw all this , they were scared , but they refused to change their ways , the middle easterners declared that an evil force had invaded earth and that it must be destroyed , but they were scared to send their armies to Antarctica after seeing 4 continents getting

wiped out , but they refused to change absolutely , so at the end of their 6 months time the middle East and Africa were totally wiped out and converted into lush green paradises devoid of people and human structures . So only the remaining portion of Asia was still left , the Chinese refused to change and got wiped out ,some of the the Buddhist countries refused to change and got wiped out , the Muslim countries of the far East and southeast also got wiped out because of their refusal to change their ways , finally only India and nepal and a couple other countries were still left , these places accepted to change and accepted to even place the hero as the ruler of earth , but the hero refused this , he only wanted people in these places to change , but despite accepting to change the people in these places really did not change within , they were just acting like they had changed on the outside but remained the same rotten people on the inside , so the people of these countries were wiped out too ultimately .
In the end only the hero and his family and a few other good people on earth remained whereas the rest of people were all wiped out .
The age ended , the hero and his family and the few good people went to Home to the gods while entire earth became a lush green pristine paradise again and will remain so forever . The temples and the statues and other art of the gods will also remain forever on Earth amidst all the greenery .
This is another kind of story .

Story 8 :
The year is 2050 .
The world has become utterly horrible .
Few good people on earth are suffering .
The bad people are suffering too but they won't change their bad ways , they remain relentlessly bad always .

Krishna , Rama , Shiva , Parasurama , Balarama , Vishnu , Vamana , Brahma , Arjuna , Karna - all of them land on Earth .
Krishna lands in Washington DC in front of the capital dome .
Rama lands in Paris in front of the Eiffel tower .
Shiva lands in China in front of the forbidden city .
Parasurama lands in UK in front of houses of parliament .
Balarama lands in Moscow in front of the Kremlin .
Vishnu lands in India in front of the rashtrapati Bhavan and parliament .
Arjuna lands in Mecca in front of the Mecca mosque .
Karna lands in Brazil .

Vamana lands in vatican city .

Brahma lands in Japan .
These divine heros give ultimatum to the people to change their wrong ways and become reformed individuals .
They give humans 6 months to correct all their long ways .
In a lot of countries , the governments send soldiers to attack and kill these divine brings , but these divine beings destroy all of them in just a moment with their mere thought , these divine heros go to all the nations on Earth and warn people by saying ‘ change or perish ‘ . The 6 months pass by and people absolutely refuse to change their wrong ways , they are unable to become really good within , so these divine heros erase people from the face of the Earth , only a few good people on earth remain and the rest are gone and finished .
The divine heros take these few good people to Home .
This is their story .
They don't have to fight puny humans with weapons , just their power of thought is enough to destroy these puny humans . Humans don't understand their limitations and act like masters of the universe , but one day they meet the real masters and are humbled .
All these divine heros are physically beautiful with unlimited strength and can be any size they want , from mega to micro , they are the real giants , not puny humans.
*****

Story 9:
The hero has been having a recurring dream for so many years , he is travelling in a forest road and gets lost in the forest and comes across a mysterious temple in the middle of the forest . He doesn't know why he gets this dream , but he keeps getting this dream again and again. One day , in real life , he travels through the western ghats
, it is evening time and his internet connection doesn't work in the forest , at a 3 road junction he chooses the wrong road and goes deeper and deeper into the forest until that road ends at a mysterious temple deep in the forest , it is a magnificent temple , very big in the dark itself , and it is open and brightly lit on the inside .
He goes inside and walks around , it is a beautiful temple , he can't find a single person or vehicle there , nobody is there but the temple is brightly lit and open at this time , he is wondering how , he is greatly intrigued , all portions of the temple are open except a single large door that seems to be closed , he is scared at first to open it , then gathers the courage and opens it , inside is a bright room with many beautiful statues , and in the middle of the room a large man is sitting and praying to the gods , he can only see the back of that man . He feels scared , but at the same time he feels strangely excited .
The stranger calls the hero by his name and calls him inside , the hero is started , ‘ how does he know my name ‘ he thinks , he goes closer to the large man and sees his face from the front , he is shocked to see that it is a young

person , absolutely beautiful , very big in size , maybe 7-8 feet tall , wearing a half kurta shirt and a dhoti , the large man gets up and asks the hero ‘ how are you ‘ , the hero says he is fine and asks who the big man is ,and the big man says ‘ I am the person everyone calls kalki ‘ , the hero was shocked ‘ you mean the avatar of kalki ? ‘ , the big man says ‘ yes , I am the person everyone calls kalki , but kalki is not my real name , it is the name people gave me , but in reality I have no name at all , I was not born to any human parents , which explains my pure form without any flaws , I was directly sent by the gods to earth , they sent me here saying ‘ we are sending you to earth , do what you think is best ‘ , I came to earth , saw all the horrors happening here , and I decided ‘ the best thing to do in this world is to think of the gods always and live far away from society , so I created this temple here deep in the woods and made this temple my home , the road to this temple does not really exist , it can be seen only by those who have attained realisation ,and you have attained realisation , which is why you saw that road and come on it to this place ‘ . I asked him ‘ but kalki avatar is supposed to destroy all the evil on earth and save good people and make truth and justice supreme again , but if you are not doing that , why ? ‘ , and he said ‘ to correct the world and destroy evil is not your job or my job , our job is to realise the gods and stay focused in them and lead a peaceful life here on earth and go to the gods again once our term here is over, that is a our duty is , this entire game is being run by the gods , if they wanted to destroy evil then could have done it long ago instantly , but the evil

people are themselves being fully run by the gods here , they are themselves puppets of the gods , so the gods are running their show here , who am I to stop their divine show , who are you to stop their divine show , we are just their pupils , let us focus in them and watch their show and live our lives here and move on , that is why they told me ‘ do what you think is best ‘ , so I thought about what is best and I decided to keep quiet and focus on the gods because that is the best thing to do in any world , that is the best thing to do always , so I am happily settled here in this beautiful wilderness and enjoying nature and living with my gods in this temple ‘ , but I asked him ‘ but by staying here , you are not doing so many good things , by living in society you could indirectly help so many people without anybody even knowing because you have all the necessary powers
, you could do a lot of good , but you are not doing it , why ? ‘ , he said ‘ as I already said , everything and everyone are being run by the gods , the poor man stays poor because the gods make him act so , the poor man works hard and becomes rich because the gods make him do so , the rich man loses everything and becomes poor because the gods make him do so , so it's all in the hands of the gods , whether to do good or not , whether to do bad or not , and if they want to do good through me then they will make me do it , if they want to do bad through me then they will make me do that too , if they want me to do nothing then they will make me do nothing too , so nothing here is in my hands or your hands , the gods are

the real doer , they are doing everything , you and me can't do anything here , we are ourselves dependant on the gods to do everything , so we must understand our dependant position and our great limitations , if we do that it means we have become wise people , it means we have lost all our illusions about ourselves , we are ourselves just puppets in their game , let the gods play us as they please
, let them run us as they please , we will go along with the flow , what do you say ? ‘ , I said ‘ mmm , yes , that is true , let us just move along , the gods will make us do whatever it is that they want us to do , nothing is in our hands here , we are all in their hands , let them run us as they please ‘ . After that , the hero becomes a regular visitor to the big man , the hero even takes his family to see the big man every now and then , the big man visits the heros home now and then too to spend time with the good people living in it , they all live peacefully and happily .
End of story .
From this story we learn not to think too highly about ourselves and to we learn to understand our limitations and focus on the gods and live out our term here peacefully and happily .
*****
One can say that my thoughts and ideas in these two books are very disjointed and not in a proper sequence , and they are right too , my ideas and thoughts in these books are scattered all over the place , but that is because they are a reflection of how things are in my own head , in

my head thoughts and ideas are not arranged in a proper sequence , nobody has arranged their own thoughts and ideas in a sequence in their own heads , not even those who are self professed false geniuses have all their thoughts and ideas neatly arranged inside them , our thoughts and ideas are always scattered all over the darkness in our heads , so have presented the same reality in these two books , I have presented exactly what is there in my head as it is in these two books , i have given people a view of how things are in my head , I have given them a real picture of the interior of my head , I have been truthful to the readers , I have given the truth and reality as I see it within myself , I have presented it all in the scattered manner in which it is all present within myself , is what I have done , that's all . By arranging it all neatly , maybe I could have made my book more readable perhaps , made it more reader friendly for the readers perhaps , but I won't be giving them the reality of things as they are in me , I will be giving them a false view then , and I don't want that , I want to give them things in a raw and direct form , nature is raw and direct be it the rocks or mud or trees , nature is not polished ,nature has no method , it is raw and direct , I want to be like that too , I want to be like nature because I am a part of it too , why should I act like I am polished and pretend like I have risen above nature to become some kind of higher power here , I have no such pretensions , I am very much a part of nature , nature is a part of me , so I will live in a flow with nature , I will be natural , I will be real and raw and

direct and true , I will be reality , I will be truth , I will be part of the absolute beauty that is natural beauty , I will be myself
, nature is the absolute beauty here , I will be a natural flowing part of it , that's all .

***

Sometimes I feel my doctor profession is not a perfect profession , because i sometimes find myself expecting patients to come so I may earn something and do some proper work and make a living and career for myself , in short I expect people to become ill so that they come to me and I treat them and do my earn and earn some money in the process and make my living and career out of it , if I was a good person then I must expect people to be healthy and fit and strong always such that they never have to visit the hospital or clinic or doctor for any health reason at all whatsoever , but I am not good here , I have my own selfishness here , I want to make a living , I want to earn money , I want to earn a good name in society , so I need to expect people to become ill and come to me for treatment , that is how I am forced to think , if I get no patients then I get no earning and no respect in society and I am considers a waste fellow then , a waste fellow who is living by eating the money his parents gave him , I will become what they a nepo kid , but I have no intention to be such a kid , I am not such a kid , I want to really work and earn honestly , but honesty in this line of work seems impossible because I am expecting people to fall ill

here , goodness seems impossible in this line of work , the govt is making people unhealthy with all it's bad policies , be it alcohol or smoking or gambling or betting or unchecked adulterated food or bad roads or dirty sewers or endless construction and it's pollution or bad tv shows or movies that make people mentally disturbed , the govt is doing everything it can to make people unhealthy and unhappy , so people will always be ill and sick thanks to the government , the doctors must worship the government for providing them an endless stream of patients , so the government is the main creator of sickness and disease and illness , if the government did everything properly then sickness and disease among the public would be far far less and the doctors would all be out of work , the doctors would all be poor without the governments great help to them , by doing bad to the public the government is creating a lot of patients and therefore doing good to the doctors ,so that is all fine , but should I also play a role in this bad game , that is my question , I can't tell the government to become good here because the government will never become good , if I told the government to become good then the government will feel insulted and try to crush me somehow , I don't want that , I choose to remain silent , I choose to remain a spectator , let the govt make people into patients and send them , I will treat whatever patients I get , after all I am not the one making people into patients here , I am not committing that sin here , the government is committing that sin here , I am just treating those patients who come

to me , I am only doing good here , let the government create more patients , then I will have more patients and I will do more good too to society , I have nothing to lose in this game , let the government gain more sin and let me gain more punyam , let me gain more blessings from the gods , let somebody else commit sins so I may reap the blessings , I will play the game like this , I will go along with the flow , that's all .

Not just me , for the policeman to make a living he needs cases , in a perfect world there will be no cases and the police would have no work which would lead to there being no police at all , so the policeman also expects people to commit mistakes so that he may continue to have work , the politicians expect people to remain poor and needy so they may continue to have work , the filmmaker expects things in the world to remain bad so he may continue to have work , the man of religion expects people to remain ignorant so he may continue to have work , in an ideal world none of these people would have work , but we are living in a world that is not ideal at all , we are living in a selfish world where everybody is selfish and has his or her selfish needs , we want things to remain in a certain way so we may survive and live comfortably , we want other people to be stupid so we may seem intelligent and wise , we want other people to ruin themselves and get finished so we may thrive and live comfortably , we want others to fall down so we may always stay on top , I want all these things too just like everyone else here , I want all the bad people here to

become destroyed so I may live comfortably and peacefully , I have my selfish reasons just like they have theirs , is the truth . So why should I pretend to want equality , why should I pretend to want good and justice for everyone , why should I pretend and act and give a performance for the sake of money , I just choose to keep quiet and go my way , that's all , we are all caught in this game here , there was a time when I genuinely wanted equality and justice and good for everyone , but after seeing the badness and madness of people I changed my views , I care only about myself and my family and the few good people here on earth , I care only about their wellbeing , I want them to live comfortably and well , let everybody else get destroyed , I don't care , I won't weep for them , I won't feel for them , I won't think good about them , let them just go away into the ground , frankly I don't give a damn . I got a chance to use this famous dialogue now , it was funny to use it , so that is that .

*****

They might as well rename the Olympics as ‘ steroid games ‘ because that is all it is , it is the greatest show of steroids on earth , and the champion steroid abusers win the most medals , and everyone knows which country is the number one in drug abuse - USA , they are the steroid champions of the world , they should be given that title definitely . All sportspersons start out as normal people with normal bodies , due to having normal bodies the constant physical exertion of sports gives them many

injuries for which they undergo surgery and other procedures , but they want to continue in their dreams and become champions , so they take steroids and develop stronger bodies more resistant to injury and having more physical ability , they go on to win many medals , they endure a lot of physical pain and mental strain for all this , which is all absolutely unnecessary , they could have just lived normal lives doing normal things , but in today's world people can become famous only by doing abnormal things so these sportspersons engage in abnormal activities and withstand all the pain and strain these activities bring and win many medals , is how it is happening , a normal person wouldn't do such mad things , a normal person would just say ‘ why should I do such unnecessary things , why should I give myself so much pain and strain just for some medals and fame , I don't need it at all , I will just live a normal life , that is enough for me ‘ , that is how a normal person will behave , but we are not dealing with normal people here ,we are dealing with abnormal people and the only way they get satisfaction is through doing abnormal things , so they take steroids and do all kinds of abnormal things to go to the top , is how they are , they live in their own madness , girls take steroids and start looking like men , in some cases men are disguised as girls and made to compete in women's events , all these kinds of ugly and abnormal things are common in the world today everywhere , people have no brains and sense anywhere , so abnormality is thriving and is being rewarded everywhere , that's all . ****

Story 10 :
In a different age , Vishnu creates an ideal land on Earth , it is a rural society where there are no cities and towns , where there are only villages , Vishnu lives in a spacious and comfortable house surrounded by fields and woods , he creates many crores of men and women and these people are the citizens of this land , they live in spacious and comfortable homes in the villages too , the entire land is exactly like the ideal society I talked about in the first book. Nobody in this land works for a living , because Vishnu provides them everything , he provides them spacious homes , food , water , clothes and all other necessities with just the power of his thought . So basically everyone in this land is living happily without doing any work outside the house , they just do cooking and cleaning up the house and maintaining the house , that's all , even that most of the times they ask Vishnu to do it in their thoughts and Vishnu does it all in an instant .
At first , everybody is living the rural life peacefully , they are living peacefully without doing any work , they eat tasty food , drink clean water , wear simple and beautiful clothes , live comfortably in their homes , keep themselves clean , take care of the temples , show much respect and love for the gods , so things go pleasantly like this for many years , Vishnu taking care of them all really well .

But slowly , a boredom starts to creep into people , they have everything and they are living peacefully , but they

start feeling something is missing in their lives , they start feeling they are not enjoying fully and not being fully free and wild , so they start experiencing a certain unhappiness within , they start getting more and more restless , they want to build massive buildings and live more luxuriously and engage in wild activities , they go and ask Vishnu to provide them all this , to give them to capacity to do all this
, but Vishnu refuses saying these things are not good at all and that he wouldn't allow these things in his land , these people accept and go away but they are still not happy , a resentment starts building in them towards their own creator , they can't stand it anymore after a point so they go to Vishnu and ask him to create a separate land for them where they can live as they wish , Vishnu knows that they have gone out of control and they have lost any and all goodness in them , so he creates a new land and many of his children go to the new land , they build massive buildings and cities and drink and smoke and take drugs and engage in all kinds of extreme things and enjoy in this misery , they don't even come to see Vishnu , they just stay in their land doing whatever mistakes they can , seeing them live like monsters many of the remaining children in vishnus land also leave and settle in the new land because they are inspired by these monsters and want to live like these monsters , they call it the new world whereas vishnus land is the old world , so vishnus land has only a few people left now who are genuinely good whereas the rest have left him and his old world for the new world .

Over time , the new world becomes bigger and bigger and more and more evil, many people in the new world fight amongst themselves and form separate factions ,they go to Vishnu and demand that he create separate lands for all of them , and he obliges them happily , as a result the world is now full of many many lands , each land having it's own rulers and complex systems of corruption and endless evil and misery , meanwhile vishnus world is the same as before , simple and constant and beautiful always
, the greed and madness of the people in the new world lands reaching a breaking point leading to wars between the different lands , they start ruining and destroying each other and themselves , ultimately one new world land triumphs over the rest and forms a world-wide empire , only vishnu’s land is not a part of this empire , the emperors of this empire become arrogant and start insulting their own creator by saying ‘ look at us , we have developed so much and we have conquered the world , you call yourself the creator but you still live in a small house in a village whereas we live in palaces with endless wealth , you are not the creator here , we are the creators here , we created much more in this world that you ever did , so we are the real creators , you are just a freak with a few superpowers , that's all ‘ . Vishnu didn't care what they said and chose not to respond to them , after all they were all his children and he couldn't bring himself to hurt his own children and teach them a lesson.
But this made things only worse , slowly the emperors

asked the empires people to gradually encroach upon vishnus land , so people tried to encroach upon vishnus land , but he wiped out the encroachers in an instant , but this made the emperors even more arrogant and angry , they decided to send their armies and conquer vishnus land and kill Vishnu and the few good people there and become owners of the entire earth themselves and crown themselves as Lords of the universe .
So these armies fired missiles upon Vishnu's land , but Vishnu made all these missiles disappear in an instant , then they sent soldiers to invade Vishnu's land , but Vishnu wiped out these entire armies too , thereby defeating the entire empire and the emperors . Vishnu gave the the emperors and the empires people a final ultimatum - change or perish .he asked them to give up their wrong ways and become good , but they absolutely refused to do so , therefore the entire empire and all it's people were destroyed in an instant by Vishnu .
At the end of all this , only Vishnu and his few genuinely good children survived , everybody else was wiped out , only the old world survived , all the new worlds were wiped out completely , absolutely nothing remained of the new worlds .
This is the story . By disrespecting the creator and by trying to destroy the world with their wrong activities they brought about their own destruction , those who try to destroy nature and make the world ugly will be destroyed themselves , nature will return to it's original pure state whereas these monsters who tried to destroy it will be wiped out of existence . ***

one can say that i have talked a lot about destroying people in this book , that is true , one can say that western people and middle eastern people and even indian people will be unhappy with me after reading this book , that is also true , but let me say it , if the european or middle eastern people had a chance to destroy us then they would certainly take that chance and destroy us , they dislike us that much , so it is only fair that i also dislike them equally ,it is only fair that i should also destroy them if i ever got the chance , the hatred is mutual , the dislike is mutual , the bias is mutual , is how i see it , i am not a broad minded individual to say ‘ let them try to destroy me , but i will do only good to them always ‘ , such weakness i dont like and i dont need , such weakness will only hurt us and do great harm to us , we need to do what we need to do , we need to be how we need to be , that is most important , or else others will stamp us if we are too weak and soft and kind , being so unnecessarily soft and kind is not goodness , it is stupidity and totally wrong behaviour , we have to be how we need to be according to the situation ,we cant be the same in all situations , we have got to vary ourselves depending on the situation , that is most important .

****

story
11:
Monologue of a gods child :

I might not be doing anything in my life , but many things in the world are dependant on me for their functioning . lets say i watch a bad movie and i enjoy it and say its a super movie , then the gods will make sure that more and more such bad movies are made until i finally get vexed of them all and give up these bad movies , so if i like something bad then that bad thing grows a lot , i used to like america when i was young and used to think highly of america back then , as a result america experienced its greatest growth in the last 30 years after i was born , but then i started disliking america and everything about it in recent years and my dislike paved the way for America's current decline , America will decline more and more in the coming years till it completely gets ruined because i will never again like that mediocre country . whether anyone accepts it or not , the future of a lot many are dependant on me . if i dont use ai , then ai will never become a global phenomenon , if i stop watching western movies , then they will go into terminal decline , i have already stopped watching them greatly which is why they are fading away more and more into obscurity , the same goes for my fellow indians too , if they hurt me then they will be gradually ruined and destroyed , showing respect and proper behaviour to me is the only way for their survival , if i stop reading the news then politics and politicians will suffer badly , if i stop watching movies then the movie industry will decline and collapse , so its all basically in my hands , i am not dependant on them here , it is they who are fully dependant on me and they dont know it , the fools

, they will be finished if i stop giving them my attention , they will be washed out if i stop thinking about them and stop giving them any importance , so their future is all in my hands , they must know this and act properly , if they think they are too intelligent , then they will be ignored , they will be finished forever . i dont find their activities interesting anymore , whatever they do i really dont care anymore , and since i wont care and think about them they will fall down and break apart , that is their destiny , i will win in all situations , they will face defeat in all situations , their only destination is misery and death , that shall be their fate , that is all .
****

i dont like the idea of clubs and clubbing , i will never be a member of any club , i absolutely dont want to be a member of any club . many clubs used to be male-only clubs in the past , the reason for this is simple , the idea of clubs began in england , and in homosexuality is prevalent , it is almost like an english tradition , so wealthy men created men only clubs because they wanted a safe place to engage in homosexual activities , engaging in such acts in dark alleys or public toilets is risky and has led to many people getting arrested , so the ultra wealthy cant afford this risk , so they form a group and buy a building and call it a club and in this club they engage in all sorts of wrong activities from drugs to gambling to homosexuality , they drink and smoke in their homes itself , so they dont have to hide that from their families , but these things like

homosexuality and gambling and drugs they need to do more discreetly , which is why they set up clubs with rooms in them , they want a place where they could engage in all kinds of wild behaviour and private men-only clubs are the ideal places to engage in such behaviour . such things are common not only in men-only clubs but also in men-only colleges and male-only schools , these places are all hotbeds of homosexuality and drugs and all kinds of wild behaviour , this is very true especially in the western world , in other places it is present in varying degrees , but it is widespread and totally commonplace in the western world .

All the literature in the world today is absolute garbage , absolutely useless trash , worthless trash . Now let me tell you how the general European novel goes like :
John is a 20 yr old male .
He has a high sexual appetite .
He finds Michelle , a 18 yr old female .
They love each other ‘truly’ and 'purely ‘ , they engage in intercourse .
After a few months , John becomes bored of Michelle and leaves here .
John then finds Agnes , a 16 yr old female .
They love each other 'truly ‘ and 'purely ‘ , they engage in intercourse .
After a few months , John becomes tired of Agnes and leaves her .

John is now 27 years old , he has loved nearly 15 women ‘ purely ‘ and ‘ truly ‘ and he get bored of them all after a while and leaves them all .
Finally John meets Samara , a 40 yr old prostitute , he falls deeply in love with her , and in a moment of impulse , he marries her .
She continues to engage in prostitution in the day time , but comes home at night and pleases John always , she is the true love of his life . They have a kid called Andrew .
When Andrew is 10 years old , Samara dies of a drug overdose , for years she had been an extreme drug and alcohol addict .
Andrew grows up into a 20 yr old man and he develops an infatuation for older women .
Andrew meets Michelle , John's ex lover , she is 46 years old , they fall in love and decide to get married .
Andrew introduces Michelle to John , but both Michelle and John are not shocked , they are casual about it all .
So Andrew and Michelle get married with the blessings of John .
Michelle has a daughter , Emily , from her second husband , she has had 4 former husbands and one child , Emily .
John falls in love with Emily , she accepts his love . John and Emily decide to get married .
Andrew and Michelle don't object to it because they are casual about it all .
So John marries his daughter in laws daughter , Emily .

After Samara had died , John had casual flings with lots of women , but after marrying Emily he is a faithful husband again .
But Emily gets bored of John after a while and starts cheating on him with lots of other men . Emily finally meets a man Agnew , who is nobody but John's former lover Agnes , she had underwent a sex change operation to become Agnew , so Emily and Agnew fall in love , Emily divorces John and marries Agnew .
John goes into a depression , Michelle tries to bring him back to normal , leading to John and Michelle making love when Andrew is off to work . This illicit affair between John and Michelle continues for a while until Andrew finds it out and divorces Michelle .
The divorced Michelle now marries John and they become a couple . However , their marriage doesn't last for long as John becomes bored of life and ultimately commits suicide , killing himself . Michelle becomes a widow.
Meanwhile , Andrew lost his faith in women and became he homosexual , he has a homosexual fling with Agnew , Emily knows about this but ignores it and later accepts it .
Agnes had two former husbands before she turned into Agnew , she had a son with one of the husbands , his name is William .
William meets the aged widow Michelle and they fall in love and get married .
The story ends .
This is the typical European story that receives universal acclaim despite being utter garbage and the equivalent of

sewage , but they call it the great European novel and work of art and give it all kinds of awards and prizes and put it on the list of ‘ 100 greatest books ever written ‘ and ‘ books everyone must read before they die ‘ , this is how fraudulent they are , they write endless books with the same rubbish ugly stories and they call themselves genuises for writing them and they give themselves all kinds of praise for writing them , it is all a total scam .
Anybody can write such sleazy stories , it doesn't require any intelligence , humans all have dirty minds basically , so writing such stories is not a big thing , but it is a very ugly thing , these ugly stories are not art , they have no beauty in them , they are all just ugly stinking trash , that's all .
This is how the general American novel goes like :
Jimmy is a 30 yr old New Yorker .
He is a Jew . And since he's a Jew , he's automatically considered to be a genius and an intellectual , and whatever he says is considered to be a joke or a pearl of wisdom .
He is short and ugly , but still all the girls want him and him only , he is the Jewish Superman with superhuman sexual abilities .
So everyday he meets a different girl and sleeps with her , all the girls want to marry him , but he rejects them all and continues to engage in evergreen playboy activity .
He produces useless music , but since he's a Jew he's called a genius musician and a musical maestro and he's given all awards by the govt and others , he makes

useless films , but since he's a Jew he's praised to heaven by the American state and again given all awards and is called the ‘ all around genius intellectual of all time ‘ , even if he slips and falls on the street the paparazzi call it a ‘ beautiful revelatory sight meant to inform human beings that falling in life is common but to get up again shows the power of the human will ‘ , even his endless womanizing is described by the press as a ‘ divine act ‘ , he is ultimately given the nobel prize for literature and the nobel prize for peace too because , according to the press , he displays ‘ the unending spirit of the human soul that stays alive and in full energy despite facing all obstacles in life and surmounts all these obstacles too and triumphs over it all ‘ , he marries 10 times and is divorced 10 times , he is a drug addict and a drunkard , he is called the sweetest man in the world and a universal fatherly figure . This is his life .

So this is how a trashy American novel generally goes like , the hero could be the worst character possible , but he is glorified into the greatest character , and if he is a Jew then he is glorified into a godlike character despite all the idiotic things that he does . This is the kind of rotten trash that they produce . And Jews especially have this severe inferiority complex , they need to portray themselves as sexual Supermen , as wizards of sex , they need to portray themselves as the ultimate Playboys that all women are unbearably obsessed about , this gives them a certain mental boost and makes them forget about their inferiority complex for a while , in reality no woman is obsessed about them and nobody likes them , this makes

them depressed and makes them seek psychiatric help all the time , but they want to mask all this weakness , so they create a false image about themselves by portraying themselves as geniuses and intellectually and jovial characters and Playboys and sexual champions and upkeepers of truth and justice and reality , they feel this obsessive need to give themselves this false image , it makes them feel better and keeps them going . Like the parsis in India , the Jews find themselves in top positions in America because they are loyal workers and are always ready to engage in any and all wrongdoing necessary to keep the system running and keep their status intact , they will faithfully carry out any and all wrong activities to stay in a high position always , they are always totally self obsessed and maintaining an image matters most to them , so they will do anything for money and image , but within they will always remain the same miserable individuals , is how they are .

Now , China will be fighting a war with Taiwan , so the Americans will try to irritate China by awarding several Taiwanese citizens the nobel prizes and other awards and calling these Taiwanese citizens as the greatest upkeepers of truth and justice on Earth . At the same time , Americans will be fighting a war with Venezuela , and they will be killing any Venezuelan citizens who are fighting for the truth and justice . This is how the Americans are , if others do a mistake they will criticise them , if they do the same mistake they will justify it as

good and right , they are pure evil , people everywhere are evil , but surely some are more evil than the others .
On one hand , they will seek to establish white supremacy everywhere , on the other hand they will give awards to few black people and Hispanic people and native American people and call themselves the givers of ‘ equality ‘ , on one hand they will do everything they can to suppress the minorities and on the other hand they will give awards to the minorities and create an image as if they are encouraging and empowering the minorities , is the kind of ugly game they play . Within themselves , they are scared that the white people are reproducing less and gradually losing their majority status , they are scared that blacks and Hispanics and Indiana and Asians will become the majority one day and crush them then , they have their fears , and they will always strive to maintain their majority and their status as the superior race .

Let's talk about fake history for a while :
According to history , the cholas were Telugu people , they came from the present kadapa region in Andhra Pradesh , they established the chola empire , but strangely their inscriptions are all in Tamil mostly , how is this possible ? They were Telugu people , so all their inscriptions must have been in Telugu , but why are they in Tamil ?
Also , Why do the Tamil people call the cholas as Tamil Kings despite them being Telugu people and Telugu Kings ?

Not just the cholas , the pallavas came from the north too , they were Telugu too most probably , yet they are also considered as Tamil rulers , why ? They were Telugu people and Telugu rulers like the cholas , so they definitely would have all made their inscriptions in Telugu only and not in Tamil or any other language , people in the ugly modern world today might give up their mother tongue after moving to another place , but in the past they did not do such things , they stuck to their mother tongue always , so if the pallavas and cholas really existed , then they would have definitely stuck to their mother tongue and made all their inscriptions in Telugu only .

The fact that their inscriptions are in Tamil shows clearly that these inscriptions were created in the modern times and are therefore fake .

And since all these inscriptions are fake , it can be concluded that the cholas and pallavas never really existed . And since they never existed , it can be concluded that all the history of their times is totally fake and false .

Now, the pallavas had connections to the khmers , the khmer rulers were also Telugu then like the pallavas , all the varmans in Cambodia were Telugu then , but why are their inscriptions also not in Telugu , they surely did not forget their mother tongue after reaching Cambodia , they use language as an effective instrument to stay together as a group always and maintain the unity of the group , so why are the khmer inscriptions not in Telugu . This shows that the khmer inscriptions are fake , and the

khmer history is also totally fake . Besides , why would they build larger temples in Cambodia than in their Homeland India , the pallavas did not build such massive temples in India itself , so why would they build such massive temples in Cambodia then , so the pallava connection is also false .
All of history is totally false in this manner .

Alexander wanted to come to India , that was his main aim , and he came to the orders of India and then decided to go back , does this make any sense at all ? Even a child won't believe such things , you stand at the entrance of a treasure chest but you don't open it and you just go away , nobody does such a thing , it simply doesn't happen , which is why Alexander never existed , his story is just a myth . The Romans were conquering the desert everywhere , be it the desert in Libya or the desert in Egypt and middle East , but they never thought of coming to India and conquering India despite calling themselves the greatest empire on Earth , does this make ant sense either ? Absolutely not , what is to be gotten by conquering empty lands and empty deserts , even fools won't do this , and this is why the Romans never existed too . And Genghis khan , the man went all the way to Poland , but he didn't come to India , why is that ? He was regarded as the most deadly character and he ravaged the entire middle East , but he didn't come to nearby India , what sense does this even make ? Blind people could believe these takes, but I stopped being blind long

ago ,

so I will never believe such tales with such large plot holes in them . Besides , a few Western historians themselves have said that India was the wealthiest country and had the highest gdp until almost 1900 , for a long time India was the richest and biggest country , China equaled it around 1700
, and until the 1880s India and China were the two biggest countries on Earth in terms of wealth and production , America overtook these two nation's only in the 1890s to become number 1 , even that happened only because America and the west introduces the new currency standard and gold standard which inflated the value of their currency and made the value of Indian currency far lesser , leading to them looking richer on paper and us looking poorer on paper , even now if the values of all currencies world over was made equal then India and China would still be the two richest countries on paper and in reality too , there's no doubt about it , just like the Europeans inflated the size of Europe on the map we all use normally , similarly they also inflated all their currencies to epic proportions just to make themselves look richer , this is all they have done , they can never become really richer than us , so they created this false image to make themselves look richer .
So we are led to believe that Alexander and Rome and Genghis chose to not come and conquer India , and this is absolutely stupid , it is the most silly fiction one can think of , India was richer than all of them , still they chose not to conquer India despite being utter barbarians , as I said

before no really thinking person would believe these useless tales .This is why the Romans and Greeks and Genghis never existed .

Now , Muslims are portrayed as fanatics who hate idolatry and will destroy idols anywhere and everywhere , if that is the case why did they not destroy all the so called ancient Egyptian statues and art , why are they building museums to showcase Egyptian art , why are they creating fake Egyptian artifacts on a daily basis ? Why did not destroy all the art of Mesopotamia, why did they not blow up the roman monuments in the middle East ? After all , they don't like Christian's , so why still keep the roman monuments in the middle East ? This is because they created all these fake Egyptian and roman and other civilisations along with the Christian's , so they won't destroy what they created in the last 100-150 years . They wanted themselves to have a glorious and gigantic past , so they created all these fake civilisations and fake monuments .
If they really invaded India and conquered India fully , then why did they not destroy the hundreds and hundreds of old temples still present in India , they say some temples were covered in mud before the Invaders came , but the Invaders would no doubt have had spies who would have given them the locations of all the temples , so why did they not destroy all the Hindu temples in India completely if they were such fanatics who hated idolatry ? The answer is , all of history is false , it is all totally illogical , they could cover up the lack of logic with a lot of reasons ,

but still the lies will all come out someday , thats all . So we can understanding that the Muslims never invaded India , they never had the strength and capacity to invade India , the only logical thinking is that Islam was brought to India by outside people and it was accepted here and allowed to flourish , Hindus made the mistake of allowing it to spread and flourish , Hindus alone are to blame for the present situation . Imagine India and Pakistan and Bangladesh were all one country today , there would be 55 crore Muslims and 110 crore Hindus and it would be a horrible situation , the Hindus brought about this situation by allowing an outside faith to grow here and encouraging it to grow here , we are our own traitors here and not the outsiders .

It is said that the first paper and books were created by the Buddhists , and Buddhism has its home in India , so paper making technology and book making technology would have been widespread in India for the last two thousand years easily , but why can't we find a single old book in India ? Even the Europeans say they have books that are a 1000 years old, but we don't have a single book that old with us ,why is this ? Is this even believable ? When they had books for the last two thousand years , why did they write tax records and land records and other such small things on temple walls as stone inscriptions ? The entire world had wars and calamities just like India , but in India not a single ancient book survived whereas in other lands many ancient books survived , is this believable at all ?

Absolutely not , the cholas and pallavas and vijayanagar Kings were among the richest on Earth , and yet they did not leave behind a single book , they left behind just copper plates and leaflets and stone inscriptions , leaflets survived whereas books did not survive , this is all totally bogus , they say the Buddhists created oil paintings but the the westerners took credit for it , this is how it all is , all real history has been completely destroyed , present history is all utter trash , worthless trash , it is not worth even talking about , one day they say they found out a bottle of wine that is 2000 years old , other day they say they found a 5000 year chewing gum and the next day they say a 10000 year old sample of human faeces , it is all so sick and so horrible , all these lies makes one want to vomit , modern history and research and archaeology are all equal to stinking sewage and nothing else , they all lack truth and merit completely .

They say guns existed in India in the vijayanagar period itself, but still tipu sultan and other Indian Kings lost to the British fighting with swords despite having advanced things like rockets , what a lie it all is . As per false history , The British waited until the mughals and marathas all got weakened and then stepped in and defeated them and acted like lions , such cowards , they couldn't take on these empires at their peak , so they waited until these empires got weakened and then conquered them , how could such cowards be called lions ? And even then , the British cowards ruled the entire of India for just 90 years

or so , and the last 30years of the 90 years was itself full of turmoil , so who was happy here , who was peaceful here , who enjoyed here ? Nobody , they were all miserable , the same is the destiny of anybody who ruled India after independence , they will all be miserable because of the constant struggle for power , and nobody could hold onto this power endlessly , it is all so temporary
, so transient , if they were really good and if they really did good then could have been in power always , but there is nobody here who can do this , so nobody will stay forever at the top , they will all come falling down sooner or later . So basically , as I said in the last book , the independence movement was a sham , the British never invaded India , never conquered or colonised India , colonialism never happened , India accepted Christianity and Christians like it accepted Islam and Muslims , so Indians alone are to blame for all the present problems .

Today the Europeans claim that they have been advanced and civilised since the 1500s, if that is the case then why did have to engage in colonialism , why did they have to loot from other lands if they had all wealth already , why did they have to even come to a third world place like India if they were all enlightened ? The truth is , the history of the enlightenment is totally false , they came to India because India was more wealthier than them all , they came to India because India was the source of all knowledge , they came to India to spread their faith so

their faith may gain weight and become big and powerful , they were dependant on India fully , but still they lie that they were enlightened before they came to India , they still lie that they came to spread civilisations to India , such a horrible lie it all is ,this is why I say entire history is a lie , they altered it all to suit the current image , they have been feeding us with endless lies and trying to brainwash us endlessly , that is the reality , education is being used as a tool to brainwash people rather than give them real knowledge and make them lively and bright and truly wise
, they are forcing their horrible lies down our throats and we are forced to digest these lies and accept them as truth and great knowledge , this is how the modern world is , there is nobody worth talking about , there is nothing worth talking about , living with family and thinking of the gods is the best thing there is to do here .

In old Jain temples and Buddhist temples in India you see statues of nude women , now the Buddhists and jains are atheists , they don't believe in a god , so why do they need temples and statues ? Why do they need statues of nude women ? Why are they having statues of nude women in their temples ? Is it just because they feel having such statues will attract more people at least for the art ? Maybe they feel that without these statues nobody would find their movement exciting or interesting ? After all , meditation is a bogus thing , no person with real thinking capacity could engage in meditation because their head is constantly filled with doubts and seeks answers and

yearns for more and more learning , a real genuine person could never do meditation , pretenders alone can do meditation greatly because they are just performing and not being real . You want to meditate and attain moksha , but why do you need nude female statues then ? You gave up all earthly possessions and material needs and passions , so that means you gave up on art too , so why do you need nude female statues when you have claimed to give up everything ? Hinduism always encouraged passion and living a normal life and happiness , so it has statues of males and females in sexual poses and that is acceptable
, but these other faiths , they talk about living a simple life and giving up all material things , but then they go about building massive monuments , and many of these monuments have nude statues too , so what sense does any of this make ? The dalai lama claims to lead a simple life , but he has a massive palace in Lhasa , so where is the simplicity here ? Why does he need so many attendants if he is such a simple person ? If the Chinese didn't drive him out to India , he would be living in his massive palace in Lhasa , and he would still be claiming that he is leading a simple life . It is all a sham . According to Christianity , Jesus asked his followers to lead a simple and frugal life , but we all see that the popes and the top people in the church all live like Kings , they don't live in simplicity , they don't lead an ordinary and normal life , so even the head of the religion doesn't follow what his master taught him , is how it is , it is all a sham . They say Gandhi lead a simple life , but look at sabarmati ashram ,

it is located in the center of Ahmedabad , it is prime real estate , how did he buy it if he was a simple man , who bankrolled it , instead of living in a real village somewhere in the woods he lived in an artificial village in the center of the city , is how it is . There were no famous gujaratis before Gandhi except maybe dayandanda Saraswati , but after Gandhi gujaratis have gone on to become the biggest businessmen and industrialists in the country , how did that community become so affluent all of a sudden ? It is all because of Gandhi and patel , they opened the gates for their community , and after the government was formed gujaratis got a lot of favours from the government and this enabled them to come to the top , the nehru family had parsi connections so they helped the parsi community to grow a lot , the parsis were just like the gujaratis , they were nowhere on the scene 150 years ago , but because a few members of their community became big the gates were opened to many more in their community and because of this their communities came on top , the gujaratis stay on top today because the national leader is a member of their community and he won't let his community down , he will declare his entire state as a world heritage site and develop his state in every way possible so his people will continue to vote for him always , is how it is . Despite Gujarat being a Hindu bastion today why have they still not changed the name of Ahmedabad which is a Muslim name , they change a lot of names these days , but why have they not changed this

name ?
If I wrote Les Miserables , I would have written it as follows :
Jean valjean is a poor young man living in the countryside with his parents and sister , he is a very strong man , he is a very good man , he is 25 years old and unmarried . In search of better opportunies , he comes to the city .
Fantine is a poor young girl , 18 years old , she is living with her mother in a small house in the city .
Valjean finds work easily because he is a strong and healthy man , he works and earns money and sends money to his parents and sister in the countryside . Due to his honesty and his great working ability , he earns a good amount of money and leads a decent lower middle class lifestyle .
Through an acquaintance he meets fantine , and they fall in love with each other , valjean and fantine marry , they have a child named Cosette , by the time Cosette is 18 valjean earns even more money and becomes a wealthy man and they move to a comfortable spacious home in the city , valjean had got his sister married to a man belonging to a respectable family , valjeans parents move in with him in the city and they all live happily together as a family .
Valjean also builds a beautiful compact country house in his native village , he visits there with his family now and then .
Cosette is married to a nice boy named Marius , they live happily together as a couple .
This is their story .

They faced all odds and obstacles and attained a comfortable lifestyle and lived happily ever after .
So this is my version of les Miserables , without all the misery and with positivity , it is after all a story , it doesn't have to mirror raw reality , it could be happy too , it is just a story , it is meant to illustrate a small point to readers - keep fighting , overcome all obstacles , you will attain a good and happy life . It's that simple . So this story doesn't need to be artistic , it doesn't need to be full of tragedy , it could be simple and beautiful , that is always best .
Any story can be told under 5000 words at most , any story can be told well in 5000 words , any story can be told told well under 10 pages at most , there is no need to write lakhs of words and thousands of pages , that is done solely to show the authors genius , but in truth the author is only showing his own stupidity and lack of understanding here , is the truth , a story has always got to be short and simple and positive , it has to give a positive message , a simple message , or it has to be used to make a simple point , that's all , it doesn't have to be huge and complex and unreadable .
Therefore , a short story is the only way in which a story must be told , novellas and novels are absolute garbage and not needed at all .
The original Mahabharata was just around 10 pages long and had under 5000 words .
The original ramayan was just around 10 pages long and had under 5000 words .

But foolish people added more and more to these stories and made them too big and destroyed the meaning and points expressed in these simple but beautiful stories .
Most of the original stories of the gods were just around 5 pages long and under 2000 words , whereas some like the Mahabharata and ramayana were around 10 pages long and under 5000 words , none of the stories were more than 10 pages long , none of the stories had more than 5000 words , is how it was .
But stupid people wanted to show their own rotten creativity and added layer upon layer and ruined the meaning and essence of all the stories . They failed to understand that simple and short was always best , in their ignorance they became convinced that Grand and complex was best and as result of this wrong idea everything was ruined .

If I wrote war and peace , it would go as thus :
Pierre is a wealthy man , age 25 , he belongs to a wealthy family and has everything .
His close friend is Andrei .
Through Andrei , Pierre is introduced to Natasha , a wealthy young girl , aged 18 , Pierre and Natasha fall in love and get married .
Pierre meets Nikolai , Natasha's brother , and they become close friends too .
So Pierre , Andrei , Natasha and Nikolai form a close circle .

Nikolai falls in love with Sonya , a poor girl , he marries her despite his parents objection to her being poor .
France starts a war with Russia and moves to invade Russia .
Pierre and Nikolai and Andrei decide to not fight in the war because they are against war and violence .
They move to the countryside with their families and live there until the war ends , all of them survive the war .
After the war , they start leading normal lives again , they live peacefully and quietly and happily always with their families .
This is their story .
Again , the story is positive and the characters are wise because they refuse to engage in unnecessary things like war and violence , and they all live quietly and peacefully and happily , so that is it , this is how a story must be .
Unnecessary tragedy and strain and pain are not needed , people already have enough of that in their real lives , art doesn't need to give the same things , art needs to give beauty and positivity and happiness and hope , that is the purpose of art , the purpose of art is not to show ones own intelligence and convoluted thinking , it is to show simplicity and beauty and encourage everybody to follow these good things and live in happiness .
The thing is , the gods did not try to make money or earn fame through leaving us many stories and knowledge on how to live and what to do , they were not trying to make a living , they were not trying to survive , they gave all those stories and knowledge only for our good , so we may

benefit , so we may learn and improve ourselves , so we may become realised and attain them ultimately . But the authors today seek to keep on writing endless number of pages and books for their own survival and living , for them it's just an occupation and nothing else , so they keep on churning out some rubbish or the other to make a living , is how they are , they take a single point and write an entire book about it , they engage in endless repetition to fill pages and make a living , it is all just empty stuff with real substance in it .
A story must be short and simple , the reader should have the freedom to imagine new scenarios and dialogues in that story and entertain themselves , the reader should have the freedom to think about that story in many ways and wonder over it , this is better than the author elaborately explaining every single dialogue and detail , the author doesn't need to say unnecessary details like ‘ the hero took a satisfying fart ‘ or ‘ the hero had a relaxing shit ‘ or such things like many authors write today in the name of honesty and realism , that is not honesty , that is disgusting , and such realism is unnecessary , story needs to be simple and beautiful and straightforward .

Anybody can write disgusting stories , here is one :
Disgusting story number 1 :
In a different world , men and women have the same physical features as they do on Earth except two major differences - women are physically stronger than men , and women have a penis while men have a vagina , so

men do the reproducing , otherwise the rest of the body structure is the same for men and women , men have flat chest whereas women have breasts , men have masculine features whereas women have feminine features .
So in this world , women beat up men regularly , men are often victims of domestic abuse , women rape men regularly , men are victims of sexual abuse , the courts and police are all run by women predominantly , so justice is always in their favour here , since most men are ugly they have no takers, women all want a handsome ugly , and if a handsome male refuses to copulate with them these women rape that male and have their way , they do this because they want a child who looks good rather than looking ugly .
Women hold all sports records and run the armies and militaries , whereas men stay at home and do the cooking and cleaning , women pray to only female gods because females are the dominant kind , if a male doesn't follow their words then the women thrash the male again and again until the male completely submits to them and listens to everything they say and follows everything they say , this is how things are .
In movies , women are the lead characters and heroes whereas men are the side characters who commonly get typecasted as the villains and get thrashed royally in every single movie .
In all greatest person lists , 98 of the top 100 people are women , whereas only around 2 men make the list , even that inclusion of men is solely for the sake of giving men at

least a tiny representation , 99% of politicians are women whereas only 1% of politicians are men and even this 1% of men compete from reserved constituencies , 90% of school and college graduates are women whereas only 10% are men , women rule and dominate in everything , they dominate men in sexual intercourse always , sometimes they thrash men in bed very badly if these men don't cooperate properly , so it is a world dominated by women and men are just unofficial slaves in this world .

Strange story number 2 :
In a different world , a person can be both a female and a male , one moment they are a complete male with masculine features and masculine body and the next moment they transform into a female if they want to with feminine features and a completely female body , so everybody has two identities , a male identity and a female identity , so a couple gets married , both of them can be males and both of them can be females too , so they take turns becoming pregnant , they take turns giving each other a child . So first one partner becomes a male while the other becomes female , and the male impregnates the female , the female gives birth to a child , and after a year the female partner takes a male form while the male partner takes the female form and the now male partner impregnates the female partner and they have a baby from that partner too , so both partners give birth to a baby each .one night , the first partner becomes male while the other becomes female and the male copulates with the

female , the next night the second partner becomes male and the first becomes female and they copulate like this too . One day the first partner becomes female and does the cooking and household work , the next day the second partner becomes female and does the cooking and household work .
Sometimes , both the partners take on a female form and they copulate with each other this way , sometimes they both take on a male form and copulate with each other this way , so all in all they are disgusting beings living in a very disgusting world .
This is how their world is .

The point of these two disgusting stories is - anybody can think in a disgusting manner , anybody can write disgusting stories , there is no daring or coolness in this , it is not rebellious or revolutionary , it is just absolutely unnecessary and stupid , that's all .

My version of The godfather :
Vito Corleone is a poor young boy who comes to America with his parents . He grows up and works hard and lives properly and earns money and wealthy and becomes a respectable person in society .many people around him take to crime and become criminals and gangsters , but Vito remains good and proper always and stays far away from wrong activities . He has 3 sons , sonny Michael and Fredo , they grow up to become hard working and good people like their father , they also never take to crime ,

Vito

also has a daughter Connie who gets married to a good man and lives happily , his three sons also marry and live a peaceful and happy life at home with family , Vito lives a long life , he sees all of his family living happily and that is enough for him , they have lead a clean and proper life , that is enough for him .
And the story ends with Vito playing with his many grandchildren and enjoying .
The end .
Why can't they make it positive and good like this , why all the unnecessary killing and crime and all that rubbish , it's all not necessary at all .

My version of Anna Karenina :
Stiva and Dolly lead a peaceful and happy family life with their child . Stiva's married sister Anna comes to visit them . Anna is married and living peacefully with her husband Karenin and their child .
Dolly's sister Kitty and Stiva's friend Kostya also visit them . Kostya likes Kitty , Kitty also likes Kostya's good nature .
At a party which all of them visit , a wealthy man called Vronsky introduces himself to the family , he expresses interest in Kitty , but Kitty feels he is not a right person and rejects him . He even expresses interest in Anna without knowing she is married , but she does not respond to him .
They understand Vronsky is not a good man , that he is a womanizer , they stay away from him and ignore him .

So Kitty and Kostya start moving with each other more , they like each other , they marry and live a happy family life .
All of them are living peacefully and happily with their families . They see count vronsky a few more times over the years at several functions , but they all ignore him and stay away from him .
Women are strong , they don't fall for such bad people and their games , they are never moved by bad people , they stay away from bad people .
This is the story.
The end .
Instead of this , the author wrote a usual European style trash story with adultery and unnecessary suffering , he wrote trash instead of writing what is proper and good .
Any story can be said in a few pages properly with a meaning like this . Ones talent with words is not important here , ones intention is important , the point one wishes to make is important , one's language needs to be simple and straight , all of these things are important , they matter most .
My version of ‘ the outsider ‘ by Camus would be :
The hero lives with his parents and wife in a comfortable house . They live peacefully and happily .
His father lives a long and healthy life and one day passes away . The hero cries a lot . He had lots of love and affection for his father . He wishes his father had lived forever with him . The hero organises a simple and graceful and solemn funeral for his father .

He will miss his father always .
But he knows he will go to the gods one day and he will meet his father there in heaven and he will be with his father forever there in heaven . So he will miss his father only until then .
He continues to live peacefully and happily with his mother and wife and child .
The end .
Keep giving people more and more good through art and literature and news and everything else , and they will try to be at least a little good and proper , but keep feeding people endless bad through everything and they will only become impossibly evil and destroy everything .

Anybody can write violent stories too , here are a few examples :
Violent story no 1 :

The hero is a realised man with superhuman strength and he is an eternal being , he cannot be hurt or killed or destroyed , he has no death at all .
He likes beating up outside people .
One day an auto driver was ride to him .
So the hero drags the auto driver out of the auto with animal force and brutally beats up the auto driver.
Seeing this other auto drivers on the road come to rescue their fellow driver who is being beaten up , these drivers attack the hero , but the hero brutally beats up each and every single one of them right there on the road itself .

The hero says - ‘ for a human being , you say a few words and they listen . But for monsters , you give a savage beating , only then they will listen ‘ .
The police come to the spot and try to stop the hero and arrest him , but he brutally beats up the police too .
Any public who comes forward to try to stop him is beaten up too .
Finally , the auto drivers plead to him ‘ leave us please , we won't try to cheat again , please leave us ‘ , the hero warns them and goes away .
The police can't beat the embarrassment , they bring many more police officers equipped with lathis and even guns to subdue and thrash the hero , but the hero overpowers them all easily and gives them all a brutal beating right on the road , thousands of people are watching the brutal thrashing he is giving them , he even thrashes the people there who are making videos the thrashing and posting it on social media or news channels , even the entire public tries to stop him but he uses his extraordinary strength and sends them all flying in all directions .
After royally thrashing them all , the hero goes home and eats well and takes rest .
The govt gives a shoot at sight order to kill the hero , so army and police and paramilitary all assemble outside his house , he comes out , they shoot at him , but their bullets do nothing to him , he thrashes them all brutally to the core , then goes inside his home , eats well and takes rest

again . Next , they shoot missiles at his home to destroy him , but no harm comes to him still , he still comes out and gives them a savage beating .
Ultimately the govt decides that nothing could be done to this problem and the govt advices the people to be wary of the hero .
One day , the govt tries to take away a piece of private land and erect telephone towers on that private land , they don't know that this land is owned by the hero .
So the hero goes straight to the parliament building , beats up all the police and soldiers there , goes inside the parliament and gives an extraordinary thrashing to all the politicians there , even their mothers wouldn't have given them such a thrashing , he stamps them savagely and just stops short of killing them .
After this episode , the government decides not to erect telephone towers on his land and they give him back his land respectfully .
Wherever the hero goes , he is given absolute respect because everybody is scared to death of him , nobody tries to cheat him anymore , nobody tries to hurt him anymore , nobody insults him anymore , they are all terribly scared of him , so they behave properly with him .
Even the roads in the area where he lives are properly maintained because he would thrash the government authorities brutally otherwise .
He is an unstoppable force , he is the force that all the human animals on Earth fear a lot , they tremble at the

sight of him , he is the man with limitless strength and energy , he is the child of the gods.
This is his story .
When it comes to dealing with monsters, nothing works better than a beating . That is the point of this story .

Violent story number 2 :
The hero is a realised man with superpowers .
One day , he is sleeping when he hears an explosion in the distance.
It is a terrorist attack , a terrorist bomb has detonated and killed many members of the public .
The hero gets a new idea after this incident .
He decides - ‘ those terrorists think they are biggest psychos , they don't know that I am the biggest psycho of them all , I will show them what terrorism looks like , I am not doing this because I feel any sympathy for the people killed by these terrorists , i don't feel any such sympathy , I feel why should the terrorists have all the fun , I want to have the same fun too , I want to engage in more terrorism than them, I will show what terror really is to the terrorists , that will be my entertainment ‘ .
So having decided this , he uses his superpowers to create 1 lakh bombs and then place these bombs in public places in all the lands controlled by the terrorists , the 1 lakh bombs all blasted at the same time , sending extreme terror into the hearts of terrorists everywhere , the hero watched the entire scene and enjoyed it a lot , the houses belonging to the terrorists were blown up , their

terror headquarters were blown up , it was quite a sight , one lakh bombs blowing up all over the place , whenever the hero got bored he would blow up a few thousands of such bombs in the terrorist lands , it became his regular entertainment , it was his much loved pastime , lakhs of such bombs went off continuously in all the terrorist lands and at first the terrorists tried to retaliate by placing bombs in lands they did not like , but after experiencing extraordinary violence and the extraordinary terror of it all the terrorists themselves gave up acts of terrorism , they stopped planting bombs in other lands , they gave up terrorism and became ordinary people again , the heros acts of terrorism reformed the terrorists themselves , the terrorists did change within , they remained the same evil people within , but they were scared to show their evil nature anymore because they feared getting blasted the pieces the moment they tried to do something bad , they became quiet because they understood some power higher than them is playing violent games with them , so they gave up engaging in violence . The hero used terrorism to remove terrorism , he showed who the most violent person was , he showed who the biggest monster was , he showed who the biggest psycho was , he showed that even wild monsters become quiet and tremble with fear when they confront monsters who are bigger and wilder than them , he showed dark people what absolute darkness really was and gave them fear , he got his entertainment and fun this way , he enjoyed blowing up people , it was exciting and jolly for him . This is his story .

The point of this story is - do not push people to the breaking point , do not bring out the monsters in people , if you do so then you will be genuinely terrified by these monsters people carry around within them , till then you would have thought that you were the most terrible and dangerous person , but after seeing the terrible monsters inside people you will become scared and you will become reformed . Terrorists exist only because the public still has a certain tolerance for them , if the public became terrorists then the terrorists would run for their lives , so the advice this story gives to terrorists is - don't push your luck too much , you will get wiped out if the people brought out the deadly terrorists inside each of them , people are not scared of you , they just don't want to engage in endless violence and war because they know it won't do anybody any good , this is why they are tolerating you and your sick activities , if they decide to fight back then you
will all be wiped out completely , so stay careful , don't bring out the monsters in people ,you will be finished then.

Anybody can write such violent tales , it doesn't take much effort and imagination to write such stories , thinking good and writing good is what takes effort and imagination . It is easy to have sick thoughts , it is easy to do sick things , it is difficult to have good thoughts , it is difficult to do good things , so there is nothing great about the mediocrity that is violence and war . One chooses not to engage in violence not because one is scared but because one has

tthe common sense to know that violence is an ugly and unnecessary thing that must be avoided always . Ones goodness must not be misunderstood as weakness and softness and fear , ones goodness must not be pushed to the breaking point , if one brings out the violence and monster within then all the monsters out there will be destroyed and finished , this is not needed at all , allow one to be good , allow a good person to live their life quietly and peacefully , do not trouble them unnecessarily , let them live well . They have chosen to remain good because they know it is the only way to happiness and a peaceful life , don't push them to a breaking point and make them bad . Good people don't like bad people , they seek to stay away from bad people always , but why are bad people constantly trying to irritate good people and ruin their lives , why can't they let the good people live in peace , why are bad people so sick and perverted all the time , but no matter how much they try to provoke good people , good people will not get provoked , they will remain calm and balanced always , they will keep quiet always because their gods will protect them , their gods will destroy all the bad people , so the good people have to do nothing but to sit quietly and watch everything , they will watch the bad people suffer and get destroyed , they will win the battle without fighting, their gods will destroy all evil , their gods will protect them and take care of them always , they will go to their gods and live happily with them forever .

Anybody can write romantic stories too , here are a couple of examples :
Romantic story number 1 :
The hero is a realised man with superpowers .
One day he is on the road when he sees a few goons killing a person , the hero could bash up all these goons and save that person , that is what heroes generally do , but our hero is different , he just stands quietly and watches the person being killed , he doesn't do anything about it , he thinks ‘ what do I care if some stranger is killed , it doesn't matter to me ‘ , so the hero never stops any atrocities that are happening around him ,he doesn't bash anyone up , he doesn't stand up for anyone but his own family , he just loves his life quietly and moves on .
In college , he sees a girl , he likes her , he tells her that he likes her , but she rejects him . She chooses another boy . That another boy manipulates the girl , he copulates with the girl and then dumps her and cheats her . The hero knows all this , but he doesn't bash up that other boy because he knows it is the girl who committed a big mistake by falling for such a fraud and trusting such a fraud and engaging in intercourse with such a big , so he feels no sympathy for the girl because it her mistake entirely , she made the wrong choice and ruined her own life .
After a few days , that girl approaches the hero and tries to be friendly with him now and signals to him that she wants him now , but the hero rejects her and moves on , he doesn't love that girl anymore because he feels she is a

brainless stupid , she came to him now only because she was cheated by the other boy , she does not really love the hero , she is just using him as a backup option because her first option failed , she is not a good person at all , so the hero rejects her .
Next , the hero is in his final year of college and he sees a junior girl and likes her , he tells her he likes her , but she rejects him too because she has her eyes on a boy who is richer and flashier than the hero . But that richer and flashier boy uses her and dumps her eventually .
The hero goes to work in an office , after a few years of working there one day he sees that second girl again , she now shows interest in him , but he rejects her , he refuses to be any girls second choice or third choice or fourth choice and so on .
The hero then marries a good girl via arranged marriage and lives with her peacefully and happily ever after .
This is his story .
Now , the point of this story is - those two girls who rejected the hero , they didn't know how to judge people properly , they fell for wrong people and trusted wrong people , the hero who is a proper and trustworthy person , had they chosen him first itself then they could have had real love and a good life and happy life forever with the hero , but they rejected the hero and acted so smart and ultimately ended up hurting themselves , they would have chosen the hero first itself if they had at least a little common sense and proper judgement , but their arrogance and oversmartness clouded their judgment

and common sense and made them hurt themselves ultimately, they became fools ultimately , which is why arrogance and oversmartness must be completely avoided , they only do great harm to a person , common sense and proper judgement is needed always.

Romantic story number 2 :
Hero meets a prospective bride .
Hero : what are your expectations about marriage ?
Girl : I have the following expectations :

1. I will continue working after marriage . I will not listen even if my husband and in laws tell me not to work, to go to work or not after marriage is my own right , and I choose to work lifelong .

Hero : hmmm mmmm , but I expect my wife to not work outside after marriage , I expect her to take care of the home and do necessary work like cooking , if both go to work then who will do the cooking , my mother will do it for some years, but she do it all by herself always because she will also grow old over time , work done in home is also important work , it is the most important work if you ask me , only if the home is proper and good will society be proper and good , if things are not well in the home itself then things won't be well in society too , is what I believe , is what I know .
Girl : it maybe true , but I have my own aspirations , my own ambitions , I don't want to be prisoned inside the house , I need my freedom , I need my independence , I cant be a housewife , I have many other plans too :

2. After marriage , i want to study for another degree . So I will be going abroad and staying at a hostel for 3 years and completing my second degree , I will visit home now and then , me and my husband will talk to each other through the internet , that is my idea .
3. After studying , I want to work in a big company here or abroad , if I get such a job here itself then I will stay here at home and go to work daily , but if I get such a job in other cities or in other countries then I will go stay there and work and my husband can come along with me there or else we will stay in touch with each other through the internet always .
4. Also , I will have a child only after completing my second degree , to me my career is most important , so a child will come only after my degree is completed.

Hero: but , according to the idea you are saying , we won't be having much of a family life at all , I can't leave my parents here and live elsewhere , that is out of the question , I will always live with them only , me my wife my parents and in the future my child , we will always live together happily , that is always my form idea , we need the presence of elders in the house , we always need the support of elders , the child should have the company of it's grandparents , it is all a beautiful thing , i can't give up all these things . I can understand you have your ambitions , but your idea is a western idea , it will only lead to loneliness ultimately , I don't want that for us and our child , a child born in loneliness will grow up to be a

depressed child , both the parents go to work and the child grows up in loneliness and becomes depressed , we might earn money and gain achievements , but ultimately our child will be unhappy , and if our child is unhappy then we become unhappy and all our wealth and achievements become meaningless then , is what I feel , this is what is happening everywhere , parents are chasing their dreams , children grow into lonely and depressed and unhappy and dark individuals , I don't want this at all , let us all stay in one place , let the wife stay at home and raise a happy child , let us have a normal and happy family life , is what I want .

Girl : sorry , but I don't think and feel the same as you do , my thoughts are different , my ideas are different , and I won't give them up for anything or anybody , how I raise my child is my own wish , I have my own ideas about it , If my husband wants a person to stay at home then let him stay at home and take care of the children and do the cooking and household work , those things are not for me , I will always be an independent woman even after marriage , nobody can control or dominate me , I will never allow that .

Hero : Nobody here is planning to control you or dominate you , I am just asking here for a balanced family life , you say men can do the cooking and take care of the children and home , yes men can do that , but no matter how good they are at cooking or taking care of the children and home they will never a mothers touch , a child needs a mother more than a father always , it needs a mothers

affection and love above all , a father can be a good father , but a father can never become a mother , no male can ever equal a mother , being an educated person and a woman you must have known this naturally , it's strange that you don't know it , for a child a father's cooking will never equal a mothers cooking , a father's care will never equal a mothers care , a child needs a mother to prepare it's food and take care of it always , a woman who can't and won't do this doesn't deserve to be a mother at all , it's best that such a woman never becomes a mother .
Also , you said it all so arrogantly , that the male can do all this work if he wants to but you won't do it , what a display of arrogance that was . I am not asking you to be the servant or slave of the house, I am asking you to be the woman of the house , and that is a respectable thing , you go to work under somebody and you obediently follow what your bosses at work tell you , is that freedom and independence for you , if you really want to be free and independent then set up your own business and make a success out of it , don't work under anybody and call that as freedom or independence , you will listen to your bosses obediently but you won't listen to your husband , how is that right , you will be kind and courteous to your boss but you will behave arrogantly with your husband , how is that proper , don't tell me what is proper or right , first you know what is proper and right , first give up that useless arrogance and start thinking and reasoning and learn the truth and then talk , being a salaried employee under somebody is free and independent for you , but

being a housewife is beneath your stature , is that it , is that your wisdom , it is not wisdom at all , it is foolishness , it is stupidity .
Now , we have a good amount of wealth , and there is no need for you to work under anybody else , there is no reason for both the couples to work because we are already wealthy enough and we don't need both the partners to work , in many places women choose to work because the family needs the income that they earn , but here we don't need your additional income , we are already living comfortably , so let us live happily and peacefully together , let us have a wonderful family life , is what I am trying to say , but instead of understanding all this , you just keep on talking something as if you know everything and I am a fool here , you will say I am a chauvinist for saying all this , but I am saying the truth and I don't regret it because I know I am right .
Girl : so you are trying to say that I am wrong , you are just another cheap male , you don't know how to a woman , you are just another male who wants to treat his wife like a slave . For your information , you might not need my income , but I need it , my parents need it, I have to earn and send them money monthly , my parents matter a lot to me , and I will take care of them always .
Hero : oh shut up , you say I don't know how to talk to a woman , maybe that's true , but you don't know how to talk to a boy either , I never had or will have any plans like making you my slave , I will treat you as my equal whether you acknowledge it or not , I will be loving to you always ,

but I doubt if you know anything about love , all you can think about is your career and nothing else , you are such a selfish and self centered person , you are not fit marriage and family life at all , anybody who marries you will only suffer , it will be a most unhappy marriage . And it is generally not a woman's duty and earn and support her parents , your father is working and your family is well settled , you have no need to support them , they are not really dependant on you , it's just an excuse you are using to go to work and escape from family life , that's all , you don't want to live with your in laws or husband , you don't want to even care for your own child , you just want to earn money and use that money to buy clothes for yourself or cosmetics and footwear and bags and other items for yourself , you want to use that money for your own needs and purposes , you feel that if you did not go to work then you will have to depend on me for money and everything and you wonder whether I will give you that much money as you are using now for your needs , and you are right , I definitely will not give you that much money for your personal needs every month , but that is how normal family life is , we can't keep on spending all the time excessively , we have to control ourselves , we have to limit ourselves at times , and happiness can be found even in this control , we don't have to buy luxury goods or designer goods all the time , we don't have to keep on buying clothes endlessly and building huge wardrobes , we can live moderately and still we can live comfortably with everything , that is what I know .

Girl : look , no matter what you say , my mind is already made up , its clear that you and I are not compatible , I will sure you will get a girl that will suit your requirements ,and I will certainly get a boy who will accept all my requirements , so I see no point in dragging this conversation any more , I am going to leave .
Hero : wait a minute , I talked so much , but why did you not really listen to me , why did you refuse to think about what I said , why did you refuse to understand what I said , it's because of that arrogance , that's it , that arrogance will be the cause of your downfall , you will suffer because of it .okay , let's say I accept to all your requirements and conditions , I also have one condition , will you accept to that ?
Girl : what is it ?
Hero : my condition is this , I will give you the freedom to study abroad and work anywhere you like and not work in the house , I will give you all that , I will accept all that , similarly I want to freedom to have relationships with many women , that is what I want , you are anyway going to be away from me for long periods of time , I need a woman for company and love and affection , so give me the freedom to be with many women happily , and I will happily accept all your conditions , you asked for many requirements , I just asked for one , will you accept it ?
Girl : chi , what a pervert you are , and you call yourself a good person , what a sick person you are ?
Hero : why am I a sick person , you have your needs , I have mine , your ambition is to rise up the corporate

ladder and earn lots of money and become a big and famous person . My ambition is to have a few good women for company always , I am not going to cheat them or dump them or ill treat them , I am going to look after them happily and give them love and take their love and I am going to enjoy and be happy , your happiness is in your career , my happiness is in love and the company of nice people , you are not going to give me love or company anyway if you are my wife , so give me the freedom to have many good women for company , I will live happily with them and enjoy life , I don't like your requirements , similarly I don't expect you to like my requirement either , but we can accept each other's requirements and form a marital agreement , what do you say ?
Girl : you are such an immoral person , I don't know how my parents said you were a good person , you are such a sicko , I regret coming here to talk to you .
Hero : oh , so I am immoral and you are so moral , is that it , you are a good person whereas I am a bad person , why is that ? Even the gods had many wives , so why can't I have relations with many women ? I can't have many wives legally because the law forbids polygamy , but atleast I can have relations with many good women whose company I will enjoy always and with whom I will be happy always , I am not being a Playboy here , I am not being a pervert here , I am not trying to cheat on you here , I am just asking what is fair , I gave you what you wanted even though it is all unfair , but I asked for a fair and good thing

, society doesn't know what is really good , society knows nothing about good and goodness , so society is not fit enough to judge me , similarly you are not moral enough to judge me either because you don't know what is good and right yourself , you just live for your own selfishness , that's all , so nobody is moral enough here to judge me , I know I am being correct , I also know it is society that is incorrect , so tell me , what is your final decision , will you accept my condition or not ?
Girl : I will not accept your condition , no girl will accept your condition , nobody wants someone like you , I don't want you at all, I am leaving .
Hero : okay leave , even I don't accept your trashy conditions , go and earn for your parents and live with them , don't marry anybody because you are unfit for marriage , you are not a woman at all , you are just trash , I don't want trash like you , nobody really wants trash like you , so get lost . I am not a dummy or robot to accept your sick conditions , I happen to be a real man , a real human being , go find somebody fake like yourself , but I will bet you , you won't live well even with another fake like yourself , you are unfit for family life , you are unfit to be a human being , you are a lifeless trash , so get lost .
She leaves .
He leaves .
Story end .
In this story , it is the boy who is right and correct , it is the girl who is totally wrong , but I am sure a lot of readers will object to this , this is because a lot of readers these don't

know what is right and what is wrong , they have some fixed wrong ideas and they live with these rotten fixed wrong ideas always , is how they are , so no use trying to make them understand what is right , no use trying to convince them , they will always remain ignorant and totally brainless , that is their destiny , that's all .

******

In Home, where the gods and their children live , nobody reads books there because they are realised and know everything .
In an ideal world , they have collected all the highest knowledge in a few books , but nobody reads these books because they know the entire knowledge thoroughly , it is all ingrained within them .
So nobody reads books in heaven , nobody reads books in an ideal world .
Nobody writes books in heaven , nobody writes books in an ideal world . So be it in heaven or in an ideal world , nobody reads and writes books , they just live happily and peacefully , they are realised , so they don't study at all , they just live .
The gods don't like fiction , they don't like stories , they don't like any form of fiction .
The gods did not give us any stories, the gods did not give us Mahabharata and ramayana and other stories , all this fiction was created due to our ignorance , our ignorance created all kinds of unnecessary fiction.
So all forms of fiction - stories , short stories , novels , novellas , plays , song , lyrics , music , opera , theatre , performance art , acting , drama , epics , dialogues - all of this is not needed at all , the gods absolutely don't like any of this , the gods absolutely don't like fiction at all .

Whatever the gods want to tell us , they will tell us directly in simple and straight words , they will tell us directly how to think and how to act and how to live , they won't use stories or any other tool to teach us , they will tell it all to us directly in simple talk , they won't tell us things in the form of dialogues like the Bhagavad gita , so they did not give us the Bhagavad gita too , that is also a creation of our ignorance .
The gods gave us only 1 book , and that 1 book contained all the essential knowledge of the universe , and this 1 book was enough to know everything , every truth was said in just 1 book and any more books was absolutely unnecessary , is how it was at the beginning .
But people destroyed this 1 book , took all knowledge in it , twisted all that knowledge in every way possible to suit their wrong needs , and then created the modern world .
Society is a failed thing , people are a failed thing , no use thinking and feeling for society and people , both are lost causes , both were never good , both will never be good , that is definite .
Pretenders will say they want to improve society and the human condition , they say so only because they want to become great people in the eyes of society and satisfy their ego and hunger for fame and name , they don't really care about society here , they care about becoming big people in society , they care about their own image and upliftment here , no really good person will come to public life because a really good person knows definitely that the public is totally evil and not worth saving , only pretenders will come to public life for their own personal advancement , they will sell fake things like ‘ development ‘ and ‘ progress ‘ and ‘ civilisation ‘ and ‘ equality ‘ and others to advance their own personal lives , nobody ever entered public life with the sole intention of doing good for the

public , they all entered public life solely for their own good and their own advancement , nobody really cares about the public here , even the public doesn't care about itself , which is why the public has gotten so rotten , so a really good person will give up all false ideas of trying to enter public life and doing good for the people , no good person will enter public life , they will all prefer private life and family life aways , is how really good people are , they know nothing is more evil than society and the public here , so they will seek to stay away from both .

So since I know that the public and society are so evil , why should I write a book for them , they wouldn't like my book or the many truths said in my book at all , they would only hate me intensely for saying all the truths about them , they will ban the book or burn it , and they will continue leading their corrupted and wrong lives like always , they won't change even 0.1% , so why should I write a book for them , why should I point out all their mistakes to them , they themselves know they are totally bad , so why should I say it to them too , I don't have to , which is why I decided not to publish this book , I might release it free on the internet so it may always stay there , but I decided not to publish it .
Besides , the publishing companies care only about their profits and margins , they don't care if the book they are publishing has substance or not , they will publish any garbage if it gives them a profit , is how they are , they are ready to publish any lies for money , they are all ready to publish any rubbish for money , and all the publishing companies work together to ensure that nothing good ever gets published , they will see to it that the truth never gets published , they will never publish the truth , they will never publish real knowledge , they will only publish lies

and fake knowledge , is how all the publishing companies are , and they are all run by corrupt people who are under govt orders not to publish anything that resembles the truth or real knowledge , they are ordered by the govt to never publish anything good or worthy , they are ordered by the govt to publish only rubbish at all times , rubbish needs to thrive for corrupt governments and corrupts societies to thrive , if rubbish is destroyed and good rises again then corrupt governments and societies cannot thrive as they are doing now . Not just publishing companies , all other institutions have the same basic policy - to suppress truth and good and promote lies and evil , they all do the same thing . Suppose a good and realised man wanted to get into some industry , they will impose all kinds of rules and conditions to prevent him from getting into that industry , they deliberately will make it really tough to get into that industry , they don't want good people anywhere , they don't want honest people anywhere , they absolutely don't want realised people anywhere , so good and realised people basically have no future here on Earth , they can't succeed in exams because all exams are rigged , they can't succeed in the workplace because only mediocrity gets rewarded in the workplace , they can never enter public life because public life is reserved solely for bad people , so good people can't really get into anything here , good people can never make it big here , is how it is , good people face endless barriers which they cannot surmount, an entire lifetime is not enough to surmount all the barriers bad people have placed in front of us , good people have no future here on Earth in these times , that's all . A good person has a good idea , but no matter how good that idea is , he will never find supporters anywhere , bad people would first crush him and then continue doing the same mediocre things

again , is how the world is .

****

****

An important thing :

The gods are my parents , I am their child , they are my family , I am their family .
Now , one doesn't pray to ones parents , one doesn't say prayers or mantras to ones parents , so I don't pray or say prayers or mantras to the gods because of this reason .
One doesn't sing songs in praise of ones parents , so I don't sing songs in praise of the gods who are my parents.
I think and have utmost respect for my parents , be it the gods or my earthly parents who are themselves children of the gods .
I believe and trust my earthly parents , but this belief and faith and trust in them cannot be called religion , similarly I believe and trust and have utmost faith in my gods who are my parents, and this belief and faith and trust in them cannot be called religion either , to me it is all family , there is no religion here , a thing called religion is absolutely not needed here , only that thing called family is needed here , so I see no need for Hindu and Hinduism and sanatana Dharma , I don't need these terms , I need only family , I don't need terms like indu and induism and religion , I need only family , the gods and their children are all my family , my family members , I have utmost affection for them , since I cannot see them here on Earth I create statues and paintings of them so that they are always with me and around me , I need their presence in some form or the other always , so I create their statues and paintings and keep it with me and around and see it in temples

always , their statues and paintings are not art to me , a photo of my earthly parents cannot be considered as art , a statue or painting of my earthly parents cannot be considered as art, I don't see it as art , it is all to me an indicator of their constant presence around me at all times , even if I can't see their real form here atleast they are always present around me in inanimate forms like statues and paintings and photos and drawings and prints , is how it is for me , so I see no religion or art here , I see family and memories here , that is my view of the world and life .

So In my list book I gave a list of things essential for life , now I will revise that list , these are the things that are most important to me in life :

1.Family (includes the gods and their children , includes my earthly parents and grandparents and greatgrandparents and wife and any child I may have) . So family is the most important thing in all of existence .
2.Home (where the gods and their children live)
3.Universe (including Earth and nature on Earth)
4.Comfortable and spacious house with all basic needs and comforts fulfilled on Earth.
5.Tasty and good food .
6.Essential knowledge of life . Realisation .
7. Representations of the gods and their children , from sculptures to paintings to drawings to prints and photos etc…. All these are representations of my family members , that's all .
8.Temples.

These are all the things that are important and necessary to me in life .

Things like religion , society , nations , nationality , public , patriotism , art , philosophy are not needed at all for life , they are not crucial things in life , they are just unnecessary things we acquire here on Earth , we don't need these unnecessary things at all .
So the things necessary for life are :
Family , Home , Universe , Comfortable House , good food , essential knowledge , representations of the gods and their children , Temples .

****

Every country has many many people , but not all of these people are called great people , in any country the so called ‘ great people ‘ make up only a very small fraction of the population , and it so wrong to call the entire country as great just because a few hundred people in it are called great . It is wrong to call an entire country's people as intelligent just because a few hundred people in it are called intelligent .
So who can be called a great person here ? Actors and politicians and musicians are all mediocre people , they cannot be included in the list of great people . The so called inventors and scientists are also mediocre people since they created nothing , it is the gods who created everything and invented everything . So remove mediocre people like scientists , mathematicians , explorers , inventors , businesspeople , politicians , Kings , revolutionaries , leaders , actors , musicians , fiction writers , statesmen , orators , comedians , performers , activists , economists , missionaries , sportspeople ,lawyers , priests , reformers , theologicians ,

religious gurus , psychoanalysts , military people , tech people , historians - all of these are mediocre people , these mediocre people need not be included in any list of great people because they are absolutely incapable of being great people , so all of them can be conveniently removed from any list of great people . Since fiction writers like poets and playrights and novelists are all removed , non fiction writers like economists and historians and science writers are also removed , if we remove all the unnecessary and useless people we are left with only kind of people that can be called great - the thinkers , whom they call philosophers .
Now , many many countries have produced no thinkers of quality , south America has not produced one great thinker , Oceania has not produced one great thinker , Africa has not produced one great thinker , Antarctica has no people therefore it has no thinkers , so 4 of the 7 continents have not produced one great thinker .
The middle East has not produced one great thinker , North America has produced maybe 5-10 thinkers of worldwide fame , China has produced about 5 thinkers of international fame , Japan and Koreas have not produced one great thinker till now , Russia has not produced one great thinker , in all of Asia only India and China have produced thinkers of quality , the rest of the Asian countries have not produced any quality thinkers at all .
In Europe , only uk , France , Germany , Italy , Netherlands , Denmark and Greece have produced thinkers , the rest of the European countries have not produced any thinkers of quality .
France has produced around 10-15 thinkers , Germany 10-15 , Italy 10-15 , Netherlands 5 , Denmark 1 , Greece 15-20 , that's all , so if we take an overall worldwide count of thinkers , the number is just around 100 or so , out of

billions of people born on Earth only 100 quality thinkers were produced , which is such a poor number , which shows clearly that no country or it's people can be called great , uk cannot be called great because it produced 15 thinkers out of crores of people born in it over the centuries , Germany cannot be called great because it produced 15 thinkers out of crores of people born in it over the centuries . Besides , Greek and Roman civilisation never existed , so the 20 Greek thinkers and the 5-6 Roman thinkers never existed , the 3 Chinese thinkers never existed , the old Indian thinkers never existed either , so basically most of the 100 thinkers never existed in real , their so called thoughts were all created by groups of people in recent times , so almost all of the 100 thinkers never existed in real , they are all fictional characters , so this is the state of the world we live in ,there are just around 5 real thinkers , and they all live in India , they all believe in the gods who their parents, they don't believe in pure logic and pure reason because one who believes in God cannot have pure logic or pure reason , belief in God defies all logic and reason and is above all logic and reason , so they don't waste time thinking about logic and reason , they don't care for logic and reason , they also don't care for morality because it is something which changes from place to place , everybody country and every society and every group of people have their own idea of morality , so morality is not a definite thing here , it is a very vague thing , so they don't care for morality just like they don't care for logic and reason , they just focus on their gods , live properly in their own simple way and go to the gods once their time on Earth is over .
Let's talk about morality . Now , Since we are all children of God , we are all brothers and sisters , so, according to strict morality humans must not have sexual intercourse

with each other because they are all siblings to each other , we are all brothers and sisters to each other since we are all the children of God , so if we have sex with each other that would amount to incest , so basically we are all committing incest with each other , is how it is in truth . However , we choose to ignore the truth and we create a fake moral structure , we say that some varieties of intercourse are incest whereas other varieties of intercourse are not incest , for example there is a family on Earth , the husband has intercourse with his wife and that is not incest , it is socially accepted , their son marries a girl from another outside family and has intercourse with that girl and that is socially accepted , their daughter marries a boy from an outside family and has intercourse with that boy and that is socially accepted , now all these forms of intercourse are in truth incest because all these people were created by God and are therefore children of God and are therefore siblings to each other effectively , but since society has formed its own rules to suit it's own convenience these forms of incest are considered normal and socially acceptable , whereas if the son and daughter of those parents had sex with each other that would be considered immoral and sinful and incest and unacceptable in society , so people have created bogus social structures to keep society moving , is the truth , basically all kinds of intercourse are immoral and incestuous and sinful because all people on Earth are siblings to each other essentially , that is the higher truth , everybody who has intercourse on Earth has committed an immoral sin , that is the truth , however people won't admit this , they won't admit that they have committed a sin , they all have sexual thoughts and sexual feelings , they all have immoral and sinful thoughts and feelings , people are all totally immoral , but they won't accept this ,

they will create a false system wherein a few sins are acceptable and moral , whereas other sins remain immoral and bad , people create fake rules to suit their own needs , they will make polygamy illegal and say monogamy is the best thing solely to give many other men the chance the get married and give birth to children and propogate the race , they banned polygamy solely for the purpose of advancing the population and ultimately advancing the economy so that they could make more money and be more wealthy , so polygamy was banned not for moral reasons , it was banned for personal greed , they limited man to just one woman solely for their own greed , there was no higher reason or morals here , those in public life do everything for money and power , they don't do anything for morality and higher purpose , they are corrupt , they will have several mistresses or homosexual relationships in private but in public they will act like pure men who married only one woman and lived perfectly with that one woman only , society is a total sham .

Scientists believe in fake things like atoms and molecules even though they have never seen these things , they believe these things even though these things don't exist at all , so how can their belief be called pure reason or pure logic , even they don't have reason or logic like those who believe in the gods , so basically nobody has pure reason or pure logic here , they are all unreasonable and illogical , that is reality , so why talk about things that don't exist , that cannot exist , why talk about reason and logic and morality when none of it exists , when none of it cannot exist in reality , why delude ourselves with such fake words that we cannot really follow or keep up with . So let morality and reason and logic go away , they are not needed .

People these days don't want just a good boy for their daughter , they want that boy to have lots of money and wealth too , now I am a good boy and I am wealthy , but if I was not wealthy then no nice girl would have consented to marry me no matter how much good I was , their parents absolutely would not have consented to give their daughter to me no matter how good I was because I had no wealth , even if the girls family had no wealth they still would want to marry off their daughter to a wealthy boy , they wouldn't want to give their daughter to someone who was on the same financial level as them , these parents all want to marry off their daughter to a rich boy , they are all greedy , they all want to rise up the social ladder , they all want their daughter to rise up the social ladder , is how it is , a girls family who has 20 crores wants to marry their daughter to a 100 crore worth boy , a girls family who has 100 crores wants to marry thier daughter to a 500 crore boy , this is how society is today , they all want to go above and above . Boys and their families have the same expectations too , they also want a good looking girl with lots and lots of wealth , but they don't get what they want usually , this is because a 100 crore boy will seek to marry a 100 cr girl or a 200 crore girl , but a 100 and 200 crore girl will be looking for a boy with 500 or 1000 crores , so they will reject that 100 crore boy even if he is good looking and good , so people endlessly play such money related games with each others , the 100 crore boy finally gets a 20 or 30 crore girl or even lesser , all his expectations get blown up and he finally gets a good girl who has much lesser than he expected at first , this is how things are happening today , so the boys looks and goodness is only secondary here many of the times , the boys wealth is what matters most , a good boy and good

looking boy with no money has no market today , money matters first , wealth matters first , everything else comes only after that , is how it is , and as usual morality is absent in all this because it is not possible at all in reality . People want to get the best deal in everything today , a girls parents will want to give their daughter to a boy with 100 crores even if their daughter has just 20 crores , and if these same parents had a boy too , then they would want to marry off their boy to a 100 crores girl even if that boy has just 20 crores , they will play games on all sides , they will want to win in all situations , they won't understand their level or limits , they want only the best for their children whereas they don't care whether others get the best or not , they want to rise up and that is all they care about , selfishness rules everywhere and in everything .

The world has so many economists , still none of these useless fellows could make the world a better place , they have only complicated everything , they have simplified nothing , they all work for the politicians and businessmen, they will do only those things which benefit the politicians and businessmen , what they care about is becoming wealthy themselves and living wealthily and comfortably always , all economists are frauds , they will never make anything better or simpler or easier , they are all criminals .

****

These days , Indians work for foreign companies from India , they work in an office in India or they work from home in India , they do all the dirty work the foreigners tell them to do , and they get paid handsomely for doing all that dirty work , a lot of tech workers do exactly this , they

are bound by contract not to talk to outsiders about the work they are doing , they do all kinds of dirty work for money , that is their livelihood .

The real value of any number is 1 . The real value of infinity is one . Take the number 8 , it was formed because 1 was added to 7 , it was formed because of 1 , it's real value therefore is 1 . 1 is necessary for any number to be formed, 100 is formed because 1 is added to 99 , therefore the real value of 100 is 1 . So infinity also has a value, and that value is 1 , no matter how big a number is it's value is always 1 . That is the power of 1 , without 1 no other number can be formed , even zero informed because 1 is removed from 1 , -1 is formed because 1 is removed from zero itself , so the real value of zero is also 1 , the real value of -1 is also 1 , the real value of -infinity is also 1 . That is the magic of 1 .

If the earth did not have an atmosphere , then the earth would have no day at all , the earth would always be dark if it didn't have an atmosphere , even if the sun was in our view still we would have no daylight if we had no atmosphere , so sun is not responsible for giving us daylight , it is the earths atmosphere which is responsible for giving us daylight , the sun's light doesn't illuminate space , the sun's light doesn't pass through space and reach us ,so the sun is not responsible here for giving us daylight and blue skies ,it is our own atmosphere which is responsible for giving us daylight and blue skies , is how it is , we cannot go beyond the earths atmosphere , but if we could then we would have seen clearly that the sun is just a bright orange ball of fire in the distance , we could see

the sun directly with our naked eye without blinking at all, however , our earths atmosphere has a self illuminating property , the changes in the earths atmosphere produce day and night , we would have day without the sun , we would have daylight without the sun , we would have blue skies without the sun , we are not dependant on the sun for light and life , the earth has a self sufficient mechanism , without the atmosphere the sun's orange burning will fall dimly on us like the moonlight , it will be dark but dimly lit like the moonlight , but because of pressure changes in our atmosphere , the sun's orange light is converted into a bright tube light that makes us blink and turn our eyes away when we see and makes the skies blue and in many other different colours too , so all the daylightand blue skies we see in the 30 km strip we live in us produced by our own atmosphere , above 30 kms from the sea level the sky becomes totally dark and the realm of space begins , above 30kms from sea level the sky is always dark , there are no atmospheric changes at that height and as a result no daylight or blue skies are produced at that height , at that height the atmosphere is fixed and constant always and it is called space .

The atmosphere is responsible for giving us heat and cold too . Mountain tops are closer to the sun than we are , so one must expect mountain tops to be hotter than land at sea level , but instead we see that the higher we go the colder it gets , so the sun is not giving us heat here , it is our own atmosphere which is giving us heat , it is our own atmosphere which is giving us varied climates , our own atmosphere is making the dim orange light of the sun look like a bright tube light , the earth is a self sufficient body , it is not dependant on any other heavenly body for anything , it has its own self sufficient operating mechanism . That is how it is .

Since people have no morality , they have no virtue either , and since they have no morality and virtue they have no character either , and since they have none of this they have no ethics and Integrity and dignity and honour . Why are so many words needed - morality , virtue , righteousness , character , integrity , ethics , principled , just , respectable , proper - why are so many words needed unnecessarily , they are absolutely not needed at all .
A person is of two types - good and bad , that's all . A bad person is of only one variety - ignorant . A good person is of two varieties - realised or ignorant . A bad person is always ignorant. A good person is born ignorant here , but through constant learning they can reach realisation . A good person can have many flaws due to ignorance , but they will remain good always , by birth their nature is good , and they may make mistakes out of ignorance , but they will never become bad , they will never be bad . A realised person is a learned person , an intelligent person , a wise person , but why use so many words like wise and intelligent and learned and enlightened unnecessary , let's just use realised .
A good person is always in learning , a bad person never really learns , a bad person pretends to learn and pretends to know , but a bad person will never learn or know .
When a few people gather and talk happily and humorously , that is real humour , standing on stage and telling jokes is not humour , performing antics on stage and screen is not humour , real humour is when people gather and talk well and humorously and have a good laugh , that is genuine humour .
Oratory is not needed at all , a few people gather and talk about everything well , that is the best form of

communication , that is the most desired form of conversation , standing on stage and talking forcefully is not needed at all , oratory is absolutely not needed at all , preaching is absolutely not needed at all , normal and natural conversation is the best form of communication always .

The gods and their children in Home , they are always happy and peaceful , they are the real livers .
In an ideal world , the realised people are also always happy and peaceful . They know all the essential knowledge there is to know , they have no confusion or doubts , they are not in learning stage because they are already realised , so they are also always happy and peaceful .
But in this unideal world ,a good person experiences a lot of thoughts , I have said that feelings are also thoughts , so good people experience a lot of thoughts both good and bad and in between , and bad people also experience all these kinds of thoughts , this constant flow of thoughts makes people unstable and imbalanced and unhappy and they have no peace as a result , but through constant learning people can slowly attain stability and balance and happiness and peace , it is very difficult to attain no doubt , but through constant trying one may reach it at some point in their lifetime here.
A happy and peaceful person always behaves so well , talks so well , does everything so well , a happy and peaceful person is always so pleasant and graceful and pleasing and beautiful in their talking and behaviour and action .
A realised person does everything in relation to the gods , in their homes they worship statues and paintings of the gods , they treat their home as a temple , they keep their

home clean and beautiful always because the gods live in it , they keep themselves clean and proper always because they are in the presence of the gods in their home , home and temple are both one and the same to them , they keep their home and surroundings clean and proper always , they keep their workplace clean and proper always , they always keep the temples in a very clean and proper state , they respect nature and keep nature clean and well too , they take such good care of the animals in their keep too , they lead such good lives , they lead happy and peaceful lives .and to their family members , they show utmost affection , which is called love , and to their partner they show physical affection in the form of sexual feeling and sexual activity , they enjoy sexual intercourse a lot too because it strengthens the bond between two people and makes two people so close to each other , so they like sexual activity a lot too . They are humorous and playful and happy and plesant and peaceful always ,is how realised people are .

On the other hand , ignorant people and bad people experience endless varieties of thoughts in various degrees , they create all sorts of unnecessary thoughts and trouble themselves with it all , they suffer a lot because of the instability that they get because of such thoughts , they go through endless confusion and doubts and imbalance , they get become steady only through learning , but since bad people never learn they are always unstable and unstaedy and imbalanced and filled with confusions and doubts and ignorance always , as a result they are never happy or peaceful , they are incapable of being happy or peaceful , is how they are. Good but ignorant people experience all the instability and unhappiness that comes with it , they decide to learn and

attain peace and happiness , they decide to remove unnecessary thoughts , they decide to remove unwanted things in their life , they strive to attain peace and happiness always , is how they are .so basically there are three types of people - good and realised people , good and ignorant people , bad and ignorant people , I come in the second category of good and ignorant because there is still a lot that I need to learn , the gods and their children in home all come in the first category of good and realised people , they are the truly great people .

This is all there is to know about people and their thoughts , thoughts includes all their feelings ,when I am feeling something I am essentially thinking , so feeling is nothing but a thought too , and a thought of happiness produces a certain effect of lightness in the body , a thought of sadness produces an effect of heaviness in the body , this lightness and heaviness are sensations produced in our own body due to our own thoughts , fear or anger or guilt produce other kinds of sensations in our own bodies . Sensations are of two types - external and internal . External sensations are heat , cold , touch , smell , sound , sight , softness , hardness , roughness , smoothness etc…. . Internal sensations are taste , pain , irritation , itching , sensations produced due to various thoughts , discomfort , soothing etc…. It is upto us to try our best not to experience those sensations we don't like and increase our experiencing of sensations we like , by doing so we move closer to happiness and peace , the more we experience sensations we don't like the more unhappy and imbalanced we become , the more we experience sensations we like the more happy and peaceful and balanced we become , so avoiding unwanted sensations and experiencing more of sensations we like - this is

accomplished through gradual learning alone.
So these are the main things concerning a person - their thoughts , their sensations , their basic nature , their level of knowledge - these are 4 main aspects of a human being , the fifth main aspects is their actions , so there are 5 aspects of a person - their thoughts , sensations , basic nature , level of knowledge , actions . These are the 5 main aspects of a person .
Actions can be internal and external too , external actions are of many many varieties like walking , running , exercising , dancing , jumping , swimming , lifting , pulling and so on , internal actions are eating , breathing , drinking , talking , smelling , pissing , excreting and so on . In addition to these external and internal actions , the Divine energy which fills the entire interior of the body is responsible for the running the entire body properly , without the Divine energy our body will collapse in a moment , nothing is possible without the Divine energy .
Now , learning can help us determine which actions are good and which actions are bad , which actions are necessary and which actions are unnecessary , learning will teach us gradually how to act properly at all times and in all situations . One cannot act in a certain way only in all situations ,ways of actions vary depending upon the situation , so one must learn to vary ones action properly according to the situation , so having a few fixed rules and following only these fixed rules in all situations won't work out properly , it will only lead to mistakes being committed , so one must never be totally fixed in ones actions , one must vary ones actions properly according to the situation always , what is needed in that particular situation must be done correctly always , variations in ways of action and intensity of actions is of utmost importance always , in some situations ones actions must

be of low intensity , in some situations it must be of high intensity , in some situations actions must be gentle and soft and smooth and graceful , in some situations actions must be intense and hard and rough and crude even , it all varies depending on the circumstances , bad people will almost always give wrong reactions in most situations , good but ignorant people will also give wrong reactions in many situations due to lack of proper knowledge , but realised and good people will always give the perfect reaction to any situation , they know how to act where , they know how to react where , reaction is just another action , reactions are actions too , so the realised are masters of action as they are the masters of their thoughts and sensations and they are equipped with both a good nature and realisation , that is how they are , the realised people.

This acting properly according to the situation , some call it common sense , it is most important for one and all , most of the people in the world are doing mistakes upon mistakes all the time because they haven't cultivated this ability to act properly according to the situation , they try to be the same at all times and they end looking stupid as a result , their failure to vary and show proper variations makes them look like fools .

So this is the general idea of human nature , these are the 5 aspects of human nature , these are the important things to know about human nature .

******

What is happiness ? Happiness is being in the company of family always , happiness is being in the company of the gods and their children always , I am a child of the gods

too , so being in the company of the Divine mothers who are my parents is happiness , being in the company of all my siblings is happiness , being with family always is happiness .
What is peace ? Peace is the same as happiness too , being in the company of my mothers and siblings always is peace .

As said before , mind and soul do not exist , the Divine energy in ones head is responsible for thoughts ,the Divine energy in ones entire body is responsible for sensations , this Divine energy is everywhere and all permeating .

******
The catholic Church is not wealthy , it is running on a huge loss , governments all over the world are supporting it and helping it to survive , they say the catholic Church is the richest organization , but this is not true , in reality the church is poor and is dependent on governments all over the world for it's survival , that is the reality of the church .

The following names - John Barrymore , cary grant , James Stewart , Gene Kelly , Ramon Navarro , John Gilbert , john Wayne , Clark Gable , James Stewart , Gary Cooper , Spencer Tracy , sid Caesar , Burt Lancaster , Kirk Douglas , William Holden , Marx brothers , Groucho marx , Alec Guinness , Laurence Olivier , Robert mitchum , Douglas Fairbanks , Errol Flynn , Fred astaire , Paul Newman , Robert Redford , Michael Caine , Charles Laughton , Sean Connery , Roger Moore , John candy , Donald Sutherland , Frederic march , Robert donat , Gregory peck , Sidney Poitier , Jack Nicholson , Clint Eastwood , Burt Reynolds , rock Hudson , Paul Muni -

how many people of my generation have even heard these names ? Hardly any , just a handful would have heard all these names , they are all old Hollywood actors , I have seen a lot of their movies , i am sure not many Americans and britishers of my age would have seen the movies of all these actors , very very few would have seen their movies . I take an interest in everything , so I try to see and experience everything possible , be it old movies or old music or old videos on YouTube and elsewhere and so on , I see old videos of interviews on YouTube with writers and philosophers and politicians and actors and others , I try to see everything , I feel I may get a new idea somewhere in my constant searching , a new information here and there I may get and it may help me advance in my learning , that is how I am , I engage in constant learning . Of all the western actors , I felt the most talented was John Barrymore , the most talented comedians were Chaplin and Sid Caesar . I used to see so many Hollywood movies , I used to see movies by the following directors - John ford , Frank Capra , Billy wilder , Howard Hawks , ingmar Bergman , Akira Kurosawa , yasujiro ozu , kenzi mizoguchi , Francois truffaut , Claude chabrol , Federico Fellini , pier Paolo pasolini , Sergio Leone , Eric Rohmer , Woody Allen , Preston sturges , William Wellman , Elia kazan , William wyler ,George Stevens , John Huston , Jean luck godard , Jean Renoir , Robert bresson , Andrei tarkovsky , Sergei eisenstein , andrez wajda , krygytof kieslowski and many more - I have seen many movies of these directors too , I have tried sincerely to gain a lot of experiences, I have tried to see everything and know everything , from movies to music to photographs to general knowledge to dance to books to many many other things , I have tried my best to know everything that is there in the world , and this is something

most people never do , a very few handful of people take an interest in everything happening in the world , there are maybe just around 10 such people in the entire world , and I am one of them , only around 10 people in the entire world take an interest in everything , and I am one of them , and I know of another person who belongs to this 10 , it is my father , I learnt from him how to take an interest in everything , and because of this I am always entertained , I am never bored , I always have something to keep me engaged , I always have something to keep me interested . Most people these days get bored easily because they don't have the interest in them to try to know everything and try to experience many things , they see a few videos on Instagram and YouTube and that is the end of their experiencing , they know absolutely nothing beyond a few current events , they know absolutely nothing about the whole wide world that they are ignoring to see and experience , they know nothing about the past , they know nothing about the future , they will know nothing about the future too , that is how they are , they are all living in a dream world , in an illusory world , they are all living deeply in their own massive ignorance , to them the past never existed , and the present is limited to local news and gossip and the future they never really think about , they are all blind ignorant people today . How many of these authors have they read or heard about or tried to read - Plato , Aristotle ,Socrates , Rene Descartes , Baruch Spinoza , John Locke , David Hume , Thomas more , Emmanuel Kant , Arthur schopenhauer , hegel , David Hume , Adam Smith , Thomas Paine , George Berkeley , Francis bacon , Michel montaigne , Seneca , Marcus Aurelius , Cicero , Epictetus , Blaise Pascal , Simone Beauvoir , Fernando pessoa , Huston Smith , Confucius , mencius , lao tzu , Edmond Burke ,

John Stuart mill , Bertrand Russell , desiderius Erasmus , Ludwig Wittgenstein , Friedrich neitzche , Soren Kierkegaard , ludwig Wittgenstein , John Maynard Keynes , Ayn Rand , Michel foucoult , Voltaire , jean Jacques Rousseau , Niccolo Machiavelli , Karl Marx , Friedrich Engels , will Durant , Arnold toynbee , Edward Gibbon , Peter Watson , David graeber , amartya sen , Edmund husserl , Martin Heidegger , Franz Kafka , albert Camus , Emma Bronte , Charlotte Bronte , Jonathan swift , Jorge Luis Borges , Paulo coelho , Edgar Allan Poe , Nathaniel Hawthorne , Victor Hugo ,Geoffrey Chaucer , John Milton , Francois rabelais , Shakespeare , Montesquieu , Denis diderot , Gustave Flaubert , honore de Balzac , Marcel proust , guy de maupassaunt , Jules Verne , Alexandre Dumas , Arthur Conan Doyle , Agatha Christie , Harold Robbins , Robert Ludlum , Arthur Hailey , gore Vidal , William Buckley , dh Lawrence , Philip Roth , Lawrence sterne , Thomas Hardy , James Joyce , Virginia Woolf , Oscar Wilde , Ernest Hemingway , Leo Tolstoy , fyodor Dostoevsky , Anton Chekhov , Mark Twain , f Scott Fitzgerald , John Steinbeck , Tennessee Williams , John Updike , John Kennedy toole , William Faulkner , George Eliot , jd Salinger , Edith Wharton , em Forster , Walt Whitman , Charles Dickens , o Henry , ts Eliot , Virginia Woolf , Naomi wolf , Gunther grass , haruki murakami , Rumi , Hafiz , firdousi , orhan pamuk , aeschylus , euripides , Homer , Herodotus , Livy , Plutarch , Sophocles , Moliere , Samuel Beckett , Susan Sontag , Arthur Koestler ,Dan brown , Danielle Steele , Arthur Miller , Jack Kerouac , Joseph Heller , Kurt Vonnegut , Aldous Huxley , Ron Hubbard , Isaac Asimov ,Ray Bradbury , Salman Rushdie , Gabriel Garcia Marquez , chinua Achebe , Maxim Gorky , Nikolai gogol , Alexander Pushkin , Jose saramago , Mario Vargas llosa , federico Garcia Lorca ,

Miguel Cervantes , Pablo Neruda , italo calvino , Octavio Paz , Umberto eco , Carlos Fuentes , jm coetzee , Alan Ginsberg , Alain de botton , Rolf dobelli , Herman hesse , Thomas Mann , Wolfgang Goethe , Friedrich Schiller , Grimm brothers , Hans Christian Anderson , Henrik Ibsen , Stephen king , George orwell , Upton Sinclair , Evelyn Waugh , Robert burns , Walter Scott ,Robert Louis Stevenson , Lord Byron , Samuel Taylor Coleridge , John Dryden , Dante , Virgil , rabindranath tagore , toni Morrison ,Collette , baudelaire , jean Paul Sartre , Andre gide , John Galbraith , Noam Chomsky , gore Vidal , saul Bellow , Hunter Thompson , Graham Greene , Joseph Conrad , John Bunyan , Daniel Defoe , John let carre , Somerset maugham , Ken follett , Rudyard Kipling , Harold Pinter , kazuo ishiguro , Christopher hitchens , Stephen Hawking , Richard Dawkins , Osho , j krishnamurti - how many have heard or read all of these authors ? I don't like any of these writers , but still I read or tried to read all of them , I made so many attempts to study their work and know their ideas and know what they are all about , I was curious to know their thoughts and ideas , so I read them all in some degrees , and I liked none of them or their ideas , I rejected all of them completely , if I did not read them then I always would have felt that I missed out on some essential knowledge or some essential learning , so I tried to read everything , and after getting a general idea of how it all was I rejected it all ultimately , is what I did . All the actors and directors , I rejected them all too ultimately , rejected all their work ultimately , but it was a good timepass while it lasted , experiencing all these different kinds of things .

I watched all kinds of dance and listened to all varieties of music too , ultimately I rejected all that too , I even

watched fashion shows a lot for new styles , and I rejected them all too . I watched the dance videos of Uday Shankar and listened to the music of many individuals and music bands like the Beatles , Abba , Pink Floyd, boney m , Rick James , donna summer , Irene cara , Lionel Ritchie , Michael Jackson , Bob Seger , Eric Clapton , Bob Dylan , bruce Springsteen , Queen , Elvis Presley , Frank Sinatra , bb king , James brown , Bob Marley , Jimi Hendrix , Bryan Adams , lipps Inc , Imagination , beegees , Berlin , Giorgio moroder , ennio morricone , Stevie wonder , Beach boys , Simon and Garfunkel , the Carpenters , creedence Clearwater revival , Marvin Gaye , Tina Turner , the doors ,rolling Stones , Styx , Jim Reeves , pandit ravishankar, osibisa , foreigner , air supply , Isley brothers ,Aretha Franklin , Engelbert Humperdinck , Tom Jones , Ray Charles , Elton John , David Bowie , kiss , rod Stewart , Mozart , Bach , Beethoven , Tchaikovsky , Chopin , Brahms , Wagner , Handel , Stravinsky ,Verdi , Mahler etc.… - I used to like a few songs of some of them , but I rejected those few songs too , I almost never listen to songs today , lost interest in it , lost all liking for it. But I am a good singer myself , I can sing carnatic songs as well as movie songs. I never tried to become a professional , but I am a good singer .

In art , how many have heard of the following names - Leonardo da Vinci , Raphael , Michaelangelo buonnorato , Titian , Johannes Vermeer, Paul Cezanne , Vincent van Gogh , Hans Holbein the younger , John constable, Jan van eyck , auguste Renoir , auguste Rodin , Henri Matisse , Rembrandt van rijn , Claude monet , Caravaggio , Jmw Turner , Paul Gauguin , Edward munch , Peter Paul Rubens , Gustave klmit , Eugene delacroix , el Greco , Caspar David Friedrich , Edgar degas , Georges Seurat ,

tintoretto , Sandro Botticelli , David hockney , heironymus Bosch , Edward hopper , Hans memling , Modigliani , Rene Magritte , Giorgio de chirico , jean Dominique Ingres , Antonio canova , Gian Lorenzo Bernini , Donatello , Salvador dali , Picasso , Paul Klee , Georgia o Keefe , Mary Cassatt, berthe morisot , vigee le Brun , jean Leon Gerome , William bouguereau , Lawrence Alma tadema , Frederick Leighton , James Tissot , Alphonse mucha , John William godward , James Whistler , Ivan aivazovsky , Henri latour , Francisco Goya , John singer Sargent , eduard Manet , Thomas Gainsborough , Antony van dyck , george Frederic watts , jean Jacques henner , Camille corot , Joaquin sorolla , John William Waterhouse , Francesco hayez , Ivan shishkin , Gustave courbet , Gustave Moreau , maurice de la tour, Norman Rockwell , Frida kahlo , Gerhard Richter , Richard Estes , Ralph goings , Duane Hanson , etc… - I have seen all their artworks , and I rejected it all , it all seems attractive at first , but becomes empty sooner or later , and I rejected it all. None of their work is really worth it , it is all hyped to great proportions , they try to make people look ethereal instead of real , they try to make people look dreamy instead of real , they try to give dreamy unrealistic visions of everybody , they don't give the realism or ordinariness at all , they don't give simplicity and real beauty at all , they want to make everybody look like angels with halos instead of normal real beings , in their paintings people look so bright as if heavy lighting was focused onto them , the normal skin is not shown , angelic bright white skin is shown , even the gods in reality are not that bright or that white , they don't look as if focus lights were on them all the time , they don't have halos around them , halos are just a representation we give them as a symbol of respect and reverence , so in western paintings they make even

real people look like unreal bright and white angels , their representation both of human beings and buildings and nature is totally unnatural even though it looks realistic , it all looks totally unnatural and artificial . It is true , paintings and sculptures can never be absolutely real and realistic , they can never show what is exactly there , but atoeast they can be ordinary and normal , they don't need to show something more than the reality , they don't need to show everything in a dreamy and ethereal way which is more than reality , it is better if they showed everything in a way that is ordinary and lesser than reality , that is best rather than showing everything in a fantastical manner just to captivate audiences even more , ordinary is what is best and beautiful , I prefer an ordinary photo of myself instead of a photoshopped photo where I look like an angel with spotless skin and haloed face , I want reality, I don't want more than reality , I would prefer lesser than reality instead of more than reality , I would prefer ordinary and simple beauty instead of ethereal and fantastical beauty , ethereal might be great to look at in photos or paintings but it wouldn't look great in real world at all , it would look unnatural and artificial and ugly in the real world , so I don't want dreaminess at all , I want ordinariness and simplicity in art too , that is best , I prefer art to be less than real instead of more than real , more than real or ethereal is not needed at all , it is unwanted and unnecessary and not perfect at all , ethereal may seem perfect but in reality it is only imperfect and not suitable and ugly .so I want ordinary and normal and real even in art .

Showing veins and separate muscles and bones in art is not genius , the gods don't have veins or muscles it bones in their body , they have nothing but Divine energy in their entire body and this gives them their beautiful perfect

flawless human shape , so showing biceps and triceps and bones and vessels in statues in not genius , it is not necessary , if not shown it will be more beautiful and flawless and graceful and streamlined . The gods also don't have unwanted things like nails and beards and mustaches , so not showing these things is more beautiful and perfect .
When you see a performance on screen ,be it dance or acting or singing or music , it all looks attractive and captivating and it creates a certain magical effect on you , but when you go to a theatre and watch a live performance of the same acting and singing and dance and music that same magical effect is not there , it all seems ordinary and normal when you see it as a live performance , but when you see it on screen it looks out of the world , so the screen creates a magical effect , everything looks more attractive when seen on the screen , even grass looks more attractive when seen on the screen , but when you see it live in person the same Aura and mystique and magic is not there and it all looks ordinary and normal , that is the power of the screen , be it a TV screen or the silver screen , it makes everything look different and gives everything a certain magic and attractive look , so a live performance will never give the magic of the screen , when you see a live performance all that attractiveness is gone and it all looks quite plain and quite disappointing because the magic is missing . This is why a theatre performance will never equal cinema , a street performance or concert performing or stadium perfoance will never equal cinema , cinema is the most attractive and addictive medium ever created , no other entertainment form can equal it or surpass it in terms of addictiveness and attractiveness and that certain magical quality , they say social media and it's endless variety of

content is more addictive than cinema , but that is not true , go and ask any social media personality or influencer what their biggest dream is and they will all say their biggest dream is to make it big in the movies , social media for them is just a entry level platform to get noticed so they may make it to their dream industry one day - the movies , so everybody wants to be a movie star , everybody wants to act in the movies , it's everybody's fantasy .

People want to stay in the limelight always , they want to be famous always , and there are two ways of achieving this - the first is politics , where you rise to the top and stay in top positions all your life , till you are 70 or 80 , however this is not the best route in America where you can be the president for just 8 years maximum and then you retire and people largely forget about you , but in India you can stay in the top positions till you are 80 or even 85 these days , you can stay in the limelight for a long long time in India if you are in politics . The second is cinema , where you can continue acting in movies until 80 or even 85 these days and you stay in the limelight for 50 -60 years or so , so politics and cinema and two great ways of staying the limelight always . Of course in sports one gets famous , but the problem is , in sports your career is largely over by the time you are 40 , and a few years after you retire some new stars come and people forget you largely , they move on to the new stars, and the sports body fixed things such that the new stars score rapidly and equal your record or they even cross your record , they fix it all to keep the public excitement to the full , so the new stars overtake your record and they become the Goat and you just become a largely forgotten legend , so in sports basically your career and your stay in the limelight ends by

the time you are 40 or so , whereas in politics and cinema you can stay in the limelight till you are 70 or 80 or even 85 , you have much more limelight and lifelong entertainment in those two fields than you do in sports , even in music trends change every 15-20 years and new stars come and people forget you and move on to the new stars , now Taylor swift will be famous for 20-25 years , then she becomes old and people will flock to newer stars , because music is today all about concerts and stage performances and as stars get older they get more burnt our and fatigued and newer fresh stars with new antics get the spotlight . As for books , hardly anybody reads them today , so one is never in the spotlight for more than a few days or months at most , authors are a forgotten group today , other kinds of performers have their fleeting movements of fame and can never aspire for lifelong fame and limelight , even internet stars and influencers become famous today and are forgotten tomorrow , is how fleeting their fame , they live in endless anxiety and stress because they are unable to maintain their fame for long in a field populated by billions of videos , so to become famous for a lifetime politics and cinema are two choices . There is a third choice , but not everyone can become it , it is a religious guru or spiritual guru , like the India gurus , you set up an ashram and gain followers and gain lifelong fame and money and limelight , however not everyone can become a guru because to become a guru one needs to be a lifelong performer and a great performer at that , you need to always act like you are perfect and still and calm and realised , you need to talk in a certain way always that attracts and impresses the followers , you need to keep the followers supplied with drugs and fun always , it is a very very tough performance to keep up , it needs a great deal of focus

and patience to give such a performance , which is why very few can aspire to become a guru , and once you have become a guru you need to always be careful too , you should save yourself from getting caught in sex scandals and all that , you need to gain the support of politicians for an entire lifetime , it is a very very tough performance , being a spiritual guru , many of them become embroiled in scandals , very few manage to keep their image intact and survive steadily , very very very few manage to attain lifelong fame and power and limelight , is how it is . So these are some ways of attaining lifelong limelight and fame , politics and cinema are the best ways , but in America Hollywood is dying rapidly and many former big actors now get rules only in b movies and they no longer get chances in a list movies anymore , their decline has been rapid and horrible , so in America both politics and cinema won't give you lifelong fame and limelight anymore , it is a country in terrible decline mode and nothing can save that sinking country anymore , but in India politics and cinema still offer a good future , those who are intelligent enough can rise through the ranks to the top . Yes , there is the business world too , but you can't stay famous in the business world for long because you are CEO for a few years and then they replace you with a new ceo and your spotlight is gone , very very few stay at the top throughout their life in the business field , the rest get replaced and lose their limelight . But as said before , no matter how much fame and limelight they get , politicians and actors will always be miserable , they will always be unhappy and miserable , so fame and limelight don't give happiness or peace , they give those who want them great misery , so they are not needed at all , fame and limelight are not needed at all , they are miserable things to attain .

****

See everything , but reject most of the things you see because these things are not necessary or good at all , keep with you only those few things which are necessary and good , that is what you need to do . Let everything in , but keep only the good and throw out the rest .
Travel everywhere , see all kinds of places , gain lots of experiences , learn from it all .
And even if you are at home , see walking tours of cities and places all over the world on YouTube , see Paris walking tour , see Rome walking tour , see walking tours of all kinds of places , see mall walking tour , see monument walking tour , see everything .
On Wikipedia , see entire lists of unesco world heritage sites , try to see as many places as you can in your travels .
See hindu temples all over the world , see Angkor wat and other Hindu temples in the city of siem reap in Cambodia , see prambanan and borobudur and other Hindu and Buddhist temples in Yogyakarta in Indonesia , see hindu temples in Bali , see hindu and Buddhist temples in Sri Lanka , see hindu and Buddhist temples in Thailand and Malaysia and Singapore , see hundreds of Buddhist Temples in Bagan in Myanmar , see other major Buddhist Temples in Myanmar , see hindu and Buddhist Temples in Nepal , see Mesoamerican pyramids in Mexico and Guatemala , see Inca sites in South America in Peru , see statues on Easter island , see Buddhist Temples and Taoist temples and Shinto temples in Japan and China , see pyramids and egyptian temples in Egypt , see famous tombs and mosques in Delhi and Agra , see Hindu temples in all States of India , each state of India has a different style of temples , Assam has a different style of temples , Goa has a different style of temples , Kerala has

a different style , Orissa has a different style , see it all , see all kinds of temples all over India , see churches in Goa , see the 4 major basilicas in Rome , see catacombs in Rome or Paris , see important museums everywhere you go , see amusement and theme parks too , see museum of illusion , see upside down museum , see 3d worlds museum , see malls and see all kinds of brands just to know what they are selling even if you are going to buy it because it is over expensive and not worth it . See zoos and aquariums and palaces and villas and house museums , see antique shops everywhere , see bookshops , see crypt museum , see fountains and important bridges and important arches and public parks and other landmarks , see important shops in each place , see department stores , see souvenir shops , eat popular foods in each place , visit famous restaurants and eateries and bakeries in each place , visit famous supermarkets in each place , experience everything , never waste time on a trip , keep seeing things constantly , see flea markets and other important markets in each place , from morning 7 to night 9 travel everywhere and see places continuously without rest , get ready by 6 and get out of the hotel room by 6-6:30 and eat a complimentary breakfast if they give it and then start out at 7 or 7:30 and see everything till night , or get out of the hotel by 6-6:15 and see a few places first and then eat breakfast at some nice place and continue seeing places till night , avoid ugly places like nightclubs and discos and bars and raves and stripclubs and casinos and all night parties and brothels , no good and no happiness is to be found in any of these bad places and ugly things , so all these places must be avoided absolutely . Go on buses and trams and boats and ships and cycles and cars , experience a place fully , see the architecture and everything else there , see

people and their dressing , see the roads , see the rivers , see the oceans , see the forests and woods and entire scenery , see everything tirelessly , it is all an experience , all an excitement , all an entertainment , all a learning , see it all , learn from it all , adjust sometimes if you need to , stay in comfortable decent hotels , experiment with new types of food , keep your hotel room clean always , leave your hotel room clean when you check out , if you leave it dirty then the hotel people will definitely insult you with bad words after you are gone , so leave it clean always, always go somewhere early , never leave late and arrive late, have a time sense always , keep all our belongings carefully with you always , check if all the belongings are there always , don't forget something behind in the hotel or restaurant or some place else , be alert and focused and careful always , be alert with taxi drivers and auto drivers , they might try to cheat you by asking higher rates , don't get cheated anywhere , always see fully whatever you wanted to see , be on your guard always , be careful always , but see everything and enjoy everything , enjoy all the moments , take a nice photo in each place to keep with you always as a memory , be early to the airport , take care of luggage always , buy chocolates and sweets and snacks and nice souvenirs and other items for your home and family members , always keep your money most carefully , always count your money from time to time to see how much you have left , money management is very important in travel , keep cash and upi and debit card all ready always , keep your phone fully charged always , take utmost care of your phone always , dont forgetfully leave your charger at the hotel room itself when you vacate , carry your charger carefully with you everywhere , carry a cap and small umbrella and water bottles and biscuit packets or other small snacks or

chocolates in a shoulder bag or school bag always , you might soddenly see something interesting on the road , so visit that place definitely , always watch everywhere for such interesting places , you might suddenly spot them somewhere , so visit them definitely too , as a Traveller you show know all this .

****

Not just places , on Wikipedia see lists of people too , see lists of writers and thinkers and philosophers and actors and musicians , see lists of everything , see lists of Nobel prize winners and Oscar winners and booked prize winners and national award winners , see lists of cuisines and food items , see lists of politicians and billionaires and businesspeople and companies , see economic statistics , see lists of richest companies and most profitable companies and biggest internet companies and software companies , now these lists will give a lot of lies and falsehoods , but still see it all and read it all , get an idea of everything , it will help a lot on learning , even read all kinds of histories even though all those histories are fake , read about all kinds of historical figures even though they never existed in real , get an idea of everything , get a picture of everything , it will always be useful in your learning or in something else , be curious always , be interested always to learn , it is what is most important in life , never reject anything without even trying to know about it , keep yourself engaged always in some interesting activity or the other , you will never get bored in life then , try to gain as much general knowledge as you can , it will always help you at some point or the other .
This is what I have to tell you .

****

The absolute truth :
The absolute truth :
The absolute truth :
The absolute truth :
The absolute truth :

I said the gods live in a world where the surface is made of cloth , well to have trees and mud everywhere and leaves falling from those trees , grass here and there everywhere , it is all beautiful , but it did not seem to be ideal , I wanted a surface that was clean and beautiful and soft and one could sleep or sit on it always , so the only material that fit this description was cloth , sand and mud and rocks and even wood and tiles and bricks and all that did not suit this description even though all these materials are good on Earth , so I chose cloth as the material in which the entire surface of Home is covered in , there is no dirt or dirtiness in Home , and cloth is always soft and beautiful and one cloud sleep and sit on it comfortably always , so I felt that cloth is the best surface for Home , a mattress of cloth covers the entire endless surface of Home , where the gods and their children live .

Since the gods and their children are all female , I always felt they have no need to wear clothes , they are all naked and beautiful and pure . The Divine mothers and their daughters in Home , all of them make love to each other , all of them have sex with each other always , all of them have intercourse with each other always , is how they are , after my term here on Earth is over , I will be transformed into a beautiful and pure girl , I will go to Home, I will go to my Divine mothers and all my sisters , I will engage in sexual intercourse with my Divine mothers and sisters , we will be naked and free always , we will have a happy time

always forever , is how it is in Home , we are all girls in Home , we all love each other in Home , we all have utmost affection for each other in Home , we will all make love to each other in Home, have wonderful sex with each other in Home , we will engage in lovemaking always for eternity , that is how we live in Home .
In Home , there are 5 Divine mothers and their 200 crore daughters , they all live in an area of 40,000 sq km , they all live close to each other , they play with each other , they make love to each other , they fly all over the endless land that is Home , they fly all over the endless infinity of the blue sky in Home , there are no males in Home , only females are there in Home , they enjoy life a lot , they are the enjoyers , they are the livers , they are the eternal people , they are happy and peaceful always and forever , they don't view their lovemaking as lesbian because there are only girls in Home and they don't have heterosexual sex in home therefore , so sex between girls is normal there in home , they don't call it homosexuality or lesbianism or homosexual sex or LGBT or queer or lesbian sex , they just call it normal sex and lovemaking , is how it is to them , their normal lovemaking is between girls and it is totally ordinary and normal to them , it is a daily event for them , there is no taboo or incest there , it is their normal and ordinary lifestyle , it is how they live forever always , that is who they are , that is my real nature too , so I will go to Home , transform into my pure female form again , make love with my mothers and sisters forever , play with them forever , live with them happily and peacefully forever , that is our way of life . We make love , sleep together , bathe together , eat together , are naked always , we love each other's naked female bodies , we enjoy life so much , we are the enjoyers , the livers , this is our lifestyle , we all live together as a single

family here .
Since we all live as a single family , things like society and civilisation and morality and sin and marriage and heterosexual sex and all that doesn't apply to us , we don't care for these things at all , we don't need these things at all , we kiss our mothers , make love with our mothers , we are happy and normal and jolly with them always , that is our life .
On Earth , the Divine mothers wanted to tested their children , so they created something called society , they created a new gender called man , they created marriages and morality and civilisation and taboos and all that , they wanted to see how their children take in all this , they wanted to see how their children adapt to all this , they wanted to see if their children broke out of all these illusions on earth and attained realisation , they wanted to see if these children learnt about their mothers and sisters in home , they wanted to see if these children ultimately gave up their illusions about earth and society and morality and all that by the time their term on Earth is over , after their term on Earth is over these children give up their flawed earthly bodies and become transformed into their original pure female selves again and go to their mothers and sisters and live with them happily forever , is the truth and the reality .

On Earth , there are about 15 children of the gods now , they are all Telugu , they all live in South India , they are male or female , they are all forward caste , they are all living in a dignified and proper manner , my parents are both children of gods , my grandparents are also children of the gods , my grandparents completed their time here on Earth and gave up their earthly human bodies and assumed their original Divine bodies and went back to

Home and are living here happily with the mothers and sisters , my wife is a child of the gods , my greatgrandparents were also children of the gods , is how it is , in my family itself more than 10 children of the gods are there , some already finished their term and went back to Home , few still here and will go back to Home once their time here is over , after going to home again we all become girls again and we all make love to each other again , on Earth all of us making love to each other is not possible because we have many constraints like society and morality and we are born as children to each other or we become parents to each other and so on , we are also constrained by the different genders , and since society here on Earth outlaws incest we can't engage in it here , but once we go back home and become girls and sisters again we will make love to each other freely again and live happily forever in this manner , that is the definite truth .

On Earth , only the 15 children of the gods are real people , only they have real life and thoughts and feelings in them , the rest of the people on Earth are just illusions , they are not real people with real life in them , they are just illusions created by the gods to test their children , so society and civilisation here is all just an illusion , the illusory people seem real to the touch , but they exist only when we are around them , they disappear and cease to exist as soon as we leave them and go elsewhere , so we are living in one big illusion here on Earth , that is the definite truth .

Illusions appear big and powerful because of our ignorance , if we become realised then the illusions will become weak and will crumble and break apart and fall down , we are in a game here , the game must not conquer and defeat us , we must conquer and defeat the game , is how it must be , the billions of illusions all around

us are worthless , an ideal society on Earth is impossible , society is itself an unideal thing , society is itself a flawed thing here , and the morals of society are totally flawed , ideas of equality and justice and all that are totally flawed , it is all an illusion , all a sham , we should not fall prey to such illusions and become ignorant , we should rise above it all and triumph , is how we must be , so society's idea of morality and goodness and virtue is all flawed and wrong , it is all designed to misdirect us and throw us under some illusion or the other , the creation of non existent things like mind and soul and atoms and molecules and all that is meant to misdirect us , it is all part of the game , we should not get misdirected , we should not fall into some illusion or the other , we should not become ignorant and hurt ourselves , as players we are supposed to figure out the game and win the game , that is our aim and purpose , we should not lose to some useless worthless illusions .
What is real in this world is us few children of the gods , our homes , our belongings , temples , the statues and art of the gods , our lands , all this is real here , the rest is an illusion , is how it is , the universe is itself one big illusion, all the other stars and other planets in the sky do not really exist , they are all illusions that seem real but are not real , we live in a very illusory world , that is the truth .

So only 15 people here on Earth are the real children of the gods and the rest are illusions , and this entire earth belongs to the gods and their children , and since only 15 children of the gods are here on Earth now these 15 have all rights over the earth , the earth and anything produced on it belongs to us , we don't have to pay for anything produced here on Earth , all the land of the earth belongs to us 15 , all that is produced on Earth belongs to us 15 , that is the truth , the illusions have taken over most of our

land and they have broken up our land to form separate nations and states and they have claimed ownership over our lands , the entire land of the Americas belongs to us 15 , the entire land of Africa and Europe and Asia and Oceania and Antarctica all belongs to us 15 , the illusions have created fake societies and fake laws and we are living like ordinary people in our own world , where is there any justice or morality in any of this , absolutely none , the illusions are all completely unjust and immoral , and because of our ignorance they are getting stronger and stronger and we are getting weaker and weaker , we have become powerless individuals in our own world , in a world which belongs fully to us , we are paying for food and household items and home and everything else , why should we pay for all this when all this belongs to us , it is the illusions who should be paying us for everything because they have occupied our lands and they are living on our lands and they are eating food produced on our lands and they are using our earth to produce electricity and build buildings and everything else , so they should be paying us for each and every single thing here , we don't have to pay them for anything here , the earth is ours , we are the owners of everything here , we 15 are the absolute authority here , no law and illusion is above us here , everything and everyone here operates on our will , why should we suffer in our own world , why should we live like weaklings in our own world , why should we abide by some useless laws and regulations created by some illusions , we are the masters of this world , the owners of this world , we are the children of the gods themselves , why should we bend down to some useless illusions here on Earth , if we had our original pure form we would have wiped out all these illusions in an instant with our superpowers , that is who we are , the illusions won't help

us here , they won't support us here , they will try to give us as much hurt here as possible , so why should we support such useless and evil illusions , such an evil society is not needed at all , such an evil civilisation is not needed at all , such evil morality and evil goodness and evil laws and evil justice are not needed at all , we have given everything to the illusions thanks to our ignorance , because of our ignorance the illusions have become strong and powerful , they have become rich whereas we have become poor , they are earning whereas they won't let us earn anything , they are flourishing whereas they are choking us day by day , they are buying everything we own little by little and making us poorer little by little , we are being slowly and slowly crushed and compressed and suppressed , this is what is happening here, this is the absolute truth , our own ignorance is empowering the evil illusions and hurting us more and more .
We gave the illusions everything including themselves , we created the illusions , but the illusions create fake religions and worship fake gods instead of respecting us who are their creators , they won't allow us to visit our own temples freely , we have to pay for special tickets to visit our own temples , there is only one temple in the world in which the five Divine mothers are present , and that temple is my home , I realised the 5 divine mothers , or rather they helped me realize them , and I placed their 5 statues in my home , my home is the only real temple on Earth because it is the only place on Earth where the 5 divine mothers are present and understood and worshipped and respected , the statues in all other temples on Earth are just representations of the children of the gods , in other words they are just representations of gods 200 crore children including me , so when people worship in other temples they are worshipping me and my

crores of sisters , I and my other sisters here have given these illusions everything but these illusions have given us only hurt , these illusions have sought to harm us and destroy us at every turn , we are forced to pay rent and tax and bills despite everything belonging to us , the illusions are forcing us to obey their rules and laws despite all of them living on land belonging to me and my sisters , so none of the illusions here are good , they are all evil and rotten and ignorant and totally wrong about everything , it is not me who is delusional here , I am talking the bare truth here despite it being incredible , they are all endlessly talking lies in the name of reality and truth , only the 15 people are real and true and good and proper here , the rest are illusions and totally evil and rotten and horrible things , that is the absolute truth .
So I have to tell something to the children of God living here on Earth :
Don't think about society , it does not exist , it is an illusion that is totally evil .
Don't think about anybody else except the children of the gods , they are all illusions and evil and not worthy of thinking about .
Evil Society and evil illusions must not grow and get empowered , evil society and evil illusions must not get developed , if evil society and evil illusions grow and develop and get empowered then we will get hurt even more , so never want them to grow and develop and improve and get impowered .
When our society was rural and our grandparents and greatgrandparents lived in the village they had much more respect and dignity , but in this urban society that has grown and become developed we have absolutely no respect and dignity left anymore because evil is constantly trying to hurt us and crush us , by allowing evil to grow

enough we have made ourselves weak , this is all due to our ignorance , if we attained realisation long ago none of this would have happened and we would still have been masters of the world , instead we are such a weak position where we have to give respect and bow our heads to evil people's to get our work done ,we have to call rotten evil illusions as 'sir ‘ and all that to get our work done , is how bad things have become , illusions have no life , they cant think or feel on their own , they look real but are not real , they are run by our ignorance , the more ignorant we are the more energy we lose and that energy creates more evil illusions and increases their population and strength and runs them all , this is what is happening here , society is a nonexistent sham here , so those few children of gods here , please live your own lives properly and happily here , think only about your own good here , Never think good about society , never empower evil society , just do your work here quietly and live your life here comfortably and happily and after your term here is over move on to your gods in home , never try to develop evil society here , never wish good for evil society here , never wish good for the evil illusions here ,just live your life happily and comfortably , think about yourselves here ,think only about the children of the gods here , think only about the gods and their children in heaven , the gods will take care of you and provide everything you need in your stay here on Earth , so live happily here and then go to Home peacefully , that is all you need to do here , let evil society and evil illusions all break apart and get destroyed , let evil society and evil illusions become weakened and destroyed , let the children of the gods triumph here over all evil , let us go to Home as the victors , that's all .

This is the absolute truth .

****

Suppose the gods created earth and placed a few children of God here in their original female forms with all superpowers , then these children would have dissolved the earth in an instant and gone back home , is how they would have been , and they wouldn't have allowed a single illusion to be created on Earth if they were in their original form here , so if the children of the gods had their original forms here then evil society and evil illusions would never have existed in the first place , the children wouldn't play any games here and would have gone back to their mothers and sisters and Home in an instant , so no game would have been there here if the children had their original forms and powers .
But the gods stripped the children of their original form and powers and sent them here as ordinary human beings , which is why the game still exists , but the game on Earth won't go on forever , it will definitely end in the near future once the children of the gods have triumphed here , once the game ends and the children of the gods have gone back Home all the evil illusions and evil society will be wiped off in an instant and earth will return to it's pristine fully green state again and the Earth along with the universe will cease to exist completely and only Home will be there always , since Home is endless the children of the gods could create a green Oasis in one part of home if they ever wanted and play in it and stay in it for a while , that is their choice , they can do as they place , Home is endless and has a endless cloth surface , so in this endless infinite land the children can convert a small area into a pristine green Oasis and enjoy in it whenever they want to , they can do as they please .
So once this game ends the universe and earth which

exist in the body of the gods will be dissolved and will cease to exist , only Home is eternal and will remain forever , and statues and paintings of the gods and their children also will remain in Home forever , is how it is , any and all statues and paintings on Earth will go back to Home once the universe and earth are dissolved , and they will remain in Home forever , is how it is .
A home and temple are the same , Temple is the home of the gods and their children , so temple is just another word for Home .
So what is essential for life here is the following :
1.Family , including the gods and their children .
2.Paintings and sculptures of the gods and their children .
3.Home .
4.Universe , including Earth and nature .
5.house/temple , where the gods and their children live , house must be spacious and comfortable with all basic needs provided . All temples are included in this category since they are all houses of the gods .
6.nice tasty food .
7.Essential knowledge .
This is all that is needed .
***
Society and all its fake things are not needed at all .
***
So a girl making love to another girl is the most beautiful form of love , the purest form of love , two beautiful forms making love to each other is the most beautiful thing .
A man making love to another man is the ugliest thing on Earth , two ugly forms making love to each other is the ugliest and most disgusting thing possible .
A man making love to a girl is an acceptable thing because an ugly form wants to make love to a beautiful form and that is acceptable .

But girls making love to each other is forever the most wonderful thing , it creates an extraordinary bond and closeness and affection , it gives the best form of happiness and peace .
*****
Suppose in a house there were 5 children of God and they were all girls , then all of them make love to each other and it is totally normal .
Suppose in a house there were 5 children of God and one of them was given a flawed male form and the other 4 are girls ,still all of them make love to each other and that is totally normal too .
Suppose in a house there were 5 children of God and two or more were male and the remaining female , then all of them cannot make love to each other , the males definitely cannot make love to each other , each male cannot make love to all the females either ,it just won't work out at all and in this situation only one female for each male is allowed like in our current society , or else there will be lots of trouble . So this third situation of multiple males is an ugly situation and is definitely bound to give hurt and harm in every way possible .
The first two situations on the other hand where there were no males or only 1 male at most are both alright and lead to both happiness and peace , but whenever there are multiple males problems will always arise in some form or the other , which is why there are absolutely no males in Home and all of them are females in Home .
So different combinations give different results .

****

Imperfect forms like males and animals are not needed in Home because those living in Home and happy and peaceful without them , imperfect forms always disturb the

perfect balance and spoil the harmony ,which is why there are never any imperfect forms in Home .

****

Visit all temples/homes of the gods and their children here on Earth often , they always give a nice feeling , they make us feel as if we are in the presence of our sisters and mothers always , they give such a homely feeling , they make us feel as if we are in Home itself , but worry not , once our time here is over we will definitely go to our Home and live forever with our mothers and sisters again .so visit temples frequently always , visit the homes of our sisters on Earth frequently always , we can't see them in their real form here ,atleast we can see them in their statue or painting form here and feel happy .

Always keep saying ‘ ma ‘ and ‘ Amma ‘ within you , always keep thinking of your mothers and sisters in home and those few here on Earth too , always keep thinking about them , think about their well-being here , think about going back to them in home , think about caring for them affectionately here on Earth , thinking about living forever with them happily and peacefully in Home .
Ma and Amma are the highest words in all of existence , they are the absolute truth , there are no words higher than ma and Amma , ma and Amma and devudu and God all mean the same thing , the Divine mothers who are everything and who run everything , so saying Amma and ma is the same as saying devudu and God , Amma and ma are the purest and most perfect forms of saying devudu and God , which is why ma and Amma are the highest words possible , they are the highest words , that is the absolute truth .

*****

Most of the thoughts and ideas in these two books ,I don't think about them anymore , I wrote them all solely to collect all my thoughts , both former thoughts and current thoughts , to show those who may read these books that I had such and such thoughts , that's all , they should know what all thoughts and ideas I had , so I collected it all and presented it all in these books .

There will be inconsistencies here and there in this book , that is because my thoughts have evolved over time and I presented both former thoughts and evolved thoughts in this book , which is why it seems uneven and inconsistent at times .

At present , my thoughts are the thoughts of the absolute truth , that is what I believe in ultimately , my original form is feminine , the gods gave me an impure masculine form here , and after my time here is over I will shed this masculine form and assume my original feminine form again and go to my mothers and sisters in Home and make love to them all forever and enjoy forever , that is me , that is the real me .

In this world , I have the desire to have many nice girls for company , I want to make love to them all and live happily with them all together in one house , but society has made me a prisoner and has made it impossible for me to achieve this ideal here on Earth , society has bound me up with its fake morals and fake justice and fake traditions and fake culture and made me into a suppressed prisoner , I am unable to break out of the chains society has imposed on me , being a male has made me a prisoner here , it has not given me any freedom or liberty , freedom and liberty are both the same thing and I don't have it at all because evil society and evil illusions all around me have made me a prisoner , I want many nice

girls around me and I want to enjoy with them all and live happily with them all always like I do in Home , but I am unable to do that here and it is a great suppression , one might think I am delusional and imagining all this up , but I am not , I have experienced a lot many things and I have learnt a lot many things , and those who have experienced and learnt a lot many things in this world will be just like me , they will also feel like prisoners in this evil society , even they will feel they have no freedom here , they will feel they are chained up by fake morals and fake goodness and fake virtue and fake morality and fake superstitions and fake rituals and fake decency and fake manners and fake etiquette , they have stripped me of all freedom , they all want only money and material enjoyment , they don't want human bonds and deep human connection , so they can live without bonding and affection because they are all fake people , all illusions , but I am not like that , I am a real person with real thoughts , with real feelings , I seek real bonds , real human connection , real affection , I don't want just money and material things , I have it all already , i want people , I want closeness , I want affection and love always , that is me , but evil society and evil illusions have imprisoned me and given me only a lot of loneliness , they have blocked me from having the beautiful bonds and connections and affection that I long for , at least I have my parents and my wife , but I want more people , I want more affection, I want more love , I want more beautiful feelings , but I am unable to get it all because evil society and evil illusions have stopped me from getting it all , is what has happened. I couldn't get the company of many wonderful girls here , but if I have a daughter atleast let that daughter get the company of many wonderful girls , atleast let that daughter make love to many wonderful girls and enjoy

their company and live happily with them always , let her atleast get what I couldn't get , that's what I will wish for .

I avoid evil society and evil illusions as much as possible , I engage with evil society and evil illusions only if absolutely necessary , if not necessary I completely ignore evil society and evil illusions and I focus fully on living my life happily with my family , family alone matters to me ultimately and always , family alone is paramount always , so I don't waste my time thinking about evil society and evil illusions , I know society and all illusions are a totally lost cause , they can never be good , they will always be totally evil , so I choose to ignore them all , I choose to stay away from them all as much as possible , I engage them only if absolutely necessary , that's all .

People talking with each other in person is always the best thing , talking over the phone can never equal talking in person , talking in person face to face is best always .

Through my learning and realisation I managed to ride above society and everybody in it , it is society and people in it who never rose above , they remain on the same lowly primitive level , I managed to learn and rise above them all . That is what I did , that is my finest achievement . And I am just 32 years old now , I did it by the time I was 32 , that is the great thing here , I achieved the highest thing possible at the age of 32 itself , I achieved the highest learning and realisation by the time I was 32 , I have to just perfect and polish my learning and realisation even more , is what I need to do.

But be careful of the girls here too, not all of them are good , they may be jovial and bright and lively and

beautiful , but they are all not necessarily good , some are good , most are not , if you choose the wrong girl you get only hurt , they will definitely hurt you and insult you and you can never be with them , if you choose the right girl then you will have nice company and happiness and peace and affection and love and wonderful feelings always , so the right girl is always a Telugu girl , she is a Telugu girl living in southern India , most probably close to you somewhere , and you will meet her when the time comes , get close only with the right girls , with other girls be friendly and maintain good relations always but never try to get too close with them because they are not right at all , so only select and get close to the right girls , they will be attracted to you as you are to them , they will like you as much as you like them , they will the full distance with you lifelong . And even if you are close to many girls , never make it public , the public will definitely try to break you girls up if they ever know you are all too close to each other including physical closeness and sexual closeness , so do it all secretly and privately , never make it public , never engage in public display of affection with those girls , never let evil society and evil illusions ever detect the true and secret and private nature of your relationship with those other girls , society is always rotten and will always be rotten , so never tell society the truth , never try to explain to society the truth , society will never understand or accept anything good , so be careful always , keep it private always , enjoy privately and secretly always , in public always act conservative and put on a conservative show ,in private enjoy as much you want always with the other girls , that is best , privacy is best always , private is best always , secret and confidential is best always in some cases . If you try to get the wrong girl , the wrong girl will publicly tell everyone that you are a

girl who likes other girls and she will shame you and embarrass you and humiliate you , so be careful always , be patient and calm and focussed , select only the right girl always , never tell your deepest secret to the wrong girl , never try to get close to a wrong girl , select the right girl always , a right girl will also select you readily as you select her , is how it will be in most cases , so watch out , enjoy , have a jolly life in the company of wonderful good girls .

This is the greatest book ever written on Earth , and I am the greatest writer here, but the entire credit for making me write all this goes to the gods who wrote it all through me , they are the real author , I am just the writer who is writing what they are giving me , and this is the best book ever written because it contains the greatest and absolute truths .

I started my learning journey at the age of 21 and I attained most of the important learning and realisation by the time I was 32 , I learnt most of the truth by the time was 32 , by 30 itself I had learnt many of the big truths and learnt and realised many things , is how my journey was , it took me 10 years to learn and attain realisation and learn the truth . But this 10 years contained many hard and difficult times and also gave an endless stream of entertainment and learning , it was an extremely engaging period , despite all the bar experiences I had these 10 years the journey was totally worth it because I learnt lots and lots and saw lots and lots and had lots and lots of entertainment , that was my learning journey , despite all the periods of frustration and depression and imbalance and anger and hurt I still managed to get through it all and still attain learning and realisation , I never once thought of

backing down in my journey and giving up , that was never an option , so I strived and pushed and pushed forward until the learning was complete . The mode I learnt , the more better things around me got , everything improved , we bought a home in Chennai , I got a car , I got a clinic ,I got a nice wife , I went to many places in India , I went to Dubai and Europe , I did many interesting things , I got interesting things , I got many interesting experiences , things are getting better and much better ever since I moved more and more towards learning and realisation and achieved it to a good extant .

The great advantages of Learning and realisation are :

1. Without it , you are forced to earn and strive for a living . But those who engage in learning and realisation do not have to work hard for a living , you get everything you want without even working and earning , your life and living becomes much much easier and simplified , is how it is when you engage in learning and living .
2. Without it , society will constantly try to harm you in one way or the other , and not just trying , society will definitely harm you in many ways and take you deeper and deeper into ignorance and hurt you a lot . But with learning and realisation , the harm society tries to inflict on you will decrease and decrease until it is fully gone .
3. Without you , evil society and evil illusions will always try to control you and ruin you and destroy you , but with realisation and learning you slowly rise above evil society and evil illusions and you ultimately get to control evil society and evil illusions , you ultimately regain your status as the owner and master of the world along with your fellow sisters here , you

ultimately go to your Home and end this universe and age . One doesn't have to be in politics or business to control and run the world , the best method is to engage in learning and realisation and just be quiet and calm , that is all you need to do , the Divine energy you have gained through learning and realisation will do the rest , you are just sitting without seemingly doing anything whereas the Divine energy you have gained will change everything in the world and will run everything on your behalf , so learning and realisation is the best method of bringing the world under your control again without doing anything at all , even politicians control only a certain nation or land , but you can control everything without doing anything if you gain the Divine energy ,is how it is , but one who is greedy for power and money can never gain this Divine energy , only one who is pure and focussed on the gods can gain this Divine energy , is how it is .

Just because my original nature is feminine , that doesn't mean I have to act like a girl or a eunuch , the Divine mothers and sisters in Home are the strongest and boldest and most fearless people , they are not meek or weak people , they are not what they call ‘ pussies ‘ , it is the illusions living in this world that are always ready to compromise their dignity and engage in some wrong or the other to survive , it is they who are cowards and weaklings and full of fear , it is they who are the real pussies , my mother is a strong and fearless and bold person , so to be feminine is to be strong and bold and fearless just like to be masculine is to be strong and bold and fearless , to be good and proper is to be strong and bold and fearless , that is in our nature itself , it is our

inherent character and nature , so just because my original nature is feminine doesn't mean I have to be like a eunuch or something , I will always behave normally and naturally and be strong and bold and feminine and good and proper always , that is my nature and I shall also be true to my nature , that's all .

The biggest mistake the children of the gods did in this world is to think all the illusions were their people and to wish good for all the illusions . For example , being born in India me and my parents and grandparents and greatgrandparents all thought of fellow Indians as our people and we also wished for Indians to rise and do well and reach great heights in everything , not just Indians we always wished for all the people in the world to rise and do well and reach great heights in everything , we wished good and only good for everybody , and the result of this was - evil great extraordinarily in the world , the evil in the illusions was let loose , all these illusions tried to hurt us and harm despite us wishing only good for them , only evil became greatly empowered whereas truly good people like us were suffering and facing hardships because of the constant effect of evil around us .so despite wishing only good for everybody , everybody became more and more evil and tried to do only bad to us . Which is why I tell all the children of the gods here - never wish good for evil illusions , wish only for their destruction , never wish good for Indians , they are all crooked and rotten and masters in cheating and totally bad , wish only for their destruction , never wish good for the people of the world , they are all totally evil and totally rotten and totally bad , wish only for their destruction , so never wish good for anybody except ourselves here , wish good only for the children of the gods , don't wish good for anybody else except them , the

children of the gods must wish only for their own good and well being here , they must care only for themselves here , they must always think only about their own self preservation here , they must think only about their own comfort and proper living here , they must think only about themselves first and foremost , they must not think about evil society and evil illusions and bring themselves hurt , so children of the gods must be concerned only about their own survival and thriving here , they must be fully focussed only on themselves here , that is the best thing to do here , it might sound like selfishness but it is the wisest thing to do here , that is the absolute truth .
So live for your own happiness and peace and enjoyment here , ensure your family members are also always happy and peaceful and enjoying life , that is what is most important always .

When I was young , my father wanted society and people to grow and develop , and evil society and evil people grew a lot and became so strong by the time I was an adult , and I now wish for entire society and entire evil people to get completely destroyed , and they definitely will get completely destroyed , that is definite , by the time my child grows up evil society and evil people will all get totally destroyed and totally weakened and worthless and powerless , they will be finished , that is definite , that is what will happen , that is what I will make happen with my learning and realisation , that is definite , I will do that important thing for my child , that's all .

Already evil society and evil people/evil illusions are stagnating , their strength is already declining , I will completely destroy them all , only the 15 or so children of gods here will live well and thrive , the rest will be totally

destroyed . The entire world belongs to the gods and their children , it all belongs to the Divine mothers and the Divine daughters , so this entire earth belongs to me and my sisters and mothers only , not just India but the entire earth belongs to us , so all the evil society and evil people who have occupied what belongs to us in truth , all of them will be destroyed , all evil Indians will be wiped out , all evil nations including India will be wiped out , only the homes and lands and belongings of gods children and the temples of gods children and the statues and paintings and other representations of the gods and their children will survive , only our homes and temples and belongings and statues and paintings and other representations will survive , that's all , the rest will all go down and become destroyed , that's all .

Our family did lots of good to other people , but other people always tried to do only bad to us , so no more doing good for other people , let them all get destroyed , we will live our life peacefully and happily and move on .

The world was created by the gods in 1900 ad . The first child of the gods to be born here was Bangaru Naidu , my great grandfather , his father was an illusion , not a real person , not a child of the Gods , his father's name was muthu Naidu , his grandfather's name was swamy Naidu . Bangaru Naidu was born in 1900 ad , his son was thulasi Naidu , my grandfather , another child of the Gods . Thulasi Naidus son is Sukumar Ravilla Naidu , my father , another child of the Gods . Sukumar naidus son is Ashwath Sukumar Naidu , me , another child of the Gods . Overall , only 4 children of the Gods have been born as males in this world - Bangaru Naidu , thulasi Naidu , Sukumar Naidu ,ashwath Naidu , only one child of the

Gods has been born as a male in each generation , the rest of the children of Gods born here on Earth were all born as females .

Bangaru Naidu was born in 1900 . In the early 1920s he married a girl , she was a child of the gods , she died in the mid 1920s due to illness , she gave birth to 1 child . Then he married her sister, she was a child of the gods too , she also died in the late 1920s after giving birth to 2 children , he never married again after that . The native place of bangaru Naidu was velliyur near red hills , near alamadi airport and race track , he moved to kootrodu near kosasthalai River and later again moved too thanakulam village nearby where the family resides even today . He raised his three children , one of them was thulasi Naidu , a child of the gods , another son died in his 20s , he was not a child of the gods , he was an illusion . Thulasi Naidu married subburathnammal in 1952 or 1953 , she is my grandmother , she is a child of the gods , she was born in 1937 , her mother was a child of the gods too . Thulasi Naidu and subburathnammal gave birth to 4 children , of which only the last child was a child of the gods , sukumar ravilla Naidu , ravilla being the family name of the entire clan , the other 3 children were illusions and not children of the gods .
Sukumar Naidu was born in 1958 , he married sudha , who has born in 1968 , they married in December 11 1986 , sudhas mother was kanakavalli , a child of the gods , and her native place is tiruvotriyur in Chennai near ennore , where the famous vadivudaiyamman temple is located . Subburathnammal was born in devadanam village near ponneri town north of Chennai , ranganathar temple is located in devadanam village .
Sudha and sukumar gave birth to only one child , Ashwath

sukumar , on April 2 1993 , he is the author of this book , he is a child of the gods too .
Ashwath married madhumitha , hailing from thirumalaikuppam village , near madhanur , vellore district , she is a child of the gods too .
So this is a list of the children of gods born here till now , it is incomplete , but shall be complete in the near future :
1.bangaru Naidu.
2.1st wife of bangaru Naidu .
3.2nd wife of bangaru Naidu .
4.subburathnammal / rathnammal .
5.mother of rathnammal .
6.thulasi Naidu .
7.sukumar Naidu .
8.sudha .
9.kanakavalli , mother of sudha.
10.ashwath .
11.madhumitha .

The lineage of the ravilla family :
Swamy Naidu
|
Muthu Naidu
|
Bangaru Naidu
|
Thulasi Naidu
|
Sukumar Naidu
|
Ashwath Naidu

I will most probably be the last male born in this line . My child will most probably be a girl , she will be. a child of the

gods.

The Earth was created in 1900 , the age began in 1900 , and our family has been wealthy since the beginning of the age . Bangaru Naidu was born in a big and spacious house in velliyur , and this ancestral home still exists in velliyur village , it is where the age began , it is where our family's journey began , it is where the gods placed their first child here on Earth . So our family has been wealthy since the start of the age and we will be wealthy always too , that is how it will be always .

Our family has produced all of the greatest people on Earth . The greatest people I have seen on Earth are :
1.sudha , my mother and rathnammal , my grandmother , they are both in first place together , they are the two greatest people ever born on Earth .
2.sukumar , my father .
3.bangaru Naidu and thulasi Naidu , my great grandfather and grandfather respectively .
They are the greatest people i have known on Earth . They are the goodest people , the nicest people , the purest people , all the other children of the gods here on earth are also good and nice and pure , but these 5 are above the rest , they are the best of the best .

The first child of the gods to go to school on Earth was thulasi Naidu , he didn't complete school , studied till 8th or 9th in the village school .
Subburathnammal also went to the village school , but did not complete school .
The first child of the gods to complete school on Earth was sukumar , he went to mctm school in kilpauk , chennai , he was regarded as a genius by all his fellow students and

teachers . Sukumar would sleep in class , the teacher would wake him up and ask him questions regarding what was taught in class , and sukumar would answer correctly, shocking the teacher and the entire class . Sometimes the teachers wouldn't wake up him and would just let him sleep in class because they knew he knew everything . He was always the topper and he even taught students in higher classes about various subjects because he knew everything , he studied effortlessly , he didn't mug and mug , he just gave it all a read and he just remembered it all , is how great his memory power was. He was a student all the teachers admired , he was a genius student . In his final year in school , he wrote all the exams perfectly , he was expected by everybody to be the state topper , everyone knew definitely that he would be the state topper because nobody had the talent and genius he had , but the government rigged the exam results and made somebody else the topper and deliberately marked sukumars papers wrongly and gave him lesser marks , the govt does such criminal things always , it will give high marks to members of lower castes even if they don't write well at all , but it will deliberately give low marks to members of the higher castes even though they wrote perfectly , the govt continues this practice to this day , so because of the injustice given by the govt sukumar scored much lesser than he should have got fairly , it was still good marks but unfortunately it was not enough to secure seats in government medical colleges because the cut off for forward castes was very high back then too as it is now , so thulasi Naidu used his political influence to get sukumar and his elder brother seats in Stanley medical college in washermanpet Chennai .
Sukumar was the first child of the gods to go to college . He was a genius in college too , but he became

disillusioned with people and education and college and he left medical college in his final year , he dicontinued his studies in the final year , therefore he did not get his medical degree . After dropping out of college , he did agriculture on the family lands and later opened a small bank called Ashwini benefit fund in 1994-95 and ran it for 22 years and finally closed the bank in 2017 and he retired . In the demonetization that happened Nationwide in 2016 end , the bank suffered a loss , as a result of which it was forced to shut down in 2017 . Demonetization is another criminal thing created by the govt for its own benefit , the government has never done any good for our family , the government has always done only harm to our family , the government is an evil entity , society is itself an evil entity . Sukumar sponsored the education of several people , those people went on to become successful professionals , sukumar helped a lot of people , he did good to a lot of people .
Not just sukumar , our entire family has helped a lot of people , has done a lot of good to a lot of people , yet society did no good to us , society gave us only harm , society is full of shit , that is the absolute truth . An ideal society is also not a perfect society , an ideal society is not needed , an ideal society is also totally flawed . We are children of the gods , the rest of the people here are illusions , the illusions are not equal to us , they are beneath us , so equality is not needed here , it is a flawed thing here , the illusions act today as if they are Superior to us , but in truth they are always inferior to us , they are always rotten shits , so an equal society is not needed here because the children of the gods own Earth and everything on earth , we are the creators of all the evil illusions themselves , we are like the gods here on earth , we are the gods who created all these lifeless evil illusions

, so the illusions are nothing here , we are everything here , the illusions are not needed here at all , without them the children of the gods would all be living in a single house here on earth , there would be no other houses on earth , we would live in a spacious and big house surrounded by trees and fields , we provide everything to ourselves with our own powers , we live peacefully and visit temples all the time , we move on to Home once our term here is over , is all there is to it , Evil illusions are not needed at all , evil society is not needed at all , illusions and society and civilisation and community are all not needed at all , only family is needed , only family is important , only family is Paramount always , that's all .

The first child of gods to get a college degree here on earth is sudha , my mother , she completed her schooling in a Christian girls school in parry's corner Chennai , but she got married at 18 to my father , so she did not go to formal college . But in 2006-7 period , after nearly 20 years of marriage , my father encouraged her to go to Tamil Nadu open University and get a degree there , so she went to Tamil Nadu open University in kilpauk chennai and did a three year bachelor's degree there and finally got her degree in 2010 or so , she is the first child of gods to get a college degree , it was a weekend college , she would attend classes on weekends and passed her exams successfully in all the three years without any arrears and got her degree . Father encouraged her to do a master's degree in the same open University , but mother refused due to other commitments .

I did my schooling in bhavans rajaji vidyashram in kilpauk chennai , I was a topper in my school , i scored 480/500 in my 10th board exams and 470/500 in my 12th board

exams , I should have gotten more in my 12th board exams but they marked me wrongly like they always do and gave me lesser than I deserved , also they gave several out of sylabbus questions and as a result I did not get the 485 or 490 that I should have rightfully got , my cutoff percentage was 96.66 which was a great percentage , but still it was not enough for me to get into any govt medical college because I was forward caste , so government showed it's evil face again , those from lower castes who got only 93 or 94 cuttoff percentage also got seats in government medical colleges whereas I couldn't get it despite scoring more than them , it was such a ugly thing , it hurt me a lot , it was the first time I experienced the great cheating of the government .
My father paid 30 lakhs to get me a seat in a private medical college , Sri ramachandra medical college located in porur Chennai . At first I studied very well for the first two years , but I gradually learnt that everything was money and cheating , some paid money to become toppers and gold medallists whereas I studied hard day and night and never got what I deserved , again cheaters were becoming winners whereas a hard working person like me was trying and trying and still not getting to the top , and this made me gradually disillusioned with education and society just like my father had become disillusioned in the 70s , I wanted within myself to drop out of such a horrible cheating college , but i did not do so because I did not want to do the same thing my father did , also my mother kept encouraging me and pushing me endlessly to complete my studies , and I finally completed my degree with my mother's help , without her I never could have completed college , I became the second child of the gods to get a degree , I started college in 2011 and completed college in 2019 . My wife madhumitha , she

started college in 2015 and completed in 2019 , a few months after me , she is the third child of the gods to get a degree here , she did her schooling in madhanur and did her college term in pallikonda near madhanur Vellore district , she worked in a couple IT companies for nearly 5 years , she is the first child of the gods to work in some company under somebody , the rest of us never liked working under anybody , we all always wanted to be independent and free , be it my father or grandfather or great-grandfather or mother , we all remained independent always , we never liked the idea of working under anybody , we always preferred to start our own workplace and work independently in it , my father worked independently in his own mini bank , I work independently in my own clinic , that is how our family is , that is how children of the gods are , they all like independence and freedom , madhumitha gave up her job willingly after work and became a house wife ,my mother and grandmothers and great grandmothers were all house wives , so this is our family tradition , it is how we like to be , we don't like to work under some mediocre evil illusions , is what we feel .

In India , the first cars were produced in 1949-50 period by Hindustan motors , and thulasi Naidu was the first divine child to buy a car from Hindustan motors in 1951-52 . So we have been having cars in our family since 1951-52 , we have always been updated and in the present , we never lagged behind in anything . We bought our first computer in 2001 , our first smartphone in 2011 , we always buy 1-2 years after the introduction of the items because we see first whether the item is good quality or not , we see whether it is selling well or not , only after that we buy it , we bought radio and fridge in the mid or late 60s , telephone we got only in the 90s because we lived in the village until 1997 . Our village house in thanakulam was built in 1958 , our family lived from 58 to 97 in that house in thanakulam . in 97 we moved to the city for my education , me father mother grandmother and grandfather , we took a flat for rent in f block Anna nagar near chintamani signal valliammal school , we stayed in that house for 6 ½ years , then we shifted to another flat nearby in d block and stayed there for 1 year , then we shifted to kilpauk and stayed in a flat there for 7 years until my school got over , the flat was 200m away from my school , so I used to walk to it daily with Mom or grandma . And in my first year of college we shifted to another flat in e block Anna nagar , we stayed in that flat for 10 years for rent . Finally , in 2021 we sold father's office building in ponneri and we bought a flat in r block Anna nagar , which

we are living in now , which we will own always because it is our first own house in the city and it is a very bright and beautiful home , all the rented flats we stayed in before were also bright and beautiful , we always stay in bright and airy and well ventilated homes .

Father was a good volleyball player in his youth , he is also a good cricket player and badminton player , I am a good badminton player , I was the shotput champion in my school , mother was also good at shotput in her girls school , I also was a decent table tennis player though I have forgotten how to play it now . I learnt carnatic music , I am a good singer of both carnatic songs and movie songs . I also learnt guitar and keyboard , but unfortunately I was not good at it like I was in singing . I also took dancing class once and I can dance for fun . Our family always had a lot of interest in movies and music and art and culture , father has read thousands and thousands of books of all genres , he is a the best reader I have ever seen , he is a serious reader and not a timeoass reader , mother reads a lot of tamil magazines and newspapers and tamil novels , she is a timeoass reader , grandfather thulasi Naidu had many friends in the movie industry in the 60s and 70s , he was knew famous tamil Nadu chief minister kamaraj very well , kamaraj even attended the marriage function of father's elder sister , grandfather knew a lot of people , he was a very popular

person in social circles back in the day , he used to attend wrestling matches with great interest , even though he did not finish school he still could read English and English newspapers , tv came to India in 1975 , and we bought our first tv set in 76 or 77 , grandfather and great-grandfather used to always dress in white shirt and white dhoti as was the tradition back then , but father started dressing in all kinds of stylish shirts and dresses back in the 70s itself and even I try to wear as many different styles as possible , father always has been a great dresser , he always had a great taste in clothes , mother and grandmother also dressed very well always , they also always had a great taste in dressing , is how it has always been in our family , we take an interest in everything, we dress well , we eat well , we see and learn everything , we are lively and bright people , always have been , always will be , this is how we are .

Father has a great sense of humor and is a great speaker , grandfather also had a lot of friends and talked and moved well with everybody , in the 60s and 70s all kinds of people used to come to our house often to talk to grandfather , grandmother used to cook delicious food for them all , grandfather and grandmother used to treat them all very well , mother and grandmother are both great cooks , they are also great housekeepers , nobody can maintain the house like mother can , she even knows how to paint walls and do minor plumbing and electrical work

and a lot of other works too , she is a genius , mummy is a genius . In the old days , in 50s and 60s and 70s and even 80s , grandfather and great grandfather used to prepare lots of food with the help of cooks and they used to distribute this food to passerbys and poor people in the surroundings , lot many people worked in our lands , they were all given good food and treated well , there were 50-100 cows in our cow shed and many other animals like chickens and goats and others , grandfather had a lot of interest in animals , we had our own rice mill and tractor , we had a tractor since the 60s , my great-grandfathers brother had his own fleet of private buses in the 40s and 50s itself , our family has always been active and enterprising .But after governments became powerful and totally evil and corrupt from the 60s onwards , they started suppressing good people in many ways , they created a system where only bad people got full benefits whereas good people got no benefit at all , and this led to our family slowly facing more and more difficulties , but still we always lived comfortably and in a dignified manner , we might no longer have the glory days that my grandfather and great-grandfather had in the past , but still we are a respected and wealthy family who have always lived a dignified and comfortable life , what can we do if people have become totally evil and corrupt , what can we do if people won't let us live in peace , what can we do if people constantly seek to hurt us and won't let us grow and

develop and improve , we can only be calm and patient , our time will come again , all the evil people will be destroyed ,we will triumph , that is definite , we must wait calmly until then , is what we must do .
Never believe the tamil people , tamil people are low class scumbags of the worst kind , they are cutthroats like jains and Muslims and Christians , they are worse than snakes , they will act like good people , but if they get a chance they will rob you of everything you have and they will finish you , is how bad they are , all the evil illusions are bad , that is definite , but these are dangerous kinds , beware of them always , never trust them, be careful when dealing with them always , tamils are low class shits , they will never have class or character , they are actors and nothing else , be wary and careful with all evil illusions , they are all dangerous , they will cheat you the first chance they get , so never give them that chance , be in your guard always with evil illusions , that's all .

Father and me , we are both avid movie watchers , father used to see upto 3 movies per day on weekends , he has a great interest in sports too , watched cricket and Olympics and FIFA word cup , even I follow sports and I know about sports stats both old and new , I am well informed always about everything , I keep in touch with everything always , father is an avid reader of newspapers and magazines , he used to buy a lot of music records

back in the 80s and had his own Walkman ,we still have some of those music records in our village home , many of them got destroyed due to fungus forming on them over time , he used to listen to these records on a record player or turntable player as they used to be called . From music records to music cassettes to music CDs to YouTube , we have seen all the main things , we have experienced everything . Father used to also see classical dance programmes , he knows about everything , even I have a wide knowledge about a lot of things. Father and grandmother , their favourite actor of all time was sivaji ganesan , father introduced me to all kinds of interesting things and made my life interesting .
I saw movies of lots of indian actors - sivaji ganesan , mgr , ntr , anr , gemini ganesan , uttam Kumar , kannada actor rajkumar , mammootty , mohanlal , rajnikanth , Kamal Hassan , Amitabh bachchan , raj Kapoor , Shashi Kapoor , shammi Kapoor , Dev Anand , sv ranga Rao , jaishankar , muthuraman , shatrugham Sinha , Rajesh Khanna , rishi Kapoor , Krishna , Krishnam Raju , balakrishna , nagarjuna , venkatesh , Ashok Kumar , Sanjeev Kumar , Dharmendra , prem Nazir , Suresh gopi , jayaram , Vijay , ajith , Prabhu ganesan , Karthik muthuraman , vijayakanth , Mahesh babu , Pawan Kalyan , gopichand , raviteja , amol palekar , Salman Khan , shah rukh Khan , Aamir Khan , Ajay devgn , prakash Raj , madhavan , aravind Samy , murali , Arjun sarja , satyaraj , raghuvaran ,

vadivelu , Vivek , Mithun chakraborty , Akshay Khanna , Akshay Kumar , Surya , Vikram , jayam Ravi , nithiin , Siddharth , sharwanand , Arya , Vishal , srikanth Telugu actor , srikanth tamil actor , darshan , shivrajkumar , puneet rajkumar , sai Kumar , vishnuvardhan , sudeep , sunny deol , Bobby deol , Nara lokesh , rajendra Prasad , brahmanandam , Ali Telugu comedian , Sunil Telugu comedian , naresh Telugu actor , allu Arjun , Jr ntr , harikrishna , prabhas , siddu jonnalagadda , Kiran abbavaram , Naga chaitanya , Naga shaurya , prithviraj sukumaran , fahadh faasil , dulquer Salmaan , kunchacko boban , dileep , Rahman Malayalam actor , santhanam , goundamani , senthil , Cho ramasami , nagesh , ravichandran tamil actor , Uday Kiran , Tarun Telugu actor , nani , vennela Kishore etc…..

The best movies and best actors and best music and best dance , it is all found in India and only India , indian movies are better than Western movies , indian movies are better than movies produced by any other country .

Indian actors are better than Western actors , indian actors are better than actors produced by any other country .

Indian music is better than Western music , indian music is better than music produced by any other country .

Indian dance is better than Western dance , indian dance is better than dance produced by any other country .

All this is definite . I can say that from lots of experience , having seen movies and music and dance and actors from all the main countries .
Also , indian art is better than Western art , indian art is better than art produced by any other country .
Indian handicrafts are better than Western handicrafts , indian handicrafts are better than that produced by any other country.
Despite all this , Indians are still very evil because they are not doing anything here , it is the gods who are doing everything here through everybody , the gods are the doers here , the evil illusions don't have to produce or direct a movie , the gods create that movie in an instant with their powers , the illusions do not have to create music , the gods create all the music in an instant with their power , the gods are creating all movies and music and dance and actors and art and handicraft , the gods are doing everything and creating everything , the evil illusions are doing nothing here , they are just puppets run by the gods , that's all .
All these movies and music and other entertainments were created by the gods for our learning and entertainment while we are here on Earth . The gods created sports and sports players and created the games we see on tv in an instant with their powers , so the evil illusions never had to train or really play there , the gods created it all in an instant , that's all .

Of all sports , cricket is the best spectator sport , which is why it is the most famous sport in India . badminton and table tennis are good for recreation . Volleyball and basketball may be played too for recreation . Board games like carrom and business are also entertaining enough . But of all spectator sports , cricket is the best . Father watches both men's and women's cricket , even I watch both men's cricket and women's cricket , in men's cricket the greatest player is Sachin Tendulkar , in women's cricket there are many super players but no single person can be called greatest .

Nobody listens to radio today , even until 2010 or 2015 the radio was used by many people , but after smartphones became the primary device of entertainment , the radio has long been forgotten , before people used to turn on the radio to listen to songs , but today they don't do that anymore , radio was mainly used to listen to songs , there are talk shows on the radio too but nobody really likes listening to these talk shows , they all use the radio to listen to songs .
When it comes to movie songs or album songs , I prefer movie songs because of the imagery and visuals they give , movie songs are always superior to album songs , when an album song is used in a movie and converted into a movie song the visuals only increases the effect of the song and makes the song better , is how it is.

Generally speaking , there are 4 main forms of entertainment - acting , singing , dancing , sport . If you act in front of a camera it is a movie or TV show , if you act on stage or on the street it is theatre or street theatre , if you act serious roles it is called drama and if you act comedy roles it is called comedy , if you act without a definite script it is called improvisational theatre and if you act in a female costume despite being a male it is called a drag show , if you sing songs on stage along with acting it is called musical theatre , if you act in strange ways without a script or story it is called performance art , if you are a white person and you put grease on your face and act like a black african person it is called a minstrel show , if you just tell jokes on stage it is called stand up comedy , if you wear exposing dresses and walk on stage it is a fashion show , if you wear costumes and walk on the road along with hundreds of others it is a parade , if you talk through a puppet it is ventriloquism , if you act without talking it is miming , if you talk for forcefully and powerfully on stage it is oratory , so it is all basically acting , you act in different ways in each format , so acting is the main underlying thing here , those who present news on tv channels engage in their own style of acting and performance , if you dance on stage while slowly removing your clothes at the same time it is called striptease , if you dance on stage in skimpy and revealing costumes it is called cabaret or burlesque , if you sing on stage it is a

concert , if many different bands sing on stage it is a music festival , if people dance in a closed Hall to music it is called a music Hall or nightclub or disco depending on the music and atmosphere , if people dance after taking drugs and alcohol it is called a rave party , then another kind of acting and performance is magic , a play in which you sing your dialogues is called opera , performance using puppets is puppet shows , other kinds of music performance are symphonies and orchestra , if you win an award for some performance it is called awards show or ceremony , if you engage in sex in front of the camera it is called pornography or blue film or stag film , if you engage in sex on stage in front of people it is a sex show , if you pose in various ways in front of camera it is called modelling , if you act like killing someone in front of the camera and show the video to others it is a snuff film , so it is all some form of acting and singing/music and dance . Then there is sport including acrobatics , this includes spectator sports , circus , air show , bike stunts , car stunts , there are variety shows and side shows where you engage in a combination of music and dance and acting and acrobatics/sport , there are wild west shows where you dress in cowboy costumes and ride in horses and perform stunts . So basically , acting and dance and music and sport are the underlying thing in all of it ,they are done in different ways in different formats , is the thing . Then there are literature and video games and online memes

and other digital content , books have already declined , video games are declining , online memes and other digital content have a very short lifespan and are forgotten very very soon , then there is self destructive entertainment like drinking and smoking and drugs and violence which are more damaging than entertaining to oneself , they only make one more miserable and imbalanced , engaging in disgusting things always makes one more miserable ultimately , so it cannot be called entertainment , it is nothing but self destruction .

Indian cuisine is the best cuisine , indian dressing style is the best , indian home style is the best style .
Even indian stories are better than foreign stories , indian stories involving the gods in some form or the other are better than any and all Western stories . Indian culture is the best culture even though it has been largely killed by evil illusions today , they all want to become westernised and therefore they killed their own culture and tradition . Bhagavad Gita , Devi Gita , uddava Gita , Mahabharata , ramayana , other stories of gods , they must all be read or known even if they are flawed , one will get essential knowledge out of reading and knowing all these stories and books of wisdom .

Masturbation is essential for life , it is a good thing , it is never a wrong thing , a man has an organ called a penis ,

a woman has an organ called a vagina , sexual feelings start around the time we are 15 years old and we control it until we are married , sometimes the sexual feelings get intense and you need to masturbate and touch yourself and release fluid to get a release and feeling of relief , it is a good feeling , it is a necessary feeling . Masturbating is a good thing to do . Masturbate thinking about making love to nice and beautiful girls , imagine you are kissing them and cuddling with them and licking them and sucking them , imagine playing with their bodies , touch your penis or vagina and rub on it constantly while thinking about all this and you will get a good release and you will feel relaxed , sometimes if you are tired and you cannot think properly then watch pornographic and engage in masturbation and release yourself , watch videos of girls making love to girls and release yourself , watch many varieties of sex videos to get an idea of how people have sex , then you do it in your own style , be natural and normal during sex , don't act and perform during sex , go with the flow and enjoy , make love to nice and beautiful girls and enjoy with them happily , have hot and passionate and steamy and wild sex with those girls and enjoy , but keep it all a secret always , never tell people about your sexual life and sexual preferences , always keep it a secret , that is most important , keep your private things to yourself , don't say it to outsiders , enjoy privately and in public be a conservative and normal person , never show your

wildness and passion in public , don't engage in public display of affection , be secretive , be private , be proper and normal in public , if you tell or show to people that you are enjoying a lot then they will definitely try to ruin your happiness somehow and make you miserable like them , so be a private person always , only then will you be happy , only then can you enjoy always . In public , be well dressed always and behave properly always , in private enjoy with girls fully and be happy .

we are divine children , we are eternal beings , before coming here to earth in this age we lived forever in Home and after this period on earth we will again go back to Home and live in Home forever , so when we were in Home before this period on Earth we all used to make love to each other endlessly , the divine mothers and their daughters make love to each other endlessly , so making lots of love is not new to us , so if we get nice girls on earth then we make love to them a lot , it is a nice thing , it is the most wonderful thing , we don't have to feel ashamed or bad about it , making love is essential for life just like food and water are essential for life , girls love sex , they love intimacy , as girls we love sex and intimacy and close bonding and cuddling and hugging and kissing and endless affection , it is in our normal and natural nature itself , we cannot remove it , we cannot ignore it , trying to remove it or ignore it will only result in us hurting ourselves , so we need to embrace it , that is the best thing to do ,

nothing shameful or ugly or immoral about it , it is a perfectly good thing to think and feel and do , so sex is a wonderful thing , embrace it , enjoy it with the right girls , have a jolly and happy life here on Earth and go to Home once your period here ends and engage in endless forever lovemaking with the divine mothers and daughters there in Home . Sex Toys are not needed at all , they give no real stimulation , they are useless .
You meet a girl , you make love to her , you enjoy with her for a few months or few years , then you break up with her and find another girl , that is the most ugly thing to do , that is not love , that is not affection , that is not proper sex either . You meet a girl , you make love to her , you stay together always , that is the best thing to do , then you both find another girl , you both make love to that girl , all three of you stay together always , that is love and affection, that is the right way of doing it , so you never engage in break ups , you never dump each other , all of you girls stay together always and make beautiful love to each other always , you bathe together , you sleep naked together , you make love to each other a lot on the same bed together , you enjoy with each other a lot , that is the best thing to do , the most ideal thing to do , the most beautiful thing to do , that is definite . In home , the divine mothers and their daughters make love and stay together as a family always , that is how you must be on earth too , stay as a family always , stay together always , make lots

of love , enjoy , play with each other , be happy , cook well , eat well , maintain your health properly always , these are the best things to do , that is definite .
If you are a girl , then don't marry a boy , form a group of good girls , make love to each other , enjoy as a group fully always , stay together always , enjoy life and have lots of beautiful sex with each other and enjoy lots of closeness and bonding always and live happily always . This is the best thing to do , that is definite , it is the most ideal thing to do , the best thing to do whether it is possible or not in this world , it is the most beautiful thing , the most perfect and pure thing , that is the absolute truth .

In our house , there are many statues and paintings of goddesses , of these only 5 statues represent the divine mothers , the rest represent the divine sisters , so 5 statues are statues of the divine mothers , the remaining statues and all paintings are representations of the divine sisters , my hundreds of drawings are also representations of the divine sisters , all the statues and paintings you see in temples and elsewhere are also representations of the divine sisters , so on entire earth the divine mothers are represented only through 5 statues , and these 5 statues are found in our home , making our home the only real temple on earth , making our home the greatest temple on earth , making our home the most important and powerful temple on earth , all other temples are places where only

the divine sisters are found , our home is the only place on earth where the divine mothers are found in the form of statues or paintings , our home is like the greatest and most powerful shakthipeeth on earth . That is the truth .

As I am writing , new thoughts and ideas keep coming to me , is why writing a book is a good thing to do , it stimulates your thoughts and gives you many new thoughts and teaches you many new things in the process , it is a great learning experience .

If I like America and support America , then America will grow and become wealthier and stronger , I did this mistake in the past , now I don't like America and I don't support America , so America is declining and going down , that is the power of the children of the gods , the divine children , we created the world as it is today , and we can destroy what we created too , we can destroy what we created by not supporting evil illusions and evil society anymore , we need not support evil Nations and evil people anymore , doing so will only give us hurt and harm ultimately , so we have to become wise and stop supporting bad things ,by doing so we will let bad things to just decline and get destroyed , that is the best thing to do . I used to support tamils thinking they were my people , and this empowered the evil tamils and made them virulent and monstrous , so I have stopped supporting

them , I have stopped liking them , so they will decline and get destroyed ultimately , is what will happen .
So I will support only the divine children here on earth , I will like only them , I will support only their well bring and growth , I care only for them , this is the right thing to do , this is how I am now .
The statues and paintings of the divine mothers and divine sisters , take proper care of them always , they are our most prized possessions , take care of them affectionately always , dress up the statues beautifully , bathe the statues now and then . you create new paintings and drawings yourself , it's a wonderful pastime , create paintings and drawings of the divine sisters , if we had the knowledge we could create their statues too , but that is quite difficult because you need a whole setup for that , so create paintings and drawings of the Divine sisters , that is itself a most beautiful thing to do . Treat the divine mothers and sisters with utmost affection always , we are nothing without them , we exist because of them , they are our parents and siblings , they are our people , our closest people , our beloved people .

If I became an actor , I could have been among the most talented and wonderful actors of my generation , but I couldn't become an actor because I can't do scenes involving drinking and smoking and drugs , I can't do toilet scenes and pissing scenes , and I can't do explicit kissing

scenes and sex scenes too because I can't do such things publicly and show it to everyone on a screen , I am not that shameless , I can't do roles where my character lives in a slum , I can't play a beggar , I won't dress up like a woman and play drag characters , I won't play blind characters because it is boring , I won't play paralysed or terminally ill characters too because that is boring too , I won't dance unnecessary and heavy steps , I won't build a six pack physique or keep strange hairstyles , I won't spend two or three years doing a single movie or preparing for a role , I won't do war movies too because they are really boring , I won't play the villain definitely because I won't be beaten up and killed by any other character, I won't play Christian or Muslim characters , I will play only Hindu characters , I won't do unnecessarily tragic movies , I won't do any of these things , which is why I cannot become an actor despite my natural talent . I will do only comedy movies with some romance in them , I will do jolly thrillers or mystery movies too , happy ending family movies , I will do only positive movies and jolly movies , no tragic or sad movies for me , I will play only the hero , I won't do scenes in bars or nightclubs or discos or pubs , I won't do unnecessary or excessive fighting scenes too , which is why I could never become an actor . The gods created all movies and songs and dance , so directors and producers and actors and musicians and cinematographers and scriptwriters all did absolutely

nothing , the gods created the movies for my entertainment because I need some timeoass now and then , I don't have the divine sisters here to make love and play with and enjoy all the time , I can't just be quiet here all the time ,some timeoass is needed now and then , which is why I still watch mainly Telugu movies and sometimes Malayalam or hindi movies or rarely other language movies now and then solely for time pass and to watch together with family and spend time with family , I almost never watch tamil movies anymore . The best form of dance doesn't have to follow any particular style like classical or Western , you just put on a sing and feel that song and move gracefully and do gentle movements , that is the best form of dance , the lesser you dance the more you feel and more you enjoy the song and move in a flow with the song , is how it must be , movements must be very light and gentle and in a flow , heavy movements and difficult steps are absolutely not needed at all , heavy movements and difficult steps are not dance at all , they are acrobatics and acrobatics is not dance , for real dance you need not practice at all , you just put on the music and let your body move along in a flow with the tune , no need for choreography or remembering steps or doing fixed movements , that is all suppression of natural instinct , you won't enjoy like that , be free and move freely as you like , that is real dance , that is natural movement , why should we take training on how to move our body , why should we

move only in a fixed style , why should we follow some particular method of dance , none of it is needed at all , turn on the song and feel the music and move happily as you please , that is dance , you are not going to perform before an audience or stage or in some cinema,you are not performing at all , you are just enjoying a song and moving along with the music , that is dance , bharatanatyam is not dance , kuchipudi is not dance , ballet is not dance , tap dance is not dance , salsa is not dance , odissi is not dance , tango is not dance , none of that is real dance , real dance is what you do in your private space moving along to a tune without any training or practice , it is a natural thing like breathing or eating or making love or listening to music or enjoying a movie ,you don't need training or practice to do any of these , you just do it naturally because it is a part of you , real dance is like that too , you just do it naturally for your own enjoyment ,that's all , you don't do it as a performance ,you don't do it on stage or in functions or movies or elsewhere ,that is all not dance at all , that is all trash. And instead of acting , it is better to be natural and show normal feelings , that is the best performance you can give , that is the kind of acting I would do , I wouldnt engage in Western style method acting nor would I engage in stage style dramatic acting , I would just be natural and feel the role and perform naturally because I have that natural and normal instinct in me , is how I would perform if I was an actor ,

that is real performance ,no need for unnatural reactions or unnatural stuff, be natural and normal , that is best always be it in real life or in reel life . As for singing , half of singing is in how you get the notes right , it all depends on which point you start the sing , if you start the song at the right point you get both the upper and lower notes correctly , but if you start the song at a high point , then your voice will break in the upper notes because you can't reach it whereas the lower notes will come easily , if you start at a low point , then you sing the upper notes easily whereas the low notes won't come easily and your voice will break and crack in the lower notes , so never start high or low , start at the right point always , singers always tell the musicians to start the song in a point where they can sing it comfortably without their voice straining or breaking , so they always start at the right point , which is why they can sing properly always , starting at the right point is most important in a song , next you need to sing the notes properly , of course in your bathroom or bedroom you can sing freely as you want and enjoy , you don't need to follow singing rules in your bathroom or bedroom or home too , but if you are singing outside in front of somebody then you need to follow the singing rules to avoid feeling embarrassed because you will definitely make some mistake if you don't follow these basic rules , which are :

1-start at the right point. Do not start too high or too low , always start a song at the right point , you can sing any song well enough if you start correctly.
2.take basic practice to sing the notes correctly and make your voice steady .
This is all there is to singing , these are two basic rules of singing and if you follow these two rules you can become a good singer like I did. You need to apply yourself to each and every song , each song has a different starting point , so you sing it first and depending on how you sing it you change the starting point , if you are not getting it right then keep changing the starting point and keep singing till you get it right , you can sing even difficult songs if you get the starting point right , that is the main thing .
So follow these two rules to become a good singer .
 The second half of singing is feeling , a singer has to feel the song , only then will the song be beautiful to listen to , if you sing it without feeling then it would be boring to listen even if you sing it perfectly , so show some emotion in the song , don't try to show too much emotion , don't overact , don't engage in show off , don't sing to show your genius or talent , sing in a simple and beautiful manner with feeling and emotion , that is best . In private , don't follow any rules and sing any song as you like in any way you like , that is freestyle singing , it is a fun activity too .

I never wanted to become a sportsperson because a professional sportspersons career is filled with injuries and pain , the constant physical exertion makes them prone to frequent injuries and pain , which is why I never wanted to be a sportsperson and I don't have that talent too to become a top sportsperson , that is another thing too , I don't like competitions and winning and the stress that comes with it all , I can't take steroids too , a sporting life is a very stressful life and I never found it appealing , besides I don't watch sports myself regularly , I find it boring beyond a point , so to keep constantly playing is not my idea of entertainment , it doesn't appeal to me , I don't like it at all .

People engage in all sorts of depravity these days , you see porn and you see a lot of disgusting things too , you see videos in which people piss on each other or piss into each other's mouths , it's so horrible and disgusting , they even shit on each other or in each other's mouths , they call this entertainment , they are all deranged psychos , such psychos exist in our society .let me tell you , doing such sickly things doesn't give entertainment or happiness or good feeling , it only makes one feel even more miserable and mentally ill , that is the truth . In some videos , they beat each other violently saying the pain gives them pleasure , but again - pain does not give any pleasure at all , pain only gives an uncomfortable feeling .

So such sickly things and sickly people exist in the world , there are people who kill others for fun , they call them psychos and serial killers , there are all kinds of deranged psychos living here and doing miserable things in the name of fun and entertainment and making themselves even more miserable and deranged ultimately , such monsters are there abundantly in this society .

In our family , no woman ever had any bad habits like drinking or smoking or drugs , they are all always clean and proper , me and father never had any bad habits , grandfather and great grandfather used to drink rarely , grandfather used to smoke a lot which is why he lost his good health and damaged his own body , great grandfather used to smoke now and then in his youth and gave it up later , , me and father never had any bad habits . Even grandfather and great-grandfather never enjoyed those bad habits , smoking and drinking was created in their time and they never liked it , but still they engaged in it now and then due to a certain restlessness and boredom in them , otherwise even they never liked it , they were very proper and very great people in all ways except these few mistakes . Grandfather learnt his lesson after his health got damaged , he gave up his habit after his health was damaged because of the bad habit . Since they rarely drank their health was not damaged by drink , had they drank lots and lots like people do these days then their

health would have been severely damaged by drinking too , great-grandfather lived strongly until 83 or 84 because he never engaged too much in bad habits , he did it rarely and gave it up after an age , so he remained strong without his health getting affected greatly , whereas smoking damaged grandpa's health .
Great grandpa was born in 1900 and lived till 1983 .
Grandpa was born in 1927 and lived till 2001 .
Grandma (rathnammal) was born in 1937 and lived till 2012 .
Kanagavalli grandma was born in 1948 and she is 77 years old now and healthy and active despite minor age related health issues .
Father was born in 1958 June 30 and is healthy and active now at 67 .
Mother was born in 1968 June 16 and is healthy and very active now at 57 , mother is always very active , nobody can work tirelessly like her except grandma rathnammal .
I am born on April 2nd 1993 and I am 32 years old now .
Madhumita is born on June 13 1998 , she is 27 years old now .
We were married on February 2nd 2025 in hotel green park in Chennai , it is a five star hotel , there was only muhurtham and no reception as per our family custom , we never keep unnecessary functions like mehendi or sangeet or reception , we just keep two functions , engagement and muhurtham , that is all . Engagement

happened in hotel benzz park , a five star hotel in Vellore . Both functions happened beautifully and gracefully .
My father and mother got married on December 11 , 1986 , father was 28 , mother was 18 , I was born 7 years later in 1993 , they gave birth to me lately because they decided to enjoy for many years without a child , having a child is a great responsibility and great work , so they enjoyed for many years first and then gave birth to me . Even me and my wife have decided to have a child only 3 years after marriage , we would have enjoyed for more years without a child if we had gotten married younger like father and mother , but marriages these days are complicated and finding the right girl is very difficult , which is why I got married so late at 32 . So we will have a child only after 3 years , till then we will travel to many places and enjoy our private life with each other and make many good memories together and strengthen our bond fully , in these three years my wife will also learn everything about how to properly take care of a house , she will transform into a woman of the house from the girl she is now , she will then know how to take care of her child well in the future , a couple always needs some time together after marriage , there is no need to have a baby immediately after marriage , that is stupidity , let a couple enjoy together and understand each other fully for a few years , after which they can have a child , that is the best thing to do always . After marriage , small fights and

misunderstandings are normal always , one gradually learns to ignore it all and live steadily and peacefully and happily , is how it is. A wife always does more work than the husband , a wife always has more responsibilities than the husband , a wife is always greater than the husband , a mother is always greater and more important than the father , a woman of the house always has important work to do , but with sufficient training she does it all easily and effortlessly , she becomes a master at taking care of her home , is how it is, women are the life of the family , they are the pillars of the family , without women there is no family and no life in a house , women give life and warmth and beauty to a house , they are the most important people in any house , if they are happy and well then the family is happy and well , if they are not happy and well then the family is not happy and well , is how it is always , they are the light of life , they are the light and life of the house , that is definite .

I seek to have a girl child because a girl is the purest form and most perfect form and this family has seen males for four generations , so I want a girl to take over the family in the next generation ,I want her to be beautiful and good child who becomes a great and realised person , I want her to take care of the gods and home and belongings properly always , I want her to live happily and peacefully always , I don't want her to work under anybody for

money, I want her to live independently and strongly always , she has everything , let her live peacefully and happily with everything , let her learn everything and experience everything good , let her eat well and be healthy and strong always , that is how I want her to be . Let her read this book and know my thoughts whether she likes it or not , let her take care of the Divine mothers and sisters always , let her take proper care of the statues and paintings and everything else always , there is no life without the divine mothers and divine sisters , they are everything , where they live is where happiness and peace and victory live , without them there is nothing in life but darkness and sadness and emptiness , they are the givers of life and beauty and happiness , they are the ultimate people , we are one of them too , so we must realise this and live happy here and go to them after our time here is over .

I see movies on illegal sites like 5movierulz , I read books on illegal sites like zlibrary , zlibrary is a site created by the gods for us , it has made countless books available to us , these books were unavailable to us years before because we couldn't get those books in any book shop or they were too expensive to buy even if they were available , in zlibrary I could download any book in a few minutes easily , it is such a great help , every important book is available freely and easily , another good site is archive org which is

a legal site but has many books uploaded in it illegally , it is also a great site because it provides so many old books and famous books and other material , z library and archive org and great sites . Illegal movie sites like 5 movierulz and moviezwap and moviesda and many others are also great sites because we can't keep subscribing to every Ott app , so some movies not available to us in legal Ott apps we see them in illegal sites , I have seen lots of English movies and other movies in illegal sites , those movies were not available anywhere else or they were too costly to buy , so I watched them all illegally , the gods created these sites so I may watch it all and learn and experience everything , so all those sites were a great help and a great thing . Be it porn sites or sex stories sites or sex comics sites , the gods created it all so I can learn and experience everything necessary and attain realisation ultimately .

People have created so many unnecessary things because of their boredom , they constantly keep creating some new trash or the other just because they are terribly bored and they need to entertain themselves for a while , a lot many useless things have been created in this way like pickleball for example which was created in the last few years by wealthy people who were bored and did not know what else to do with their time , so they created a garbage game called pickleball . Creating trash ,

marketing that trash as the next big thing , selling as much of that trash as possible while the hype lasts , that is what people do here daily . They create worthless trends on a daily basis .

Since evil illusions don't exist when they are not near you , don't worry about them gossiping about you behind your back , how can they gossip when they don't exist at all , they exist only when they are near you and around you , so at other times they don't exist and therefore they don't speak any gossip about you and they don't think badly about you .
Being how society wants you to be , being a fake good boy like society wants you to be , that will only give you unhappiness and instability , be yourself , be normal and natural , follow your natural instinct even if it lands you in trouble sometimes , learn how to play the game without getting hurt , be intelligent , be imaginative , believe in the Divine mothers and Divine sisters for everything to work out properly , do everything with the right intentions always , doing something with wrong intentions will only lead to you hurting yourself very badly , so be careful always , act carefully and with focus and calculation and belief , it is better to be called a womaniser than an emasculated person who is suppressed and unable to show his natural instincts , society will try to make you into a soft and weak person who can't express their inner feelings , society will

supress you and make you feel extremely frustrated and make you lose your balance , but never lose your balance , be calm , be steady always , never get provoked , move towards what you want , get what you want , but also make sure what you want is the right thing , nevert go after the wrong thing and get caught in a trap , go only after the right thing always and you will get it definitely.

When it comes to women , great-grandfather and father were always perfect and proper , they never tried to love anybody before marriage , after marriage also they always remained steady and proper , they never went after any women . Grandfather had a reputation for womanising , though I don't know whether it is true , it is mostly lies because he was also a very traditional and conservative person . Me , on the other hand , I was a nerd and conservative until I went to college , in the last few years of school and in college I liked many girls , but it was all one sided and nothing came of it , had those girls taken a few steps towards me I would taken the remaining entire steps , but none of it happened , so desires remained as desires , my desire to love somebody and marry her never happened , the gods stopped me from getting any of those girls because they felt those girls were not the right ones for me , the gods made it clear that I was wishing for the wrong people , so they stopped me from getting any of those wrong people , they got me madhumita as my wife

and companion because she is the right person , but generally speaking , all the men in my family have a lot of sexual desire and a certain attraction for women , but we never succeeded in getting what we desired , we always failed , that is the end result , but we always got the right person in the end , the one person who will tolerate us and bear with us and take care of us lifelong , we always get that person as our companion and wife .

We are all living on this Earth which is situated in the body of the gods , this entire universe is in the body of the gods , the gods are living on Home , so we all on Home too though we can't see Home because we are inside the gods bodies , is how it is . We are living in this illusion inside the gods bodies . After this universe ends , after this illusion ends we will come out of the gods bodies and assume our original pure forms again and live on Home happily .
Home and house and temple are all the same thing , Home is where the gods and Divine daughter's live , house is the building in which we live and we are the Divine daughters too in altered form , temple is where the Divine daughters live in form of statues and paintings , so Home and house and temple all mean the same thing , our place of residence , so it is all the same .
The Divine people in Home , they care about the following things :

1.Family .
2.Home with all needs provided .
3.Statues and paintings of themselves .
4.Absolute knowledge ..
That's all , this is all they care about , their needs are minimal , they are absolutely happy and peaceful always .
This is how I am too , though I live in this illusory Earth , I care only for the following things :
1.Home , house , temple - all are the same . All basic needs provided .
2.Family .
3.Absolute knowledge .
4.Paintings and statues of the Divine mother's and sisters .
I did not include Earth and universe in this because it is all an illusion and beautiful nature is a part of Home too as said before , so I won't miss Earth and universe at all because beautiful nature can be found in Home too , snow and ice and desert don't make Earth beautiful , just rocks don't make Earth beautiful , the beautiful greenery is what makes Earth beautiful and this can be found on Home too , therefore I won't miss Earth and universe , I have everything I need in Home itself .
So these 4 are the only things I care about now .
In Home which is infinite , if the Divine daughters ever wanted they could create a small area with covered by ice , or they could create a small area covered by sand and desert or they could create a small ocean and bathe in it

too , so anything and everything is possible in Home , it is all there in Home itself , is how it is .
On Earth , Antarctica at present doesn't exist because no Divine children live on it , it is an illusion that comes to life only when we visit it . Australia and New Zealand and South America and Africa also don't exist at present because no Divine children live in it , these places also come to life only when we visit it and disappear once we leave , so we live in a very illusory world where most places don't exist at all including places like Pakistan and the middle East , most places come to life only if we visit them , is how it is . We live in Chennai now , so Chennai and it's surroundings always exist because Divine children are living there all the time , if all the Divine children in Chennai left it to visit some other place then Chennai would also cease to exist , is how it will be , only our houses and belongings and the statues and paintings of the gods will remain and everything else will vanish. So we are living in one big illusion here , we need to get out of it , go back to Home again , is what we need to do .

Reading this book , one might think I have gone crazy , but after suffering for 10-20 years that person will read the book again and understand why I have said everything I have said in this book , those who dont understand and follow the great truths written in this book are bound to suffer many many hardships no matter how honest and

good they are , so after suffering quite a lot they will then acknowledge the truths in my book and they will then follow those truths and become realised and become released from suffering gradually and will ultimately live happily and peacefully , is how it will be . People don't accept truths easily even if it is presented to them on a platter , so they will experience suffering and then realise the truths they ignored before and will become happy and peaceful .

So the universe is not a real world as it is but an illusion , there is only one real world - Home .

As said before , I have given up India and Hinduism and nationality and patriotism , there are only 4 things I care about now and I have said them above .

I live for myself and family , everything I do is for myself and family , evil illusions don't concern me at all .

My original form is the Divine girl , I will make love to my Divine mother's and sisters after I go to Home .

There is nothing there to achieve in this illusory world except realisation and a peaceful happy life with all basic comforts provided .

In Home we don't dance because we can fly ,and flying is better than dancing .

The gods created statues and paintings of male gods to represent the few Divine daughters who took a male form here on Earth , like me and father and grandfather and great-grandfather , those male gods statues and paintings represent none other than us , me and father and grandfather and great-grandfather . So at the tirupati temple , those who are praying to Lord venkatesa are really praying to me and father and grandfather and great-grandfather , we are the real people the statues represent . As said before , the Divine mother's are reresented only in our home , the Divine daughters are represented everywhere else including temples , both in male form and female form , the Divine mothers never take on a male form , only the Divine daughters took a male form in this age , and this is the only age , this is the only age there ever was , this is the only age there ever will be , that is definite , the gods don't unnecessarily keep creating age after age on Earth , they don't unnecessarily keep on creating universes and Earth's and all that , they created only one age , and that age is this one . So the statues of Lord Rama and Krishna and Siva and Brahma in temples represent none other than me and father and grandfather and great-grandfather , the gods created these representations to show us how to be , to show us

how the ideal male must be , they are trying to teach us how to be , they are trying to teach us how a proper male must be , is what they are trying to do . Male or female statues with animal faces were created to teach us to respect animals on par with humans . Lingam represents the nature - mountains and rivers and trees and deserts and everything else , they want us to respect nature by worshipping the lingam , lingam and stala vriksha and dwajasthambam and balipeedam and gopuram and vimanam all represent nature , we pay our respects to nature and Home through it , nature is a part of Home , so by worshipping all these things we are worshipping Home. Chidambara ragasyam is the divine energy that runs everything , by worshipping it we pay our respects to the invisible Divine energy , so this what we do .

****

The theory of evolution by Darwin is a lie because monkeys and chimpanzees and orangutans and gorillas exist today as they were in the past , they have not evolved into humans even a little bit , so how can we say humans came from them when they are still the same primitive beings even today and haven't show the slightest bit of evolution , so evolution is a fake theory as said in the

first book . The monkeys and other primates in the forests today have not shown even the slightest improvement towards becoming human , they have not shown even the slightest evolution , so such trash theories are all lies and nothing else . Give up believing all the countless lies on Earth and you will see the truth in it's truest and purest form .

Daily morning I wake up , I get ready , go to clinic , eat breakfast , I open the smartphone , and the gods create some new entertainment or old entertainment for me always , they create new movies for me to see , they create new songs for me to listen , they create new videos and new news and new books for me to see and read , they create new porn videos or images or places for me to see , they keep me entertained always , they keep educating me always , is how it is , I always have some entertainment always . I open the news channel on TV and the gods create some news or the other to test me , most of the things I see on the smartphone do not exist in reality , they are all illusions , be it people or places or things , they become real only when they come in my presence , so I keep seeing lots and lots of illusions on a daily basis , is how it is . If I don't see these illusions on the screen I see illusions on the road , they pass me on the road , and they dissapear and cease to exist once they go out of my sight , most of my life has been spent on seeing

illusions , it is all totally useless , a real person with real life in them can never be good , a real person with real life will only be of good nature always , only illusory people with no real life in them are totally evil like most of the people I see everyday , they will seem good from a distance , but I moved with them sooner or later their ugly evil nature will come out , it's always like that .

One way of destroying all the evil illusions is by not seeing them on the smartphone and ignoring them in person as much as possible , the lesser we see them the faster they fall , the more we ignore them and stop thinking about them the harder they fall , we should stop getting attracted by them , we should stop paying any attention to all these useless illusions .that is a great method to destroy evil illusions .

The Divine daughters here on Earth must be fully healthy and fit and active always , that is what I wish for always , that is how they will be always , they will always be strong and active and healthy and mobile and happy and peaceful here .

The Divine energy is everywhere , it is present fully everywhere , it doesn't move , it does everything without itself moving one bit , it never reduces in quantity of strength , it is always full and constant and totally powerful

and everywhere , it is the Divine energy of the gods , it is transparent and invisible and can create and destroy anything and everything , it is the most powerful energy , it is pure shakthi , my body moves , but the Divine energy in it never moves because it is everywhere fully , all living beings move using the endless Divine energy present everywhere , all material things move using the endless Divine energy present anywhere , living beings and material things may move but the divine energy running them all never moves and is constant and full in strength and quantity always , it's strength and quantity is infinite , this infinite energy is present everywhere and does everything . Divine Energy is continuous and everywhere and all permeating and omnipresent and eternal . Material things move but Divine energy never moves .

In life , a very important thing is to keep oneself occupied with something or the other always , it is very necessary , a person has to be active and lively always , that is what is good , being too silent without anything to do will make one depressed and feeling weak and ill and terribly bored , a person always needs some diversion , some entertainment , some activity to occupy oneself with , it is most important for a happy and healthy life , one must always be active and lively , one must never be a ‘ dead man walking ‘ kind of character . Ones body and head

must be active and full of life always for good health and a good life .

The Divine mothers are running the game , they know when to end it , till then I will enjoy here and live here as happily as I can , when they end this age I will go to them along with my other Divine sisters here and we will enjoy forever in Home .

So this second book has ended .
I don't know whether I will write a third book or not .
This book turned out to be a greater book than the first .
I never expected this book to be greater than the first .
But who am I to expect anything , the mother are running everything and doing everything , they always do what is best .

These books together comprise the diary of ashwath ..
The diary of ashwath has two parts , part 1 is thoughts of an indian , part two is ideas of an Indian . Both together comprise the big book ‘ diary of ashwath ‘ .

I am not going to publish this book under any company .I will just publish it freely on my favourite sites z library and archive org , that is enough for me , evil illusions cannot really read anyway , they are just illusions , so they cannot

really appreciate what I have written , my only audience are there the few Divine sisters here in male or female form , let them alone read it if they chance upon it , this book is for them alone , this book is for family alone .
That's all .
My first diary is complete , I don't know whether I will write a second one , let us see , but writing this one took 2 months , 2026 is coming in one more week , I have completed my first diary fully .

Let us live happily and peacefully here .
Let us go to the Divine mothers as soon as possible .
Let us enjoy here until then .
That's all .

The end .
